Playing with ... K Lucy Sanctuary,2017-07-05 This diverse and practical resource presents activities, games and ideas to support children who have speech sound difficulties between the age of 3 - 7 (older if used with children with a learning difficulty), eg developmental delay, disordered speech sounds, developmental apraxia of speech. The

book is divided into seven main sections: mouth exercises (oro-motor exercises); single sounds (k); short words - consonant + vowel, eg, car, key, cow; longer words that begin with the speech sound k - consonant + vowel + consonant, eg, comb, can, cap; longer words that end with k, eg, book, bike, duck; words with more than one syllable that begin with k, eg, cooker, coffee, camel, caterpillar; and, using words in sentences. Each section provides the opportunity for the child to hear the speech sound in isolation and in words before they try to say it (ie receptive and expressive activities). Includes: different activities to practise listening and saying the target sound/word; drilling games - ie the opportunity to hear the speech sound in isolation and in words, and to say them in increasingly challenging sequences in a game format; games that can be played with the picture cards of the words the child is working on; and, an auditory bombardment section composed of funny rhymes containing the words, the child has been working on in the section. The resource contains simple, accessible information on the development of speech sounds and specific information about the speech sound k. Examples of session plans using the resource are included in the book to help users plan work.

The Parent Survival Guide Theresa Kellam, 2011-02-14
When parents turn to the parenting/self-help section of their local bookstore, they are looking for both practical guidance and a childrearing philosophy that resonates with them - an approach they can

relate to and be comfortable implementing in their own household. In *The Parent Survival Guide: From Chaos to Harmony in Ten Weeks or Less*, Theresa Kellam presents a way to strengthen the relationship with the child that simultaneously promotes the parent's own emotional healing and wellness. Grounded in a research-supported therapeutic technique that uses structured play time as the catalyst for interpersonal connection and growth, Kellam's model is subtle in its simplicity. Through a series of guided exercises, Kellam gives parents the skills they need to begin to set aside special playtimes with their children, during which the most important part of the process is simply being there in a way that promotes healing, growth, and communication. The beauty of this approach is that in only 30 minutes, once a week, the results can be seen in only a few weeks. Features of the book include: Parent Survival Tip at the start of each chapter Original cartoon illustrations bring text to life Short but insightful worksheet questions bring focus to the program *The Parent Survival Guide* is structured over a series of 10 chapters, which can be read in conjunction with the 10-sessions of the CPRT workshops for those parents enrolled in a formal filial training program. But the material in the book is designed to be read and implemented by anyone. The author is not only a licensed psychologist and filial therapist, but she has also gone through the program with her own son and continues to rely on its principles within her family.
