Eyewitness Explorer: Weather Watcher DK, 2015-09-01 From light breezes to heavy storms, Weather Watcher helps young readers understand the different weather conditions that affect our everyday lives. With over 30 activities, kids can study clouds and fog, make a rainbow, create a snowflake, track a storm, and make tornadoes and hurricanes using everyday objects. Eyewitness Explorers encourage hands-on learning with 30 easy activities that help children observe, explore, and learn about the natural world. Each book explains the science behind the activities, laying the essential groundwork for contextualizing the experience to come. But at the heart of the books are the activities themselves--a chance to learn by doing with experiments that can be carried out right at home. Most can even be completed with materials already on hand, so there's no complicated preparation or specialized equipment needed. Simply choose one of the projects and follow the step-by-step, photographically illustrated instructions.

Spot how snowflakes shrink with colder air and grow just before they stop falling. Let perching birds point out the direction of the wind. Learn why pine cones close up in high humidity. Watch out for storms when clouds are more tall than wide! Most fascinating of all, you’ll discover distinct microclimates with every step you take—through the woods or down a city street. There are unique weather clues to be found on opposite sides of a tree—and even beneath a blade of grass! And once you can read the forecast in every cloud, breeze, sunbeam, plant, and raindrop? You may well delete your weather app!
