This report will evaluate the role of Microsoft
Corporation in the current multimedia industry. In
order to get an impression about Microsoft's
business, there is an overview of Microsoft's
products and services at first. Next, it will be
Microsoft's strongest competitors in the operating
system market as most consumers of multimedia
services have a Windows operating system which
included a player for multimedia content. This
player called Windows Media Player is being
discussed and compared to the RealNetworks'
RealOne player which is regarded as one of
Microsoft's strongest competitors in the
multimedia business. Consecutively, there is an
investigation of electronic devices currently
supporting the technology provided by Microsoft
including different audio- and video codecs.
Finally, there is a conclusion showing the results
of the research and giving some recommendations
when deciding which multimedia environment to
