World Social Report 2020 Department of Economic and Social Affairs,2020-02-14 This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

Trends in World Social Development Richard Estes,1988-10-06 Trends in World Social Development explores the dynamics and long-term consequences of the widening gap between the world's rich and poor nations. Building on his prior work, The Social Progress of Nations, this new volume reports both statistical and field observational data pertinent to the international, social, and political events of the 1980s through 1986. Highlights of this up-dated work include: a refined Index of Social Progress containing new indicators; detailed data on patterns of national and regional development; an analysis of trends in social development in 124 nations; and an examination of the People's Republic of China.

The Development Data Book ,1985

The Development Data Book Katherine Sheram,1988-01-01 This data book presents statistics on countries with populations of more than one million. The statistics relate to

economic development and the changes it is bringing about in the world. These statistics are measures of social and economic conditions in developing and industrial countries. Five indicators of economic development are presented, including color-coded maps and charts for clarification. Many charts present changes between 1965 and 1986, the year of the most current data. Section 1, Life Expectancy, addresses the proportion of deaths by age, the percentage of infants surviving the first year of life, and life expectancy at birth. Section 2, Primary School Enrollment Rate, covers primary school enrollment rates (1965 and 1985), male/female enrollment rates in developing countries (1965 and 1985), and persistence in primary school (1980-1985). Section 3, Population Growth Rate, charts growth in developing and industrial countries (1950-1986); population size, average annual growth, and average annual increase in developing countries (1965-1986); and population projections for 1986 and 2000. Section 4, GNP per Capita, deals with gross national product, population, and GNP per capita; their growth between 1965-1980 and 1980-1986; and the distribution of world population by GNP per capita (1986). Section 5, Merchandise Exports, analyzes the value of merchandise exports from developing and industrial countries (1960, 1981, 1986), the structure of merchandise exports of developing countries (1965 and 1986), and the flow of money into and out of developing countries (1960s and 1980s). Each section discusses relevant background information and recent developments. Sixteen indicators for 129 countries are presented in a data table. A glossary of terms is included. (GEA)

World Social Protection Report 2017-19 ,2017

World Development Report 1978 ,1978 This first report deals with some of the

major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

The Development Data Book Harriet Baldwin, Bruce Clifford Ross-Larson, Gerald Martin Quinn, 1984

World Development Report 2021 World Bank, 2021-06-15 Today's unprecedented growth of data and their ubiquity in our lives are signs that the data revolution is transforming the world. And yet much of the value of data remains untapped. Data collected for one purpose have the potential to generate economic and social value in applications far beyond those originally anticipated. But many barriers stand in the way, ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust. World Development Report 2021: Data for Better Lives explores the tremendous potential of the changing data landscape to improve the lives of poor people, while also acknowledging its potential to open back doors that can harm individuals, businesses, and societies. To address this tension between the helpful and harmful potential of data, this Report calls for a new social contract that enables the use and reuse of data to create economic and social value, ensures equitable access to that value, and fosters trust that data will not be misused in harmful ways. This Report begins by assessing how better use

and reuse of data can enhance the design of public policies, programs, and service delivery, as well as improve market efficiency and job creation through private sector growth. Because better data governance is key to realizing this value, the Report then looks at how infrastructure policy, data regulation, economic policies, and institutional capabilities enable the sharing of data for their economic and social benefits, while safeguarding against harmful outcomes. The Report concludes by pulling together the pieces and offering an aspirational vision of an integrated national data system that would deliver on the promise of producing high-quality data and making them accessible in a way that promotes their safe use and reuse. By examining these opportunities and challenges, the Report shows how data can benefit the lives of all people, particularly poor people in low- and middle-income countries. .

The Development Data Book World Bank,1995-01-01 The Development Data Book, published by the World Bank presents statistics on countries with populations of more than one million. The statistics relate to economic development and the changes it is bringing about in the world. Sometimes called indicators, the statistics are measures of social and

economic conditions in developing and industrial countries. The teaching guide which accompanies the data book present activities designed for world geography, world history, economics, international studies, or current affairs. Worksheets and maps accompany the activities. The goals of this teaching guide are to: (1) increase students' knowledge and understanding of economic development and of social and economic conditions in developing countries; and (2) strengthen students' ability to perform statistical calculations, make and interpret maps and other statistical data, analyze and synthesize information, make inferences and generalizations, and think critically in solving problems and making decisions. The volume includes: (1) Introduction presenting goals and objectives of the guide; (2) Beginning Activities; (3) Life Expectancy; (4) Primary School Enrollment Rate; (5) Population Growth Rate; (6) GNP (Gross National Product) per Capita; (7) Merchandise Exports; (8) Culminating Activities; (9) Test; (10) Outline Maps; and (11) Comparative Data Table. Social Progress and Sustainable Development Neil Thin,2002 *Clearly defines the social aspect of sustainable development *Suggests steps for international development agencies to mainstream policy Have you ever wondered why the term sustainable development is usually associated with the economic, environmental, and social components, but the social components are the least well defined? Neil Thin explores the diverse meanings of these social components of sustainable development. He offers steps we can take to mainstream social development policy, so we can better plan social progress, communicate about

objectives and strategies, and assess social change. He argues that social accountability must be an integrated set of concerns, not a marginalized responsibility of specialists. It must transcend time and spaces, taking into account not only those who are close to us, but distant strangers and future generations as well.

Inclusion Matters World Bank, 2013-11-26 Social inclusion is on the agenda of governments, policymakers, and nonstate actors around the world. Underpinning this concern is the realization that despite progress on poverty reduction, some people continue to feel left out. This report aims to unpack the concept of social inclusion and understand better how policies can be designed to further inclusion. First, the report offers a definition of social inclusion as the process of improving the terms for individuals and groups to take part in society. It unpacks different domains of society that excluded groups and individuals are at particular risk of being left out of -- markets, services, and spaces. Second, the report discusses the most important global mega-trends such as migration, climate change, and aging of societies, which will impact challenges and opportunities for inclusion. Finally, it argues that despite these challenges, change towards inclusion is possible and offers examples of inclusionary policies.

The Global Findex Database 2017 Asli Demirguc-Kunt, Leora Klapper, Dorothe Singer, Saniya Ansar, 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex

database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

State of the World's Children UNICEF.,2009 On 20 November 2009, the global community celebrates the 20th anniversary of the adoption by the United Nations General Assembly of the Convention on the Rights of the Child, the unique document that sets international standards for the care, treatment and protection of all individuals below age 18. To celebrate this landmark, the United Nations Children's Fund is dedicating a special edition of its flagship report The State of the World's Children to examining the Convention's evolution, progress achieved on child rights, challenges remaining, and actions to be taken to ensure that its promise becomes a reality for all children.
