Sixty Harvests Left Philip Lymbery,2022-08-18 'Powerful, purposeful and persuasive ... This book is transformative. We must read, mark and learn, fast' Michael Morpurgo 'A call to action - to change our world from the ground up. A vitally necessary book' Isabella Tree 'Philip Lymbery pulls no punches in cataloguing the calamitous mistakes we've made in our food system, but he has bold and inspiring solutions to offer, too.' Hugh Fearnley-Whittingstall Taking its title from a chilling warning made by the United Nations that the world's soils could be lost within a lifetime, Sixty Harvests Left uncovers how the food industry is threatening the planet. Put simply, without soils there will be no food: game over. And time is running out. From the United Kingdom to Italy, from Brazil to the Gambia to the USA, Philip Lymbery, the internationally acclaimed author of Farmageddon, goes behind the scenes of industrial farming and confronts 'Big Agriculture', where mega-farms, chemicals and animal cages are sweeping the countryside and jeopardising the air we breathe, the water we drink, the food we eat and the nature that we treasure. In his investigations, however, he also finds hope in the pioneers who are battling to bring landscapes back to life, who are rethinking farming methods, rediscovering traditional techniques and developing technologies to feed an ever-expanding global population. Impassioned, balanced and persuasive, Sixty Harvests Left not only demonstrates why future harvests matter more than ever, but reveals how we can restore our planet for a nature-friendly future.

WWF Patricia Kendell,2004 Discusses the nature conservation organization, known for their global efforts to save endangered species and fight against pollution and destruction of resources.

12 Small Acts to Save Our World WWF,2018-09-20 _____ – Ever wanted to save the world? – It’s easy to feel like we can’t make a difference. But small, easy actions, if taken by enough people, can move mountains – and save planets. Written in collaboration with leading environmental experts from WWF, this short book provides simple changes we can all make to our everyday lives, from morning to night. These aren’t the only things you can do. Nor are they things you have to do. But these 12 small acts are basic steps anybody can take, and if even one of them sticks, our children will inherit a better world. Acts like: – Turning off devices instead of leaving them on standby – Buying less cotton clothing (a T-shirt needs 2,400 litres of water to make!) – Using reusable straws when possible – Turning off the tap while you brush your teeth will take only moments, but if enough people commit to them, we can make a real difference to our planet.

Scaling up SDGs Implementation Godwell Nhamo,Gbadebo O. A. Odularu,Vuyo Mjimba,2020-01-14 This volume challenges global leaders and citizenry to do more in order to resource the implementation of the 2030 Agenda for Sustainable Development (AfSD) and its 17 interwoven Sustainable Development Goals (SDGs). Starting from the concept ‘we cannot manage what we cannot measure’, the book presents some cases showing how to draw national level baselines for the domestication and localisation of the SDGs seeking to provide a clear roadmap towards achieving the 2030 AfSD. Scaling up SDGs Implementation is targeted at the United Nations, national and state governments, sub-national governments, the corporate sector and civil society, including higher education institutes, labour groups, non-governmental organisations and youth movements. The book is cognizant of these institutions’ common, but differentiated responsibilities and capabilities within their socio-political, environmental and economic conditions. The book presents case studies of how the corporate sector has been scaling up SDGs implementation, from the tourism sector, insurance, to the aviation and agricultural sectors. To make sure that no one is left behind, the volume includes cases on solutions for pressing environmental and socio-economic

problems ranging from cooperatives in Brazil to the conservation of springs in Zimbabwe. The matter of finding synergies between the climate SDG and the Paris Agreement's Nationally Determined Contributions (NDCs) is elaborated at length. Lastly, the book discusses how institutions of higher education remain critical pillars in SDGs scaling up, with cases of curriculum re-orientation in South Africa to the rolling out of the Women's University in Africa. In this context, this volume challenges every global citizen and organization to invest every effort into making the implementation of the SDGs a success as we welcome the second four to five year segment down the road to the year 2030.

Adaptive Cross-scalar Governance of Natural Resources Grenville Barnes, Brian Child, 2014-04-24 Natural resource governance is critical for linking poverty reduction and sustainable natural resource use. This book brings together authors from various disciplines with extensive field experience to promote an integrative understanding of cross-scale and adaptive governance in Africa and Latin America. The authors make the case for reaching beyond decentralization to promote adaptive governance that serves local priorities, but through interactions with local, district, national and global governance structures. The book focuses on the governance of common pool resources such as forests, wildlife, water, carbon and pasture resources in both Africa and Latin America. This book will appeal to development practitioners and scholars concerned about the conservation of natural resources and the sustainable development of communities. It synthesizes experience with the governance of different natural resources from a broad geographic perspective. It also provides theoretical and practical suggestions for taking adaptive natural resource governance forward, including participatory methods for measuring and monitoring governance.

Caring for the Earth The World Conservation Union (Iucn), Unep, Wwf, 2013-11-05 'This is a strategy for a kind of development that provides real improvements in the quality of human life and at the same time conserves the vitality and diversity of the Earth. The goal is development that will be sustainable. Today it may seem visionary. but it is attainable. To more and more people it also appears our only rational option.' - from Chapter 1 in 1980, the International Union for Conservation of Nature and Natural Resources, the United Nations Environment Programme and the World Wide Fund for Nature, the world's three most powerful organizations dedicated to preventing environmental catastrophe, published the World Conservation Strategy. It stressed the interdependence of conservation and development, it gave currency to the idea of sustainable development and it made the point that unless the vitality and productivity of the planet are safeguarded, the future for humanity is at risk. Its impact was immediate and worldwide. Now, ten years later, the same three organizations have formulated a new strategy for the 1990s. *Caring for the Earth* builds on all that has been learned in the last decade about the complexity of the problems and shows how radical and far-reaching are the actions and objectives needed to meet them. Nothing less than a new ethic is required, based on affirming the community of life and cherishing its diversity - an ethic which has to be reflected in our personal attitudes and the organization of our communities as much as in wider policies. Public participation is essential for the success of the strategy, which is addressed to individuals and citizens' groups as well as to governments - whatever their systems. Adopting it will not be easy, but it does provide the agenda for immediate action. Originally published in 1991

Voluntary compensation of greenhouse gas emissions: International guidance and initiatives Ahonen, Hanna-Mari, Möllersten, Kenneth, Spalding-Fecher, Randall, 2021-10-27 Available online: <https://pub.norden.org/temanord2021-541/> An increasing number of non-state actors are taking steps towards and beyond carbon neutrality and making claims about their climate impact and contribution to mitigation, so as to contribute to the Paris Agreement's long-term goal to limit global warming to 1.5 degrees Celsius. Voluntary compensation of greenhouse gas emissions enables actors to take responsibility for their remaining emissions by supporting additional mitigation outcomes that occur outside the actors' boundaries. This report maps key international guidance and initiatives relevant to voluntary compensation. It aims to foster a common knowledge base on high-integrity use of voluntary compensation as part of actors' broader mitigation efforts towards and beyond carbon neutrality. It was prepared under the Nordic Dialogue on Voluntary Compensation.

Animal Welfare in a Pandemic John T. Hancock, Ros C. Rouse, Tim J. Craig, 2024-04-29 *Animal Welfare in a Pandemic* explores the impact of COVID-19 on a wide array of animals, from those in the wild to companion and captive animals. During the height of the pandemic, a range of animals were infected, and many died, but this was hard to predict, even using up-to-date bioinformatics. Lockdowns around the world had, and continue to have, a major effect on animals' welfare, influencing pet ownership and care, as well as impacting on the work of conservation institutes due to the lack of visitors and funding and lack of tourist presence in the wild which impacted on anti-poaching efforts. Some of the vast amount of personal protection equipment (PPE) that was distributed was discarded, creating both dangers and occasional opportunities for wild animals. With the rollout of human vaccines, some countries started developing animal vaccines, only some of which were deployed. In summary, the pandemic had a wide-ranging influence on animal welfare around the world. This is reviewed to highlight what can be learned to protect and enhance animal welfare in future epidemics/pandemics, and contribute to a genuinely One Health approach where the health and welfare of both humans and animals are considered holistically. This book is authored by members of the University of the West of England, Bristol, who span a range of expertise in Biological Sciences, Social Sciences, Animal Welfare, and Ethics.
