A Commentary on Ovid's Fasti, Book 6 R. Joy Littlewood, 2006-06-29 After a period of neglect, the Fasti, Ovid's elegiac poem on the Roman calendar, has been the focus of much recent scholarship. Joy Littlewood suggests that Book 6 is unified by the theme of War, so providing a framing bracket to balance the dominant theme of Peace in Book I. While January celebrates the blessings of Augustan peace, June presents a multifaceted portrait of Roman war, a uniquely Roman combination of *virtus* and *pictas*. The three goddesses who dispute the origin of the month in the Proem have associations with military success and Roman power, a distinguishing characteristic that they share in varying degrees with the goddesses whose festivals fall in June (Carna, Vesta, Mater Matuta, Fortuna, and Minerva), most of whom, like Juno of Lanuvium, are also the focus of women's cult. Throughout the month, republican military conflicts are recalled in temples vowed and anniversaries of victory and defeat in Rome's struggle for hegemony. Finally, a complex extended epilogue, which culminates in the celebration of Hercules Musarum, coalesces with familiar themes of Augustan ideology: apotheosis, dynastic eulogy, and the monuments of the Pax Augusta. These and other themes are discussed in the Introduction to the Commentary, which includes analyses of the literary and historical background of the work, Augustus' dynastic restructuring of Roman religion, as evinced in the iconography of his new monuments, Ovid's adaptations of material from Livy's Histories and Horace's Roman Odes, his narrative technique, and his expansion of the elegiac genre through the antiquarian content of the book. Fascinating literary questions are raised by the poet's audacious violation of generic boundaries, no less than by his inclusion of sound antiquarian material artfully camouflaged by literary allusion. Ovid's Fasti Book 6 offers new insights into the complex role played by religion in Roman life.--BOOK JACKET.

When God Took Sides Marianne Elliott, 2009-09-24 The struggle between Catholic and Protestant has shaped Irish history since the Reformation, with tragic consequences up to the present day. But how do Catholics and Protestants in Ireland see each other? And how do they view their own communities and what these communities stand for? Tracing the history of religious identities in Ireland over the last three centuries, Marianne Elliott argues that these two questions are inextricably linked and that the identity of both Catholics and Protestants is shaped by the way that each community views the other. Cutting through the layers of myths, lies, and half-truths that make up the vision that Catholics and Protestants have of each other, she looks at how mutual religious stereotypes were developed over the centuries, how they were perpetuated and entrenched, and how they have defined modern identities and shaped Ireland's historical destiny, from the independence struggle and partition to the Troubles of the last four decades.

Is Japanese Related to Korean, Tungusic, Mongolic and Turkic? Martine Irma Robbeets, 2005 Where does Japanese come from? The linguistic origin of the Japanese language is among the most disputed questions of language history. One current hypothesis is that Japanese is an Altaic language, sharing a common ancestor with Korean, Tungusic, Mongolic and Turkic. But, the opinions are strongly polarized. Especially the inclusion of Japanese into this classification model is very much under debate. Given the lack of consensus in the field, this book presents a state of the art for the etymological evidence relating Japanese to Korean, Tungusic, Mongolic and Turkic. The different Altaic etymologies proposed in the scholarly literature are gathered in an etymological index of Japanese appended to this book. An item-by-item sifting of the evidence helps to hold down borrowings, universal similarities and coincidental look-alikes to a small percentage. When the remaining core-evidence is screened in terms of phonological regularity, the answer to the intriguing question is beginning to take shape.

Valerius Flaccus' Argonautica, Book 1 Caius Valerius Flaccus, Gaius Valerius Flaccus, 2008-07-17 It discusses, inter alia, the limited evidence for Valerius' life; the main features of his often difficult poetic language; the handling of the Argonautic myth in literature prior to Valerius; his innovative treatment of the inherited material; and his self-positioning within the broader literary tradition, particularly his sophisticated adaptation of formal and thematic elements from his two principal poetic models, Apollonius Rhodius' *Argonautica* and Virgil's *Aeneid*. While the commentary is written for readers with some competence in Latin, the introduction, and the facing English translation, are thoroughly accessible to non-Latinate readers with an interest in Roman literature and in the ancient epic tradition.--BOOK JACKET.

The Tungusic Languages Alexander Vovin, José Andrés Alonso de la Fuente, Juha Janhunen, 2023-08-31 The Tungusic Languages is a survey of Tungusic, a language family which is seriously endangered today, but which at the time of its maximum spread was present all over Northeast Asia. This volume offers a systematic succession of separate chapters on all the individual Tungusic languages, as well as a number of additional chapters containing contextual information on the language family as a whole, its background and current state, as well as its history of research and documentation. Manchu and its mediaeval ancestor Jurchen are important historical literary languages discussed in this volume, while the other Tungusic languages, around a dozen altogether, have always been spoken by small, local, though in some cases territorially widespread, populations engaged in traditional subsistence activities of the Eurasian taiga and steppe zones and the North Pacific coast. All contributors to this volume are well-known specialists on their specific topics, and, importantly, all the authors of the chapters dealing with modern languages have personal experience of linguistic field work among Tungusic speakers. This volume will be informative for scholars and students specialising in the languages and peoples of Northeast Asia, and will also be of interest to those engaged with linguistic typology, cultural anthropology, and ethnic history who wish to obtain information on the Tungusic languages.

The Religion of the Mithras Cult in the Roman Empire Roger Beck,2006-01-12 A study of the religious system of Mithraism, one of the 'mystery cults' popular in the Roman Empire contemporary with early Christianity. Roger Beck describes Mithraism from the point of view of the initiate engaging with the religion and its rich symbolic system in thought, word, ritual action, and cult life. He employs the methods of anthropology of religion and the new cognitive science of religion to explore in detail the semiotics of the Mysteries' astral symbolism, which has been the principal subject of his many previous publications on the cult.

Metaphysics, Soul, and Ethics in Ancient Thought Ricardo Salles,2005-02-03 Leading figures in ancient philosophy present new essays on themes from the work of Richard Sorabji, paying tribute to his great achievements and leading his ideas in fresh directions. Sorabji himself contributes to the volume with a fascinating 'intellectual autobiography'. Contributors Sylvia Berryman, Marcelo D. Boeri, Robert Bolton, Sarah Broadie, Myles Burnyeat, Gabriela Roxana Carone, V. Caston, Christopher Gill, Frans A. J. de Haas, Brad Inwood, Charles H. Kahn, A. A. Long, Mary Margaret McCabe, Alexander P. D. Mourelatos, A. W. Price, Ricardo Salles, David Sedley, Bob Sharples, Richard Sorabji.

The Sites of Rome David H. J. Larmour,Diana Spencer,2007-11 The essays in The Sites of Rome offer glimpses, sideways glances, and unexpected angles that open up this city-of-texts in its widest possible sense. A play upon the homonyms 'site' and 'sight' in the title points to a shared concern, namely how any of the visible components of Rome-the hills, the Tiber, the temples, the Fora, the Colosseum, the statues and monuments-operates as, or becomes, one of the sites sights of Rome.

Law, Reason, and the Cosmic City Katja Maria Vogt,2008-01-08 The notions of the cosmic city and the common law are central to early Stoic political thought. As Vogt shows, together they make up one complex theory. A city is a place governed by the law. Yet on the law pervading the cosmos can be considered a true law, and thus the cosmos is the only real city. A city is also a dwelling-place--in the case of the cosmos, the dwelling-place of all human beings. Further, a city demarcates who belongs together as fellow-citizens. The thought that we should view all other human beings as belonging to us constitutes the core of Stoic cosmopolitanism. All human beings are citizens of the cosmic city in the sense of living in the world. But the demanding task of acquiring wisdom allows a person to become a citizen in the strict sense: someone who lives according to the law, as the gods do. The sage is the only citizen, relative, friend and free person; via these notions, the Stoics explore the political dimensions of the Stoic idea of wisdom. Vogt argues against two widespread interpretations of the common law--that it consists of rules, and that lawful action is what right reason prescribes. While she rejects the rules-interpretation, she argues that the prescriptive reason-interpretation correctly captures key ideas of the Stoics' theory, but misses the substantive side of their conception of the law. The sage fully understands what is valuable for human beings, and this makes her actions lawful. The Stoics emphasize the revisionary nature of their theory; whatever course of action perfect deliberation commands, even if it be cutting off one's limb and eating it, we should act on its command, and not be held back by conventional judgments.

A Commentary on Isocrates' Antidosis Yun Lee Too,Isocrates,2008-06-05 Crucial to the question of self-characterization is how one can present a sympathetic persona through rhetoric, spoken or written, when rhetorical performance itself has derogatory connotations as a result of association with the professional speechmakers of classical Greece, the sophists.--BOOK JACKET.

The Oxford Handbook of Compounding Rochelle Lieber,Pavol Stekauer,2011-07-07 This book presents a comprehensive review of theoretical work on the linguistics and psycholinguistics of compound words and combines it with a series of surveys of compounding in a variety of languages from a wide range of language families. Compounding is an effective way to create and express new meanings. Compound words are segmentable into their constituents so that new items can often be understood on first presentation. However, as keystone, keynote, and keyboard, and breadboard, sandwich-board, and mortarboard show, the relation between components is often far from straightforward. The question then arises, as to how far compound sequences are analysed at each encounter and how far they are stored in the brain as single lexical items? The nature and processing of compounds thus offer an unusually direct route to how language operates in the mind, as well as providing the means of investigating important aspects of morphology, and lexical semantics, and insights to child language acquisition and the organization of the mental lexicon. This book is the first to report on the state of the art on these and other central topics, including the classification and typology of compounds, and cross-linguistic research on the subject in different frameworks and from synchronic and diachronic perspectives.

Predicative Possession Leon Stassen,2009-05-07 This pioneering work draws on on data from over 400 languages from a wide range of language families to establish a typology of four basic types of predicative possession. It examines their interdependence with other typologies, and explores varieties of related grammaticalization processes.
