Interactive Mobile Communication Technologies and Learning Michael E. Auer, Thrasyvoulos Tsiatsos, 2018-02-13 Interactive mobile technologies have now become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 11th International Conference on Interactive Mobile Communication, Technologies and Learning (IMCL2017), which was held in Thessaloniki from 30 November to 01 December 2017. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have in the meanwhile become a central forum of the exchange of new research results and relevant trends, as well as best practices. Online around the World Laura M. Steckman, Marilyn J. Andrews, 2017-05-24
Covering more than 80 countries around the world, this book provides a

compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

Innovations in Magazine Publishing Simon Das, David Stam, Andrew Blake, 2021-05-05 This book examines the key developments in the UK magazine industry since 2014 and explains in detail how the business has innovated to survive. *Innovations in Magazine Publishing* explores the key issues that

publishers and editors have had to grapple with in recent years and demonstrates how they have changed their business models and encouraged innovation and creativity. Written in an engaging and accessible style, the authors and contributors have drawn on years of industry expertise and contacts to examine the massive changes that have taken place in the areas of content creation and advertising in the last decade. Beginning with a highly useful summary of UK magazine publishing history, the book then provides a detailed focus on how magazines have had to adapt to a declining revenue picture in both copy and advertisement sales. This discussion considers changes in ownership and the supply chain, mutual dependency on social media, the rapid growth of the independent sector, investing in brand and product extensions, and how media companies themselves have changed to meet the demands of the new era. The important issue of ethnic diversity within the UK publishing industry is addressed and the introduction also includes a discussion of the effects of the Covid-19 pandemic on the industry, and how the magazine business will need to respond to whatever the future may bring. This comprehensive overview of the current state of the industry is a vital resource for students, researchers and professionals in magazine journalism, as well as for those studying media and journalism studies more generally.
