Extraordinary Everyday Photography Brenda Tharp, Jed Manwaring, 2012-08-21

Through accessible discussions and exercises, readers learn to use composition, available light, color, and point of view to create stunning photographs in any environment. Photographers are born travelers. They'll go any distance to capture the right light, beautiful landscapes, wildlife, and people. But exotic locales aren't necessary for interesting photographs. Wonderful images are hiding almost everywhere; you just need to know how to find them. *Extraordinary Everyday Photography* will help you search beyond the surface to find the unexpected wherever you are, be it a downtown street, a local park, or your own front lawn. Authors Brenda Tharp and Jed Manwaring encourage amateur photographers to slow down, open their eyes, and respond to what they see to create compelling images that aren't overworked. Inspiring photo examples from the authors, taken with DSLRs, compact digital cameras, and even iPhones, show that it is the photographer's eye and creative vision--not the gear--that make a great image.

The Best Camera Is The One That's With You Chase Jarvis, 2009-09-18 A beacon of creativity with boundless energy, Chase Jarvis is well known as a visionary photographer, director, and social artist. In The Best Camera Is The One That's With You, Chase reimagines, examines, and redefines the intersection of art and popular culture through images shot with his iPhone. The pictures in the book, all taken with Chase's iPhone, make up a visual notebook—a photographic journal—from the past year of his life. The book is full of visually-rich iPhone photos and peppered with inspiring anecdotes. Two megapixels at a time, these images have been gathered and bound into a book that represents a stake in the ground. With it, Chase underscores the idea that an image can come from any camera, even a mobile phone. As Chase writes, "Inherently, we all know that an image isn't measured by its resolution, dynamic range, or anything technical. It's measured by the simple—sometimes profound, other times absurd or humorous or whimsical—effect that it can have upon us. If you can see it, it can move you." This book is geared to inspire everyone, regardless of their level of photography knowledge, that you can capture moments and share them with our friends, families, loved ones, or the world at the press of a button. Readers of The Best Camera Is The One That's With You will also enjoy the iPhone application Chase Jarvis created in conjunction with this book, appropriately named Best Camera. Best Camera has a unique set of filters and effects that can be applied at the touch of a button. Stack them. Mix them. Remix them. Best Camera also allows you to share directly to a host of social marketing sites via www.thebestcamera.com, a new online community that allows you to contribute to a living, breathing gallery of the best iPhone photography from around the globe. Together, the book, app, and website, represent a first-of-its-kind ecosystem dedicated to encouraging creativity through picture taking with the camera that you already have. The Best Camera Is The One That's With You—shoot!

Digital Photography and Everyday Life Edgar Gómez Cruz, Asko Lehmuskallio, 2016-05-20 *Digital Photography and Everyday Life: Empirical studies on material visual practices* explores the role that digital photography plays within everyday life. With contributors from ten different countries and backgrounds in a range of academic disciplines - including anthropology, media studies and visual culture - this collection takes a uniquely broad perspective on photography by situating the image-making process in wider discussions on the materiality and visibility of photographic practices and explores these through empirical case studies. By focusing on material visual practices, the book presents a comprehensive overview of some of the main challenges digital photography is bringing to everyday life. It

explores how the digitization of photography has a wide-reaching impact on the use of the medium, as well as on the kinds of images that can be produced and the ways in which camera technology is developed. The exploration goes beyond mere images to think about cameras, mediations and technologies as key elements in the development of visual digital cultures. *Digital Photography and Everyday Life* will be of great interest to students and scholars of Photography, Contemporary Art, Visual Culture and Media Studies, as well as those studying Communication, Cultural Anthropology, and Science and Technology Studies.

Media and Everyday Life Tim Markham, 2017-09-16 This innovative introduction to media studies challenges conventional accounts of what media do to people – focusing instead on what people do with media in the course of everyday life. By rejecting the conventional media studies approach, the book provides a fresh way of thinking about media cultures and provokes thought into how media influences daily social norms. Smartly organized, each chapter offers a broad discussion of various facets of media, such as technology, social media and industries. Key trends and traditions are also considered, helping to define how media has become so entwined in the everyday experience. Written by a respected author and academic in the field, the book offers an accessible overview for students of media, communication and cultural studies looking to explore how modern-day media practices impact on the experience of everyday life, making this the essential companion to introductory media studies courses.

Tatsuo Suzuki: Friction / Tokyo Streets, 2019-02 This book embodies Japanese street photography now. Composed of black-and-white photos taken throughout Tokyo's bustling wards, *Friction / Tokyo Streets* reveals unexpected meaning and beauty in the mundane, be it in an image of a girl navigating a zebra crossing, cropped legs standing on a subway platform, shifting reflections in a store window, or a pigeon caught mid-flight. Suzuki captures the spontaneous gestures, glimpses and abstractions that comprise the best street photography. Yet as the book's title reveals, it is the conflicting and contradictory energies of the street that lie at the core of his project: Through my own eyes ... I would like to express the tension, the edged frustration, the taut atmosphere and the feelings that beat, inherent in the city. 'No one moment is most important. Any moment can be something.' -Garry Winogrand
