**Carabid Beetles: Ecology and Evolution** K. Desender,M. Dufrêne,M. Loreau,M.L. Luff,J-P. Maelfait,2013-04-17 The Carabidae form one of the largest and best studied families of insects, occurring in nearly every terrestrial habitat. The contributions included in this book cover a broad spectrum of recent research into this beetle family, with an emphasis on various aspects of ecology and evolution. They deal both with individual carabid species, for example in studies on population and reproductive biology or life history in general, and with ground beetle communities, as exemplified in papers treating assemblages in natural habitats, on agricultural land and in forests. Disciplines range from biogeography and faunistics, over morphology, taxonomy and phylogenetics, ecophysiology and functional ecology, to population, community, conservation and landscape ecology. This volume is the result of the 8th European Carabidologists' Meeting, 2nd International Symposium of Carabidology, September 1-4, 1992, Belgium.

Otaku and the Struggle for Imagination in Japan Patrick W. Galbraith, 2019-12-06 From computer games to figurines and maid cafes, men called “otaku” develop intense fan relationships with “cute girl” characters from manga, anime, and related media and material in contemporary Japan. While much of the Japanese public considers the forms of character love associated with “otaku” to be weird and perverse, the Japanese government has endeavored to incorporate “otaku” culture into its branding of “Cool Japan.” In *Otaku and the Struggle for Imagination in Japan*, Patrick W. Galbraith explores the conflicting meanings of “otaku” culture and its significance to Japanese popular culture, masculinity, and the nation. Tracing the history of “otaku” and “cute girl” characters from their origins in the 1970s to his recent fieldwork in Akihabara, Tokyo (“the Holy Land of Otaku”), Galbraith

contends that the discourse surrounding “otaku” reveals tensions around contested notions of gender, sexuality, and ways of imagining the nation that extend far beyond Japan. At the same time, in their relationships with characters and one another, “otaku” are imagining and creating alternative social worlds.

*Stray Dog of Anime* B. Ruh, 2016-01-08 Upon its US release in the mid 1990s, *Ghost in the Shell*, directed by Mamoru Oshii, quickly became one of the most popular Japanese animated films in the country. Despite this, Oshii is known as a maverick within anime: a self-proclaimed 'stray dog'. This is the first book to take an in-depth look at his major films, from *Urusei Yatsura* to *Avalon*.

Pasture Landscapes and Nature Conservation Bernd Redecker, Werner Härdtle, Peter Finck, Uwe Riecken, Eckhard Schröder, 2012-12-06 One of the main problems and aims of nature conservation in Europe is to protect semi-open landscapes. The development during the past decades is characterized by an ongoing intensification of land use on the one hand, and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand. In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution to this problem. The book gives an overview of the European projects concerning to this topic - nature conservation policy and strategies, scientific results and practical experiences creating large scale grazing systems.

Immune to disease, able to heal themselves from injuries, they will never die of old age—although they can fall victim to catastrophic wounds. They have walked among mortals for millennia, traveling across the world, trying to understand their special gifts while searching for one another in the hope of finding some meaning in a life that may go on forever. Following their individual stories over the course of human history and beyond into a richly imagined future, “one of science fiction’s most revered writers” (USA Today) weaves a broad tapestry that is “ambitious in scope, meticulous in detail, polished in style” (Library Journal).

**Combating Desertification in Asia, Africa and the Middle East** G. Ali Heshmati,Victor R. Squires,2013-07-01 This book is about the 'how' of desertification control as opposed to an analysis of the 'why' and fills a gap in the desertification-related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands. There are numerous illustrations to show the successful techniques. This compilation demonstrates that desertification and land degradation can be controlled and reversed with existing techniques in such widely varying environments as the Sahel of Africa to Sri Lanka and the Philippines in SE Asia, from mountains in Lesotho to low lands on desert

margins in Mongolia. Proven approaches include technical interventions, changes in governance and to the legislative framework and policy reform. The book fills a gap in the desertification-related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands.
