

A Question Of Font

Richard Blair,Jonathan Crossland,Matthew Reynolds,Thearon Willis

Hairstyles of the Damned Joe Meno, 2004-09-01 'Hairstyles' is an honest depiction of growing up punk on Chicago's south side: a study in the demons of racial intolerance, Catholic school conformism and class repression. It is the story of the riotous exploits of Brian, a high school burnout, and his best friend Gretchen, a punk rock girl fond of brawling. Joe Meno won the 2003 Nelson Algren Literary Award and is the author of 'Tender as Hellfire' (St. Martin's, 1999) and 'How the Hula Girl Sings' (HarperCollins, 2001). His online fictional serial, 'The Secret Hand', is published through 'Playboy Magazine'. His short fiction has been published in 'TriQuarterly', 'Bridge', 'Other Voices Washington Square', and has been broadcast on National Public Radio. He lives in Chicago, and he is a columnist for 'Punk Planet' magazine.

Just My Type Simon Garfield, 2011-09-01 A hugely entertaining and revealing guide to the history of type that asks, What does your favorite font say about you? Fonts surround us every day, on street signs and buildings, on movie posters and books, and on just about every product we buy. But where do fonts come from, and why do we need so many? Who is responsible for the staid practicality of Times New Roman, the cool anonymity of Arial, or the irritating levity of Comic Sans (and the movement to ban it)? Typefaces are now 560 years old, but we barely knew their names until about twenty years ago when the pull-down font menus on our first computers made us all the gods of type. Beginning in the early days of Gutenberg and ending with the most adventurous digital fonts, Simon Garfield explores the rich history and subtle powers of type. He goes on to investigate a range of modern mysteries, including how Helvetica took over the world, what inspires the seeming ubiquitous use of Trajan on bad movie posters, and exactly why the all-type cover of Men are from Mars, Women are from Venus was so effective. It also examines why the T in the Beatles logo is longer than the other letters and how Gotham helped Barack Obama into the White House. A must-have book for the design conscious, Just My Type's cheeky irreverence will also charm everyone who loved Eats, Shoots & Leaves and Schott's Original Miscellany.

The Geometry of Type Stephen Coles, 2016-07-12 The Geometry of Type explores 100 traditional and modern typefaces in detail, with a full spread devoted to each entry. Characters from each typeface are enlarged and annotated to reveal key features, anatomical details, and the finer, often-overlooked elements of type design, which shows how these attributes affect mood and readability. Sidebar information lists the designer and foundry, the year of release and the different weights and styles available, while feature boxes explain the origins and best uses for each typeface, such as whether it is suitable for running text or as a display font for headlines. To help the reader spot each typeface in the wider world, the full character set is shown, and the best letters for identification are highlighted.

The Big Book of Font Combinations Douglas Bonneville, 2019-02 The BBOFC is an expansive collection of carefully crafted typeface pair samples. The font pairings in BBOFC will inspire you and give you back time you need for your design projects. Use the combination examples straight out of the BBOFC in your next project, with other typeface software, or use them as a springboard for your own creativity. However you use the BBOFC, it's bound to inspire and is a trustworthy companion to consult for all kinds of design projects and general study of typography.

The Font Engineering Platform Taeumel, Marcel, Beckmann, Tom, Fister, Lasse, Hildebrand, Justus, Hirschfeld, Robert, Jaschek, Corinna, Krebs, Eva, Löser, Alexander, Pape, Tobias, 2019-11-14 Creating fonts is a complex task that requires expert knowledge in a variety of domains. Often, this knowledge is not held by a single person, but spread across a number of domain experts. A central concept needed for designing fonts is the glyph, an elemental symbol representing a readable character. Required domains include designing glyph shapes, engineering rules to combine glyphs for complex scripts and checking legibility. This process is most often iterative and requires communication in all directions. This report outlines a platform that aims to enhance the means of communication, describes our prototyping process, discusses complex font rendering and editing in a live environment and an approach to generate code based on a user's live-edits. Die Erstellung von Schriften ist eine komplexe Aufgabe, die Expertenwissen aus einer Vielzahl von Bereichen erfordert. Oftmals liegt dieses Wissen nicht bei einer einzigen Person, sondern bei einer Reihe von Fachleuten. Ein zentrales Konzept für die Gestaltung von Schriften ist der Glyph, ein elementares Symbol, das ein einzelnes lesbares Zeichen darstellt. Zu den erforderlichen Domänen gehören das Entwerfen der Glyphenformen, technische Regeln zur Kombination von Glyphen für komplexe Skripte und das Prüfen der Lesbarkeit. Dieser Prozess ist meist iterativ und erfordert ständige Kommunikation zwischen den Experten. Dieser Bericht skizziert eine Plattform, die darauf abzielt, die Kommunikationswege zu verbessern, beschreibt unseren Prototyping-Prozess, diskutiert komplexe Schriftrendering und -bearbeitung in einer Echtzeitumgebung und einen Ansatz zur Generierung von Code basierend auf direkter Manipulation eines Nutzers.

Text-Dependent Questions, Grades K-5 Douglas Fisher, Nancy Frey, Heather Anderson, Marisol Thayre, 2014-09-02 Fisher & Frey's answer to close and critical reading Learn the best ways to use text-dependent questions as scaffolds during close reading and the big understandings they yield. But that's just for starters. Fisher and Frey also include illustrative video, texts and questions, cross-curricular examples, and an online facilitator's guide—making the two volumes of TDQ a potent professional development tool across all of K–12. The genius of TDQ is the way Fisher and Frey break down the process into four cognitive pathways: What does the text say? How does the text work? What does the text mean? What does the text inspire you to do?

Font Technology Peter Karow, 2012-12-06 Computers have changed typography and prepress as well as printing. Typefaces are manufactured by digital punch cutters with a PC, not any more by punch cutters. Typefaces are constructed an output by a new technology, the so-called fonttechnology. The book by Peter Karow covers the whole area of it. It offers various chapters about (among others) issues like intelligent font scaling, kerning, quality of type, legibility, and problems of different output devices. It is interesting to read about Gutenberg setting, the font market, optical scaling, and last but not least a hand on Kanjhi, the Chinese/Japanese Glyphs. Furthermore, Fonttechnology contains a number of valuable and instructive appendices. Almost everything one has to know about type and computers!
