❏ **Apocryphal and Literary Influences on Galway Diasporic History** Gay Lynch,2010-10-12 Apocryphal and literary influences on Galway diasporic history establishes that apocryphal stories, in all their transformations, contribute to collective memory. Common characteristics frame their analysis: irreducible and enduring elements, often embedded in archetypal drama; lack of historical verification; establishment in collective memory; revivals after periods of dormancy; subjection to political and economic manipulation; implicit speculation; and literary transformations. This book contextualises *Unsettled*, an Australian novel about a convict play, derived from the Irish apocryphal story of *The Magistrate of Galway*, and documents previously unpublished primary material, including apocryphal stories passed through generations of descendants of settlers, Martin and Maria Lynch, and *The Hibernian Father*, a play by Irish convict, Edward Geoghegan. It puts forward new hypotheses: that the Irish hero Cuchulain may have provided a template for the archetypal and apocryphal story of the Magistrate of Galway; that disgraced Trinity College medical student and aspiring writer, Edward Geoghegan, enacted and recounted the same father-son archetypal conflict when he was transported to Botany Bay in 1839, and wrote the *The Hibernian Father* based on the Magistrate of Galway; that working-class Irish families were marginalised in south-east South Australian historical records; that oral apocryphal Lynch stories may be true; that Kate Grenville’s *The Secret River* (2006) offers an alternative history of the Hawkesbury River settlement, by some definitions apocryphal. The mystery of Geoghegan’s disappearance is solved, and knowledge about his life increased. French theorist Gerard Genette’s notion, advanced in *Palimpsests: Literature in the Second Degree* (1997), of all novels being transtextual, provides a model for the analysis of relationships between these key apocryphal texts.

❏ **Antarctica as Cultural Critique** E. Glasberg,2012-10-29 Arguing that Antarctica is the most mediated place on earth and thus an ideal location for testing the limits of bio-political management of population and place, this book remaps national and postcolonial methods and offers a new look on a ‘forgotten’ continent now the focus of ecological concern.

❏ **Hidden Voices** Ann Jordan,2006 This book contains a collection of stories of individual human endeavors; people in civil society working towards a culture of peace in diverse ways such as arts, music, storytelling, spirituality, education. They are heart-warming and inspiring accounts of individuals working creatively in the belief that lives can be transformed and that collectively they can make a difference. Their stories express the extraordinariness of ordinary people and show the range of good peace building practice that contributes towards stability in diverse societies. The stories aim to uplift readers’ spirits, to inspire and encourage, and most of all, to rekindle a confidence in our common humanity. The overall message is one of hope.

❏ **The Political Fiction of Ward Just** David Smit,2020-07-15 The Political Fiction of Ward Just: Class, Theories of Representation, and Imagining a Ruling Elite uses three theoretical frameworks of representation—literary, political, and diplomatic—to demonstrate how the upper-class status of the ruling elites in Ward Just’s political fiction influences the way they govern. He illustrates how Just’s ruling elites develop a coherent “upper class” form of consciousness that limits their ability as elected officials to adequately represent the interests of all the nation’s citizens domestically—especially the poor and working class—and their ability as diplomats to adequately represent the interests of the nation as a whole internationally. In his conclusion, the author offers suggestions for ways to make our ruling elites more representative of the interests of the working class and underprivileged groups at home and more sensitive to the cultures of the countries in which they serve abroad.

❏ **Information Security Applications** Taekyoung Kwon,2006-02-10 This book constitutes the refereed proceedings of the 6th International Workshop on Information Security Applications, WISA 2005, held in Jeju Island, Korea, in August 2005. The 29 revised full papers presented were carefully selected during two rounds of reviewing and improvement from 168 submissions. The papers are organized in topical sections on security analysis and attacks, systems security, network security, DRM/software security, efficient HW implementation, side-channel attacks, privacy/anonymity, and efficient implementation.

❏ **Thinking Toward Survival** Coralie Koonce,2010-07 The clock approaches midnight. We humans have created a scary scenario for ourselves with climate change * and other ecosystem failures * population growth and consumption that exceeds Earth’s carrying capacity * out-of-control technologies and pollution * ancient habits of war + doomsday weapons + depleting resources + nationalism What we need is a whole new way of thinking. From protecting our grey matter, to changing 300-year-old paradigms, from self-reliance to trillion-dollar transitions, from how we raise our children to how to tame the corporations, Koonce offers potential solutions such as * change our universities * develop species-consciousness * decentralize * look for creative ideas and models across the world Humanity has what it takes to survive. There’s no need to despair. But there is a burning need to get started on the transformation.

❏ **Recovering History through Fact and Fiction** Dallas John Baker,Donna Lee Brien,Nike Sulway,2018-04-18 This edited collection brings together research that focuses on historic figures who have been largely neglected by history or forgotten over time. The question of how to recover, reclaim or retell the histories and stories of those obscured by the passage of time is one of growing public and scholarly interest. The volume includes chapters on a diverse array of topics, including semi-biographical fiction, digital and visual biographies, autobiographies, and memoirs, among others. Apart from the largely forgotten, the book provides fresh perspectives on historical figures whose biographies are distorted by their fame or limited by public perception. The subjects explored here include, among others, a child author, a Finnish grandmother, a cold war ❏ migr❏ , an Elizabethan era playwright, a castaway, a celebrated female artist, and the lauded personalities Mary Shelley, Judy Garland and J.R.R. Tolkien. Altogether, the chapters included in this collection offer a much-needed snapshot of new research on biography and its many variations and hybrids which will be of interest to academics and students of biography and life writing in general.

❏ **Water-Soil-Plant-Animal Nexus in the Era of Climate Change** Karmaoui, Ahmed,2023-12-18 Water, soil, plants, and animals are the main pillars that support global food security. Plants grow using nutrients from water and soil resources and then used by animals which affects them consequently. Water is the essential condition of life for all living beings, and soil is its support and a crucial reservoir. The interactions between the Water-Soil-Plant-Animal nexus and climate change are of increasing concern to scholars, decision-makers, and researchers. The impacts of climate change on these resources include water and soil quality degradation, infectious disease, shortage, desertification, and erosion. These impacts are accelerated due to human pressure through over-use and pollution. Water-Soil-Plant-Animal Nexus in the Era of Climate Change includes relevant theoretical approaches, empirical research, and bibliometric and bibliographic methods to bring together affordable methods and techniques to optimize the use of the nexus in the context of climate change. It presents an inventory of techniques and practices in the field, and introduces an opportunity to discuss the strengths and weaknesses of these techniques, making it ideal for scholars, researchers, planners, and decision-makers.
