Excel Dashboards & Reports for Dummies Michael Alexander,2015-12-31 Make the most of your data using the power of Excel When you think of data, do you think of endless rows and columns in spreadsheets? Excel Dashboards and Reports For Dummies, 3rd Edition shows you how to make the most of your data—and puts an end to mind-numbing spreadsheets by exploring new ways to conceptualize and present key information. There's often a gap between handling data and synthesizing it into meaningful reports, and this approachable text bridges this gap with quick and accessible information that answers key questions, like how to meaningfully capture data trends, how to show relationships in data, and when it's better to show variances than actual data values. As a leading spreadsheet application, Microsoft Excel is the go-to data software. This tool allows you to use dashboard reports that leverage gauges, maps, charts, sliders, and other visual elements to present complex data in a manner that's easy to understand. Using Excel dashboards effectively can improve your professional capabilities by leaps and bounds. Analyze and report on large amounts of data in a meaningful way Look at data from different perspectives, and better visualize the information you're presenting by quickly slicing data on the fly Automate redundant reporting and analysis functions, making your data analysis and reporting routine more efficient Create visualizations, dashboards, and what-if analyses that are as visually appealing as they are substantial Excel Dashboards and Reports For Dummies, 3rd Edition is a fantastic resource if you're looking to spice up your reporting!

Dashboarding with SAP Crystal Dashboard Design Inc. Report Writing Services, Inc.,2012-11-01 Based on Microsoft Office Excel, SAP Crystal Dashboard (Xcelsius) allows you to convert your existing spreadsheets into exciting visually interactive dashboards. Numbers in Excel are brought to life with dynamic graphs, which allow the user to customize and visualize data in real time. While spreadsheet data is static and needs to be updated from reports using cut-and-paste, dashboards automatically query databases or reports for the most current data. This book by Report Writing Services, designed as a 3 day training course, is written in a way perfect for self-study or an instructor led classroom setting. The student learns by actually building dashboards (not by reading theory) and is exposed to a comprehensive collection of dashboard components and shown a wide range of design concepts and practical spreadsheet programming techniques. Breadth of knowledge is emphasized over repetitious exercises and dashboard standards and best practices are taught throughout the course. The book consists of nine chapters written in an easy to follow step-by-step format. All the instructions are accompanied by detailed color illustrations to help create the dashboards quickly and easily. A new and increasingly challenging dashboard, which introduces and teaches new concepts, is built in each chapter. Student files provided by Information Analytics Institute include a rich set of pre-constructed and mid construction dashboards available to be previewed and examined prior to purchase. These are worked on throughout the course. The chapters are knit together by an entertaining story about Candy Cane Enterprises and how Annie Heartland and Abel Goodman struggle to overcome corporate politics to build dashboards that reveal the truth about the company's finances, sales, production, client relations and human resources. While learning to build dashboards the student is carried on a journey from the skyscrapers of New York to the islands of the South Pacific and the hills of Montana. Complete with cartoon images, intrigue and a little romance, the story provides context and meaning to the tasks the student must perform. Learning was never so entertaining. During the course you will: get acquainted with the program window, menus and toolbars discover the variety of components you can choose from to create dashboards learn how to use properties and settings of different objects study how to link objects to spreadsheet data find out how to set up connections between objects and make them influence each other learn to organize objects on the canvas by aligning and grouping them see how to organize data in the spreadsheet by distributing it among different sheets and tables write different Excel formulas to get the data you need learn many facets of effective dashboard design apply standards and best practices and study them with the online Standards & Best Practices reference guide and tools Includes: course book dashboards & student files (available from Information Analytics Institute to be previewed and examined prior to purchase)
