Altitude Oliver Bocquet, Jean-Marc Rochette, 2020 At sixteen, bivouacked on a mountainside beneath a sky filled with stars, Jean-Marc Rochette has already begun measuring himself against some of Europe's highest peaks. The Aiguille Dibona, the Coup de Saber, La Meije: the summits of the Massif des Ecrins, to which he escapes as a teenager, spark both exhilaration and fear. At times, they are a playground for adventure. At others, they are a battlefield. The young climber is acutely aware that death lurks in the frozen corridors of the French Alps. In 'Altitude', Jean-Marc Rochette tells the story of his formative years, as a climber and as an artist. Part coming-of-age story, part love letter to the Alps, this autobiographical graphic novel captures the thrill and the terror invoked by high mountains, and considers one man's obsession with getting to the top of them

Altitude Training and Athletic Performance Randall L. Wilber, 2004 Addresses the physiology of altitude training, limitations to competing and training at altitude, and a variety of other topics related to the effect of altitude training on athletic performance.

High-altitude Medicine and Pathology Donald Heath, David Reid Williams, 1995 This is a beautifully written and illustrated account of the problems of coping with exposure to high altitude. The features of acclimatization in humans are examined, with chapters devoted to the effects of high altitude on the cardiopulmonary and digestive systems, sleep, fertility and pregnancy, infection and allergy, athletic performance, and cerebral function. There are also detailed descriptions of the various high-altitude diseases. As well as being of obvious practical significance to those clinicians accompanying or responsible for climbers, tourists, soldiers, athletes, and astronomers at high altitude, this completely revised fourth edition has a broad scientific appeal, with up-to-date information on hyperbaric treatment of acute mountain sickness, the new syndromes of subacute mountain sickness in Tibet and India, and cancer in the Andes.

Physiological and Pathological Responses to Hypoxia and High Altitude Rodrigo Iturriaga, Rodrigo Del Rio, Jean-Paul R-Richalet, 2020-06-22 The appearance of photosynthetic organisms about 3 billion years ago increased the partial pressure of oxygen (PO₂) in the atmosphere and enabled the evolution of organisms that use glucose and oxygen to produce ATP by oxidative phosphorylation. Hypoxia is commonly defined as the reduced availability of oxygen in the tissues produced by different causes, which include reduction of atmospheric PO₂ as in high altitude, and secondary to pathological conditions such as sleep breathing and pulmonary disorders, anemia, and cardiovascular alterations leading to inadequate transport, delivery, and exchange of oxygen between capillaries and cells. Nowadays, it has been shown that hypoxia plays an important role in the genesis of several human pathologies including cardiovascular, renal, myocardial and cerebral diseases in fetal, young and adult life. Several mechanisms have evolved to maintain oxygen homeostasis. Certainly, all cells respond and adapt to hypoxia, but only a few of them can detect hypoxia and initiate a cascade of signals intended to produce a functional systemic response. In mammals, oxygen detection mechanisms have been extensively studied in erythropoietin-producing cells, chromaffin cells, bulbar and cortical neurons, pulmonary neuroepithelial cells, smooth muscle cells of pulmonary arteries, and chemoreceptor cells. While the precise mechanism underpinning oxygen sensing is not completely known several molecular entities have been proposed as possible oxygen sensors (i.e. Hem proteins, ion channels, NADPH oxidase, mitochondrial cytochrome oxidase). Remarkably, cellular adaptation to hypoxia is mediated by the master oxygen-sensitive transcription factor, hypoxia-inducible factor-1, which can induce up-regulation of different genes to cope the cellular effects related to a decrease in oxygen levels. Short-term responses to hypoxia included mainly chemoreceptor-mediated reflex ventilatory and hemodynamic adaptations to manage the low oxygen concentration while more prolonged exposures to hypoxia can elicit more sustained physiological responses including switch from aerobic to anaerobic metabolism, vascularization, and enhancement of blood O₂ carrying capacity. The focus of this research topic is to provide an up-to-date vision on the current knowledge on oxygen sensing mechanism, physiological responses to acute or chronic hypoxia and cellular/tissue/organ adaptations to hypoxic environment.

Addicted to Altitude Mark Hampton, 2011-03-16 ADDICTED TO ALTITUDE A generation ago Jack O'Connor, "dean of outdoor writers," taught us that mountain hunting was a special pursuit, a form of hunting that took us to the high, wild places in search of some of the world's most beautiful and elusive game. Today Mark Hampton follows his teaching and takes us to new heights in pursuit of wild sheep and goats amidst the world's highest mountains and most magnificent scenery. You will travel with him to the world's legendary ranges: Hindu Kush, Himalayas, Caucasus, Alps, Tien Shan, Altai, and more...from the burning Red Sea Hills of Sudan to the precipitous Southern Alps of New Zealand...and of course to our own Rocky Mountains, Cassiars, Alaska Range, and the harsh desert mountains of the American Southwest. Mark Hampton, career educator, former Missouri State Representative, All-American trapshooter, longtime hunting guide, and legendary handgun hunter, takes you along on what evolved as his greatest passion: High-country hunting for the wild sheep and goats of the world. From the diminutive chamois to the mighty argali, from desert bighorn to Rocky Mountain goat, you will feel your lungs burn as you climb the high ridges and feel your heart race as you make the final stalk. Addicted to Altitude will earn its place in the annals of hunting literature...and will validate for a new generation the special feeling of climbing the heights for the great game to be found.

Problems of High Altitude Medicine and Biology Almaz Aldashev, Robert Naeije, 2007-10-04 Hypoxia is and remains a major public health issue in many populated mountainous areas all over the world. This book is directly derived from a NATO-sponsored international meeting on problems of high altitude medicine and biology, which was held on the shores of lake Issyk-Kul, in Kyrgyzstan, in 2006. Overall, the meeting was an ideal mix of cell biology, integrative physiology and medical applications.

Unsafe at Any Altitude Richard Francis Schaden, 2021-08-31 Travel with Richard Francis Schaden on his crusade to make air travel safer. The journey will take you from his early days as a naïve young engineer at Boeing, to his training by fire as a novice attorney representing criminal defendants in the Detroit riots, before he even had a chance to take the bar exam, and through his decades long career representing air crash victims and their families. Richard's tenure at Boeing was short, after he discovered that economics and marketing played a greater role in airplane design than he could as an engineer for the company. Richard describes how the fox often watches the hen house when it comes to aircraft certification and accident reports, with the airplane manufacturers and airlines playing an integral and conflicted role as the partner of the FAA and NTSB. Richard would come to discover that he could do more effective aviation engineering in the courtroom, then he could do within the engineering departments of major aviation manufacturers. This book takes you through Richard's entertaining engineering and legal career in his decades long effort to force the aviation industry to make air travel safer.

Altitude Adjustment Mary Beth Baptiste, 2014-05-06 Aware that her youth is slipping by, Mary Beth Baptiste decides to escape her lackluster, suburban life in coastal Massachusetts to pursue her lifelong dream of being a Rocky Mountain woodswoman. To the horror of her traditional, ethnic family, she divorces her husband of fifteen years, dusts off her wildlife biology degree, and flees to Moose, Wyoming for a job at Grand Teton National Park. In these rugged mountains, unexpected lessons from nature and wildlife guide her journey as she creates a new life for herself. Set against the dramatic backdrop and quirky culture of Jackson Hole, this beautifully written memoir is a thoughtful, often humorous account of a woman's bumbling quest for purpose, redemption, and love through wilderness adventure, solitude, and offbeat human connections.

Fatal Mountaineer Robert Roper, 2007-04-01 Willi Unsoeld became an international hero during the Kennedy years, when he emerged as probably the greatest American climber of the Himalayan golden age. Displaying the sort of vigor that President Kennedy so admired, Unsoeld became the most visible hero of an ascent of Everest's previously-unclimbed West Ridge -- an ascent that cost him parts of both feet and nearly his life. His casual fearlessness and physical power established the template for extreme adventure, and his lectures as a charismatic professor inspired the generation of the sixties to test itself in acts of physical daring. *Fatal Mountaineer* sets Willi Unsoeld's intense life against the story of two defining adventures: the triumph on Everest and a more ill-starred expedition in 1976, when he led a group of mountaineers up a new route on Nanda Devi, the tallest peak in India. One of that gifted group of climbers was Willi's daughter, Devi -- a golden girl named for the mountain she sought to ascend with her beloved father. The intense rivalries within the expedition team, and the dangers of the route, led to an outcome darkened by tragedy, an outcome that continues to fuel one of the most tormenting debates in mountaineering history. Blending adventure with a frank look at the cultural background, *Fatal Mountaineer* considers the pressures on mountaineers in a period of our history torn by conflict. It balances hunger for fame with stark tragedy, a man's ambition with a father's love. Unsoeld emerges as an American classic, a self-invented genius of adventure to rank with Mark Twain or Will Rogers for sheer attractiveness. Under the close scrutiny of this thrilling story, his heroism turns out to be deeply authentic-as does his suffering.
