Bruno Trask and the Dark Lady's Jewels Michael Pryor,2012-01-01 In the fantastical world of Michael Pryor's new novel, humans live alongside elves, dwarves, werewolves and ogres. Bruno Trask is a human boy with a very boring job: he has to parade around the local shopping mall dressed as Roger, the Smiley Dragon. One day at the mall a fabulous collection of enchanted jewellery is on display. It is presided over by the Dark Lady, the most famous, rich and influential Dark Elf in the world. Just as she's unveiling the main attraction—an old family heirloom called the Black Star—Bruno accidentally knocks it out of her hand in a spectacular collision. It soars high into the air and Bruno, again accidentally, puts out his hand and catches it. In a flash of light, the Black Star merges with his hand and becomes embedded in the middle of his palm. Suddenly, Bruno is the centre of attention. The Dark Lady wants her Black Star back and she'll do anything to get it. With two of her bodyguard ogres after him, Bruno very quickly finds himself on the run. Will Bruno stay out of the Dark Lady's clutches? And what is the secret behind the Black Star?

CyberWisdom John Bajak,2011-03-28 Cyber Wisdom is philosophy of computing. All it takes, says its thesis, is to be satisfied. But how that satisfaction is accomplished is difficult. That is why, when the computer is the mind amplifier, the resonance of the satisfaction builds greatest when only a little time is given. Cyber Wisdom is computer satisfaction to the user without any physical specific machine to run with. Its philosophy is like a medicine upon withdrawal from physical use of computing machines. That medicine will come to be satisfaction, wellness, and resonance, inside the intense emotional need to know the wisdom of the machine. But enough of what Cyber Wisdom “is”. Just, what is it all about? People pay a lot of money for cups which come with water as part of the deal. But to get more water people have to buy a whole other cup to get the water more. Cups get bigger, nicer, better, and they come with water. But they drink it; then they have to buy a whole other cup, to get water again. People are thirsty but they have to buy the cup to get the water inside. But all of a sudden there is a well. No matter how cheap or expensive the cup, water is cheap and plentiful. This is bad for they who make cups. People don't need to buy the latest and greatest. But it is very good business for they who tend the well - telling the cup-owners you don't need the bigger and better cup; it is the water you want, anyway. The water itself is free; it has always been free; just now it is available to all. This just means that for most people, the idea of the computer looms larger than knowing the computer itself. That computers became popular not because people were told the wisdom of the machine; they saw themselves in the image of the machine. People's minds would profit from the mind amplification that computers did. The power of the computer priests kept the love of the amplified mind together in computing systems; witness IBM. And the coordination where each cup carrying more and more water is communicated to more and more people happened; witness Steve Jobs, or Bill Gates, building successful cups. But people still wanted water; there was Google, and the internet. So now people are wanting meaning in their lives; Facebook is the current thought, and Twitter searches for the now. But philosophy of computing watches at what is permanent in the computing game. What is it about mind amplification that is real and fascinating and keeps us permanently at the keyboard of life. People are beginning to realize that loudness is not the only thing to listen to. That water, though frozen, will contain itself; there is that cup. Although cups are necessary, it is not necessary for time to run so quick, for healing, resonance, recovery, from all the interruptions that pass through life. Water is the randomness that the mind needs to have to function and flourish well. Randomness is as essential to the mind as reality is necessary to the body. Don't be too loud you can't listen! The water is the blood, and the spirit, that witnesses. Where what the computer is, it is the reflection of what it hears. And each person makes the choice themselves, often from what the person knows, to the path before them. Cyber Wisdom will help a great deal for each person to make the wise choice, on how to deal with computers, in their lives. Complexity is where you find it. It is not too late to change, and it is not too late, to stay the same.

The Case of the Missing Crown Jewels Robert Martin,2017-12-02 The special bond between Keira and Papa shines as they join together to solve their first crime -- The Case of the Missing Crown Jewels. Keira is an 8-year old with red hair, hot pink glasses, and dresses like Pippi Longstockings. She is not as confident as her fashion statement suggests. Her dreams of being a heroine are overshadowed by a cloud of fear that percolates within her extraordinary imagination. Her grandfather, Papa, is just the opposite. His dress is conservative, and before he retired he thrived on adventure. He was a spy. When Keira finds a magic hat that gives her astonishing powers, he invites her to join him in his new spy agency. That is when the Keira and Papa Detective Agency is formed. The trust, teasing and mutual affection they have for each other carries them through a stream of disappointments and challenges as they attempt to solve the mystery. For Keira, the adventure is more than just this case. For her, there are two mysteries: The Case of the Missing Crown Jewels, and the mystery of a new culture. Her dialogue with Sir Hazledine, the Secretary to the Queen, provides insight and humor to the latter. Keira has two allies. Her American Doll, Emma and her mischievous dog, Waffles. Implanted in Emma are various crime-detecting devices that Keira invented. Waffles, who constantly goes from one mishap to the next, has a good nose for crime. Each member of The Keira and Papa Detective Agency has their own unique crime-fighting skills, just the right combination to solve a case with no clues. To the surprise of Scotland Yard, the Director of Security and the Governor of the Tower of London they find the Crown Jewels, the case is solved. But is it? The theft of the Crown Jewels is tied to a kidnapping. This is unexpected. Time is running out. Did they discover this too late? The Keira and Papa Detective Agency, save the day with only minutes to spare. The Queen of England holds a reception in their honor and Keira is awarded The Royal Victorian Order, making her the youngest Dame in the history of England.

Deadly Jewels Jeannette de Beauvoir,2016-03-08 When Martine LeDuc, the dedicated publicity director for the city of Montreal, is summoned into the mayor's office, she immediately runs through all the things that could have gone wrong in the press that day, but for once she's pleasantly surprised. The mayor has good news: the city is due for a PR coup. A doctoral researcher at McGill University has been part of some excavations under the city and has found positive proof that the British crown jewels were indeed, as the rumor goes, stored in Montreal underground during WWII, and then subsequently returned to London. Martine is thrilled to be part of the excavation project, until it turns out that one of the dig's discoveries includes the remains of a man who has two small jewels resting where his stomach once was, and a bullet hole in the back of his skull. With a scandal of this magnitude Martine knows it's only a matter of time before the news gets out in a way that won't boost good PR for Montreal or her job. She decides to team up with an academic friend to figure out what happened with this decades-old theft, before the world finds out that two of London's prize jewels are fake, and before the nefarious circumstances that got them there get to Martine first and silence her for good--
