The Animate! Book Benjamin Cook,Gary Thomas,2006 The Animate! Book explores the relationship between art and animation through the animate! project, now in its fifteenth year. Animate! has supported groundbreaking animation, and this volume addresses new technologies and practices and includes interviews with six contemporary animators and a DVD of key works.

Tradigital Animate CC Stephen Brooks,2016-11-03 Learn how to bridge the gap between the traditional animation principles and digital software. Tradigital Flash: 12 Principles of Animation in Adobe Flash brings the essentials of traditional animation and Adobe Flash together. The early masters of animationcreated a list of 12 principles which are important for anyone who wants to create interesting and believable animation. Digital animation continues to make incredible technological advancements that give animators the capability to produce visually stunning work. New technology, however, also has a tendency to create an environment where animators are so focused on adapting to the new workflow that they tend to dismiss these fundamental animation principles... which often leads to poor and lifeless character animation. Tradigital Flash helps you focus on these principles while using the program's wide array of features to create believable animation, consistently. Tradigital Flash joins three other Tradigital books covering Maya, Blender, and 3ds Max. This new volume in the series approaches the topic in a different way, giving readers both a practical look at the software, and providing a theoretical understanding of the genre. ? Learn a new principle in each chapter, the Flash tools most related to it and how to put it all together. A plethora of examples demonstrate the good methods which

animators should use in Flash, how to avoid the bad ones and ways to create a workflow that works for you. An easy-to-follow approach with examples throughout the book that build on each other, showing how the principles act together. A companion website www.rubberonion.com/tradigital-animate features more examples, downloadable FLA resource files, video tutorials.

Drive Daniel H. Pink,2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect

of life. He examines the three elements of true motivation—autonomy, mastery, and purpose-and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Animating Culture Eric Loren Smoodin,1993 Long considered children's entertainment by audiences and popular media, Hollywood animation has received little serious attention. Eric Smoodin's Animating Culture is the first and only book to thoroughly analyze the animated short film. Usually running about seven or eight minutes, cartoons were made by major Hollywood studios--such as MGM, Warner Bros., and Disney--and shown at movie theaters along with a newsreel and a feature-length film. Smoodin explores animated shorta and the system that mass-produced them. How were cartoons exhibited in theaters? How did they tell their stories? Who did they tell them to? What did they say about race, class, and gender? How were cartoons related to the feature films they accompanied on the evening's bill of fare? What were the social functions of cartoon stars like Donald Duck and Minnie Mouse? Smoodin argues that cartoons appealed to a wide audience--not just children--and did indeed contribute to public debate about political matters. He examines issues often ignored in discussions of animated film--issues such as social control in the U.S. army's Private Snafu cartoons, and sexuality and race in the sites of Betty Boop's body and the cartoon harem. Smoodin's analysis of the multiple discourses embedded in a variety of cartoons reveals the complex and sometimes contradictory ways that animation dealt with

class relations, labor, imperialism, and censorship. His discussion of Disney and the Disney Studio's close ties with the U.S. government forces us to rethink the place of the cartoon in political and cultural life. Smoodin reveals the complex relationship between cartoons and the Hollywood studio system, and between cartoons and their audiences.
