Cases in Marketing Management Kenneth E. Clow, Donald Baack, 2011-03-28 This comprehensive collection of 38 cases selected from Ivey Publishing helps students understand the complex issues that marketing professionals deal with on a regular basis. The cases were chosen to help students apply conceptual, strategic thinking to issues in marketing management, as well as provide them with more practical operational ideas and methods. Cases were chosen from around the world, from small and large corporations, and include household names such as Twitter, Best Buy, Ruth's Chris, and Kraft Foods. The majority of the cases are very recent (from 2009 or later). Each chapter begins with an introductory review of the topic area prior to the set of cases, and questions are included after each case to help students to think critically about the material. Cases in Marketing Management is edited by Kenneth E. Clow and Donald Baack, and follows the structure and goals of their textbook Marketing Management: A Customer-Oriented Approach. It can also be used as a stand-alone text, or as a supplement to any other marketing management textbook, for instructors who want to more clearly connect theory and practice to actual cases.

Emerging Water Insecurity in India Ranjit Singh Ghuman, Rajeev Sharma, 2019-01-17 This book investigates water development in India with a special focus on its most agriculturally advanced state, Punjab, as well as the global water scenario on a more general level. It explores and highlights the use and abuse of water, especially sub-soil water, in the agricultural, industrial and domestic

sectors. It also reveals the classic case of the virtual exportation of underground water from Punjab to the rest of India. In addition to analysing the fast depleting water table and emerging water insecurity, the study critically examines water governance and policy intervention. The book provides a number of important lessons for all those regions and countries that are encountering the twin issues of food and water scarcity and are grappling with the problem of sustainable development. This insightful text will be of much interest to students and researchers in the water sector and the field of sustainable development, as well as farmers, social scientists, policy makers, agricultural experts, environmentalists, and all those concerned with emerging water insecurity in the world.

The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.
