exactphilosophy.net 2019 Alain Stalder, 2019-05-21

This book presents the website exactphilosophy.net in 2019. Written by a Swiss physicist, it contains lots of beautiful novel ideas, inspired by nature and physics, ancient and modern philosophy, as well as by astrology, the I Ching and more... For the first time, this book compiles all web pages and articles in a single printed volume. A real treasure trove for anyone with a mind free enough to think outside the tesseract, about philosophy, science, history, art, and a lot more. Most contributions are related to a new approach to elements, tentatively defined from first principles related to space and time in immediate perception, inspired by Kant, but often going way beyond ancient Greek elements or the trigrams of the Chinese I Ching, considering also how astrology or telepathy could work in ways that would be astonishingly simple everyday physics, even though they would still be illusions in a way. And there is more.
