A History of Western Astrology S. Jim Tester, 1987 The story of the history of Western astrology begins with the philosophers of Greece in the 5th century BC. the Greeks added numerology, geometry and rational thought. The philosophy of Plato and later of the Stoics made astrology respectable, and by the time Ptolemy wrote his textbook the Tetrabiblos, in the second century AD, the main lines of astrological practice as it is known today had already been laid down. In future centuries astrology shifted to Islam only to return to the West in medieval times where it flourished until the shift of ideas during the Renaissance.

The Facts on Astrology John Ankerberg, John Weldon, 2011-05-03 What the Bible science & common sense tell us about astrology. Astrology's influence is felt throughout government industry the sciences education the church & the home. What exactly is astrology? Do the heavens really influence life on earth? What are the dangers of astrology? How much does astrology actually influence Washington? What does the Bible have to say about astrology? This book thoroughly examines the claims of astrology assesses its occult aspects & emphasizes the personal consequences of its use.

Fundamentals of Astrology M. Ramakrishna Bhat, 1988 Astrology is both Science and Art. Hence only the talented can appreciate and understand it. Rightly Visnugupta declares that nobody other than a sage can master the ocean-like science of astrology. The great Varahamihira declares, No sin will creep into a place that is sanctified by the presence of a true astrologer. No person who studies and divines the course of destiny will ever be found in hell, but will reside permanently in the world of Brahman. This book brings to the fore not only the rationality of astrology but also the nature and structure of the correct knowledge that our forefathers possessed regarding the predictable influences of planets on human beings, and gives a spiritual bias to astrology. The reader is taken step by step in this work from the rudiments Viz., the distribution of constellations in the Zodiacal belt which is divided into twelve Signs, and the planetary hierarchy, through the method of calculating the ascendant and other houses of a natal chart, assessment of the strengths, influences, aspects, affliction, mutual relations etc., of the planets, to the final stage of reading the brighter and darker sides of the subject's life, his chances of success and failure, their periods, ingress of the soul into the mortal coil and exit therefrom as well as its departure to other worlds according to its karma. In this book an attempt has been made to give a good account of the science of astrology, with a view to making the reader a good and true astrologer. It also shows that astrology does not make man a fatalist, a helpless automation in the hands of a merciless Fate. It should, on the other hand, help him to take to self-exertion and self-help. This hoary lore, according to the author, is to be practised not for selfish ends, but to guide the needy and the distressed, to remove the cause of their suffering and to turn their attention towards God. Astrology and Sex Vivian E. Robson,2005-03 Synastry is the branch of astrology that tells us how we relate to other people. How Joe relates to Mary & what Mary may think of that. In this complete, classic guide to astrology & relationships, Robson goes far beyond the usual his planets vs: her planets. He studies the overall weight of the two charts, the fertility of the inner planets, the condition of the 7th house. He compares her-planets-to- his-planets as well as his-houses-to-her-houses. Robson considers how strongly the individual wants relationships - and how many, whether he/she will marry early or late - or not at all, the likelihood of children, the possibility of divorce. He gives rules for wedding dates. In an extraordinary appendix, he lists some 266 classified rules & aphorisms, culled from many ancient sources. This is perhaps the finest book ever written on astrology & relationships. About the author: Vivian Erwood Robson lived from 1890 to 1942. By trade he was a librarian. Like many librarians he had a natural bent for research, and, in his particular case, astrology. He studied ancient astrologers closely, including Ptolemy & William Lilly. His books on electional astrology, fixed stars, and relationships, are 20th century classics.

Book of Instructions in the Elements of the Art of Astrology Al Biruni,2006 Al Biruni, one of the greatest Arab scholars, was born on September 4, 973, in what is now Uzbekistan. He showed talent at an early age and by his early 20's had written several acclaimed papers. Political unrest in his 20's and 30's found him at one point at Gurgan, on the shores of the Caspian Sea. Peace found him in Ghaznah, which is today in Afghanistan. From 1017 to 1030 he travelled extensively in India,

becoming fluent in Sanskrit. From this he wrote his monumental survey, *India, of the history, customs and beliefs of the subcontinent*. His other books include *The Chronology of Ancient Nations*, the *Masudic Cannon*, *Book of Instructions*, and more than 100 others, some of which are lost. He died on December 13, 1048, aged 75. He is buried in Ghaznah. The *Book of Instruction in the Elements of the Art of Astrology* was written for Lady Rayhanah, to whom it is dedicated. R. Ramsay Wright, the translator, said it could be regarded as a primer of 11th century science. Among its highlights are a comprehensive list of more than 150 Lots, various forms of aspects and planetary relationships, planetary positions relative to the sun, an excellent text on rulerships as well as comprehensive notes on weather and meteorological phenomena. This book was unknown to medieval European astrologers. This edition, comprising the astrological part of the original (sections 347-530) has been taken from Wright's pioneering 1934 translation, itself taken from Persian and Arabic sources. For this edition, text and tables have been reset, and a new index added.

Gods and Planets Eleanor Barz, 1993-08-01 What happens when Mars and Venus are in love? How does Jupiter defend himself against Saturn, his difficult father? To whom does Mercury hurry with his cap of invisibility and his winged shoes? Drawing on the psychology of C. G. Jung, Ellynor Barz looks into the foundations of astrology by recounting the myths of the planetary gods. Engaging and amusing her presentation also offers new and surprising insights for both psychology and astrology. When we understand the peculiarities and characteristics of the ancient gods symbolically as possibilities in our own human psyches - projected in astrology onto the big screen of the night sky - we discover a realm of ancient human wisdom that may exceed in subtlety most psychological models explaining the human psyche. Drawing on and actualizing the many unique possibilities inherent within - as described by the horoscope - is a life-long task. All persons have the same fundamental capabilities for experience which we rediscover in these astrological symbols. But the interplay of these essential forces arises in each individual in an entirely unique manner, corresponding to the natal horoscope. This book addresses first the astrological layperson. But it also suggests a point of view seldom considered by the astrologer. And for the interested psychologist, a domain of knowledge and experience is revealed a wealth of material that is more deeply related to psychology than one might expect.
