Sustainable Water Services Richard M. Ashley,D. Blackwood,P. Jowitt,2004-06-30 Sustainable Water Services: A Procedural Guide is the result of the Sustainable Water industry Asset Resource Decisions (SWARD) project, undertaken by a consortium of UK academics in collaboration with water service providers in Scotland, England and Romania. It has been developed to act as a practical tool to assist with the explicit inclusion of 'sustainability' in the decision-making processes of those responsible for providing water services. The book contains a framework that comprises a set of decision support processes that can be used by water service providers to explicitly incorporate sustainability considerations into their decision-making procedures, through the use of sustainability principles, criteria, indicators and processes. These principles and criteria can be applied at an overall corporate strategic level, for example in the service provider's mission statement, or at an application level, where these strategic principles are being applied to a particular decision. Sustainable Water Services is designed to inform and to provide support for strategic activity, both as a resource containing information about sustainability, and by employing feedback from application to inform the strategic processes of the water service provider. Presents an inclusive and generic set of sustainability criteria for use in water industry decision making processes; Discusses the legislative drivers for sustainable decision making for the UK water industry; Presents clear case study examples of the sustainability framework in action; Discusses the use and applicability of a wide range of tools and techniques for undertaking environmental, economic and social analyses, e.g. life cycle assessment, multi-criteria analysis.

Word-Formation in the World's Languages Pavol Štekauer,Salvador Valera,Livia Kórtvélyessy,2012-04-23 A pioneering book establishing the foundations for research into word-formation typology and tendencies. It fills a gap in cross-linguistic research by being the first systematic survey of the word-formation of the world's languages. Drawing on over 1500 examples from fifty-five languages, it provides a wider global representation than any other volume. This data, from twenty-eight language families and forty-five language genera, reveals associations between word-formation processes in genetically and geographically distinct languages. Data presentation from two complementary perspectives, semasiological and onomasiological, shows both the basic functions of individual word-formation processes and the ways of expressing selected cognitive categories. Language data was gathered by way of detailed questionnaires completed by over eighty leading experts on the languages discussed. The book is aimed at academic researchers and graduate students in language typology, linguistic fieldwork and morphology.

Eurocode 2 Design Data for Reinforced Concrete Columns Kar Chun Tan,2019-03-27 This book was written to facilitate column sizing and reinforcement design for structural engineers. It arranges the design data in a clearly structured manner, and provides quick and easy ways for engineers to compare the feasibility of multiple alternatives (various column sizes and reinforcement configurations). With the help of this book, engineers can rapidly produce outputs for architects, which the latter can incorporate into their architectural layout plans. These outputs can also benefit quantity surveyors, especially for costing purposes, and help avoid careless design errors. The book is chiefly intended for structural engineers who implement Eurocode 2 for reinforced concrete design. To gain the most from it, readers should possess a basic understanding of column design, e.g. the stresses and forces produced in columns and their reinforcements when subjected to axial load and bending moment. However, the book also provides explanatory notes for the design data tables, allowing them to be used without prior background knowledge.
