The World and Other Places Jeanette Winterson,2013-04-26 In this, her first collection of short stories, Winterson reveals all the facets of her extraordinary imagination. In prose that is full of imagery and word-play, she creates physical and psychological worlds that are at once familiar and yet shockingly strange.

Florentine Public Finances in the Early Renaissance, 1400-1433 Anthony Molho,1971 In his application of statistical methods to history, Mr. Molho offers a new approach to the study of Florentine politics. Scholars have long recognized that Florence's deficit-financing of its wars of independence against the Visconti of Milan had far-reaching economic, political, and social effects, but this is the first document-based history to provide concrete support for that general knowledge. Focusing on the governmental and fiscal agencies of Florence as well as a number of memoirs and account books written by Florentine citizens, Mr. Molho has gathered and statistically reconstructed much archival material on Florentine taxation, public income, and expenses. He concludes that between 1423 and 1433 Florence underwent a prolonged and vast fiscal crisis that affected both the fiscal structure of the city and its constitutional and institutional framework. His work thus sheds new light on Cosimo de' Medici's rise to power in 1434.

Mapping Desire David Bell,Gill Valentine,1995 This is the first book to explore sexualities from a geographical perspective. The nature of place and notions of space are of increasing centrality to cultural and social theory. Mapping Desire presents the rich and diverse world of contemporary sexuality, exploring how the heterosexual body has been appropriated and resisted on the individual, community and city scales. The geographies presented here range across Europe, America, Australasia, Africa, the Pacific and the imaginary, cutting across city and country and analysing the positions of gay men, lesbians, bisexuals and heterosexuals. The contributors ring different interests and approaches to bear on theoretical and empirical material from a wide range of sources. The book is divided into four sections: cartographies/identities; sexualised spaces: global/local; sexualised spaces: local/global; sites of resistance. Each section is separately introduced. Beyond the bibliography, an annotated guide to further reading is also provided to help the reader map their own way through the literature.

The Royal Stickers Eileen Rudisill Miller,2019-03-08 More than two dozen colorful stickers feature renderings of the elegant William and Kate, Duke and Duchess of Cambridge, as well as dashing Harry and Meghan, Duke and Duchess of Sussex. The realistic images show the couples in their famously fashionable outfits, along with many royal accessories.

In the Realm of Pleasure Gaylyn Studlar,1992 In a major revision of feminist-psychoanalytic theories of film pleasure and sexual difference, Studlar's close textual analysis of the six Paramount films directed by Josef von Sternberg and starring Marlene Dietrich probes the source of their

visual and psychological complexity. Borrowing from Gilles Deleuze's psychoanalytic-literary approach, Studlar shows how masochism extends beyond the clinical realm, into the arena of artistic form, language, and production of pleasure. The author's examination of the von Sternberg/Dietrich collaborations shows how these films, with the mother figure embodied in the alluring yet androgynous Dietrich, offer a key for understanding film's masochistic aesthetic. Studlar argues that masochism's broader significance to film study lies in the similarities between the structures of perversion and those of the cinematic apparatus, as a dream screen reviving archaic visual pleasures for both male and female spectators.

When Brains Dream Antonio Zadra,Robert Stickgold,2022-02-15 A truly comprehensive, scientifically rigorous and utterly fascinating account of when, how, and why we dream. Put simply, *When Brains Dream* is the essential guide to dreaming. —Matthew Walker, author of *Why We Sleep* Questions on the origins and meaning of dreams are as old as humankind, and as confounding and exciting today as when nineteenth-century scientists first attempted to unravel them. Why do we dream? Do dreams hold psychological meaning or are they merely the reflection of random brain activity? What purpose do dreams serve? *When Brains Dream* addresses these core questions about dreams while illuminating the most up-to-date science in the field. Written by two world-renowned sleep and dream researchers, it debunks common myths that we only dream in REM sleep, for example—while acknowledging the mysteries that persist around both the science and experience of dreaming. Antonio Zadra and Robert Stickgold bring together state-of-the-art neuroscientific ideas and findings to propose a new and innovative model of dream function called NEXTUP—Network Exploration to Understand Possibilities. By detailing this model's workings, they help readers understand key features of several types of dreams, from prophetic dreams to nightmares and lucid dreams. *When Brains Dream* reveals recent discoveries about the sleeping brain and the many ways in which dreams are psychologically, and neurologically, meaningful experiences; explores a host of dream-related disorders; and explains how dreams can facilitate creativity and be a source of personal insight. Making an eloquent and engaging case for why the human brain needs to dream, *When Brains Dream* offers compelling answers to age-old questions about the mysteries of sleep.
