The Moral Economy of Mobile Phones Robert J. Foster, Heather A. Horst, 2018-05-08 The moral economy of mobile phones implies a field of shifting relations among consumers, companies and state actors, all of whom have their own ideas about what is good, fair and just. These ideas inform the ways in which, for example, consumers acquire and use mobile phones; companies promote and sell voice, SMS and data subscriptions; and state actors regulate both everyday use of mobile phones and market activity around mobile phones. Ambivalence and disagreement about who owes what to whom is thus an integral feature of the moral economy of mobile phones. This volume identifies and evaluates the stakes at play in the moral economy of mobile phones. The six main chapters consider ethnographic cases from Papua New Guinea, Fiji and Vanuatu. The volume also includes a brief introduction with background information on the recent 'digital revolution' in these countries and two closing commentaries that reflect on the significance of the chapters for our understanding of global capitalism and the contemporary Pacific.

Retail Management Prabhu TL,2019-04-21 Retail Management is the process which helps the customers to procure the desired merchandise from the retail stores for their personal use. It includes all the steps required to bring the customers into the store and fulfill their buying needs. Retail management saves time and ensures the customers easily locate their desired merchandise and return home satisfied. Fashion Retail Management gives insight into the principles of fashion marketing, retail buying and merchandising and imparts basic fabric knowledge - from fiber to fabric and fabric to garment. It gives an overview of the concept of visual merchandising and lays emphasis on customer relationship management, brand management and sales management. The various processes which help the customers to procure the desired merchandise from the retail stores for

their end use refer to retail management. Retail management includes all the steps required to bring the customers into the store and fulfill their buying needs. Retail management makes shopping a pleasurable experience and ensures the customers leave the store with a smile. In simpler words, retail management helps customers shop without any difficulty. Retailing in any field tends to be an incredibly competitive process and customer-facing stores are perhaps one of the tougher forms of business to manage. There is a lot that can potentially emerge to trip up even the most experienced and diligent of retail business operators but with the right approach, there's also a huge amount that can be achieved. Here are 5 focus points that might be helpful if you're looking to improve the way you run your retail business and exceed your customer's expectations.

Understand and Respond to What Your Customers Want Like a lot of tips, our first one here is rather more easily said than done but that, in a sense, is precisely the point. Retailers need to do whatever it takes to get to know their customers and to react to what they find out quickly. You might be able to tick over by offering the same products in the same way as a matter of routine but lasting success can generally only be built on flexibility and a willingness to change along with habits among your customers.

Get to Know Your Competition Like every other business around, retailers do not exist in a vacuum and it is vital for all manner of reasons that company bosses are aware of what their rivals are offering. These days, retail competitors can come in many different forms, be it online or otherwise, and bosses should frequently take the time to get a sense of the experiences being offered elsewhere. Whether or not you decide to integrate certain ideas into your own operation, competitor research is essential because it lets you know exactly what you're up against and that information can prove to be invaluable.

Invest in Your People The members of a retailer's workforce are the face of the business on a day-to-day basis and the way that they interact with customers is very important. Hiring the right people to join your team

is a key starting point but the story can't stop there and providing quality training should always be high on the agenda. This goes for staff on the shop floor, as well as supervisors and managers. Always Look to the Future The past may well have a lot to teach us as business bosses but for retailers it's vital to focus firmly on the future. It's important not to dwell too much on prior successes or failures and to remain as objective as possible as you assess different situations and dynamics. Every experience is a lesson but a good retail manager will not be obsessed with what has gone before but will be quick to understand where opportunities may lie for the future. Be Ready for Anything One of the great things about being involved in retailing is the sheer variety of the challenges it presents from week to week and year to year. For those in charge of retail companies or operations, there is a lot to be said for expecting the unexpected and being ready to react at all times. Ultimately, the aim should be to focus on solving one problem at a time and not wasting energy on figuring out who to blame when things don't go quite according to plan.
