Robert C. Fuller

*Emotions and Beliefs* Nico H. Frijda, Antony S. R. Manstead, Sacha Bem, 2000-10-12 Looks at the different ways in which emotions influence beliefs.

Belief & Emotion Tom Hill, 2011-06-27 This book is about how your beliefs and the emotions linked to those beliefs have the power to make you happy or miserable. It is about the tremendous power of these two factors in your life, how you obtained them, why you keep them and how to alter them. It is a self help book with practical suggestions on how, by conscious thinking linked to feelings and emotions, you can change your sub conscious thought patterns and emotions and release your self from 'loop tape' thinking, negative feelings and behaviours. About twenty years ago I became ill and it was four or five years before I felt totally well again. Looking back it was the worst time of my life. My problem was what is today classed as anxiety: a dreadful illness brought on, I believe, by stress, poor nutrition, grief and the type of hectic life-style we all tend to subject ourselves to in today's society. This helped me to understand and formulate a plan that is outlined in this book. By understanding how events in your life affect 'the inner you' and by re-assessing your beliefs and the emotions linked to those beliefs you will gain the power to release yourself from negative and destructive patterns of thinking and behaviour. The only thing we can be sure of is 'change'. By using 'change' constructively on your beliefs and your emotions you can restore your inner power, your 'Chi'. This will help you to put 'the power to be happy' within your own control.

**Emotions and Beliefs** Nico H. Frijda, Antony S. R. Manstead, Sacha Bem, 2000-10-12 Few people would question nowadays that emotions influence beliefs but until recently little scientific research has been done on exactly how this effect takes place. This important new book, with contributions from some of the leading figures in the study of emotion, explores the relationship between emotions and beliefs from a number of different psychological perspectives. Combining theory with research, it seeks to develop coherent theoretical principles for understanding how emotions influence the content and strength of an individual's beliefs and their resistance or openness to modification.

*Religious Belief and Emotional Transformation* Paul Lauritzen, 1992 Even a cursory reading of contemporary moral philosophy and theological ethics reveals that discussions in these disciplines are often far removed from the actual experiences of individuals struggling to live morally. One reason for this is the general silence in most modern ethical theory about the place of emotions in the moral life. In this study of the possibility of emotional/moral transformation through religious belief and practice, Paul Lauritzen breaks this silence and attempts to explain both why emotions have been ignored and why they must be reclaimed. Drawing on work in philosophical psychology, cultural anthropology, and religious studies, Lauritzen develops an account of emotions and of the self that allows us to see how a system of religious belief and practice may dramatically transform the emotional life of the believer. He argues that emotions are not biologically basic experiences, invariant from culture to culture, but rather are culturally mediated artifacts that are inescapably tied to communities of belief and practice that sustain particular understandings of the self and its world. To this end, Lauritzen sketches a social-constructivist account of human emotions and analyzes the emotion of anger in detail. By comparing anger as it is found in our culture with accounts of anger in certain non-Western societies, the author demonstrates that emotions are crucially shaped in communities of belief and practice and are thus open to transformation with a change in belief and practice. This possibility is explored at length by examining the way in which a framework of retributive justice structures the experience of anger in our culture. According to Lauritzen, this framework presupposes that the human condition is characterized by limited resources, on the one hand, and by limited generosity, on the other. Against this background, anger will appear to be a natural retributive response to violations of individuals' rights. The author concludes the study by showing how, given particular religious views about human life and history, the framework of retributive justice may be transformed or transcended in ways that dramatically affect the emotional life of the believer.--BOOK JACKET. **Religion and Emotion** John Corrigan, 2004-05-27 Brings together twelve essays in the field of emotion studies. This book examines attitudes toward and expressions of emotion in a range of religious traditions and periods. It provides insights to students of comparative religion, anthropology and psychology.

The Oxford Handbook of Religion and Emotion John Corrigan, 2008 This volume collects essays under four categories: religious traditions, religious life, emotional states, and historical and theoretical perspectives. They describe the ways in which emotions affect various world religions, and analyse the manner in which certain components of religious represent and shape emotional performance.

**Feelings of Believing** Ryan Hickerson, 2020-02-28 In *Feelings of Believing: Psychology, History, Phenomenology*, Ryan Hickerson demonstrates that philosophers as diverse as Hume, Descartes, Husserl, and William James all treated believing as feeling. He argues that doxastic sentimentalism, therefore, is considerably more central to modern epistemology than philosophers have recognized. When the empirical psychology of overconfidence and attention is brought to bear on the history of philosophy and the phenomenology of believing, all point toward belief as fundamentally affective. Understanding believing as feeling has the potential to make us better believers, both by encouraging suspicion of unexamined certainties and by focusing attention on credulity. Hickerson argues that believing is typically felt but not given attention by the believer, and he suggests that virtuous believers are those who pay careful attention to their own sentiments-- who attempt to raise their beliefs to the level of judgments.

**Wonder** Robert C. Fuller, 2009-06-23 The attempt to identify the emotional sources of religion goes back to antiquity. In an exploration that bridges science and spirituality, Robert C. Fuller makes the convincing case that a sense of wonder is a principal source of humanity's belief in the existence of an unseen order of life. Like no other emotion, Fuller argues, wonder prompts us to pause, admire, and open our hearts and minds. With a voice that seamlessly blends the scientific and the contemplative, Fuller defines wonder in keeping with the tradition of Socrates--as an emotion related to curiosity and awe that stimulates engagement with the immediate physical world. He draws on the natural and social sciences to explain how wonder can, at the same time, elicit belief in the existence of a more-than-physical reality. Chapters examining emotions in evolutionary biology and the importance of wonder in human cognitive development alternate with chapters on John Muir, William James, and Rachel Carson, whom Fuller identifies as exemplars of wonder. The writings and lives of these individuals express a functional side of emotion: that the very survival of life on earth today may depend on the empathy, compassion, and care that are aroused by a sense of wonder. Forging new pathways between the social sciences, philosophy,

belief, and cultural history, Wonder deepens our understanding of the complex sources of personal spirituality and fulfillment.

**Feelings and Faith** Brian S. Borgman, 2009-04-01 Weaves together biblical exposition and practical application to demonstrate how emotions relate to the Christian life. Emotions are a vital part of what it means to be a human being made in the image of God and redeemed in Jesus Christ. But often our emotions confuse and mislead us. So what is the proper place for emotions in a Christian's walk of faith? In *Feelings and Faith* Brian Borgman draws from his extensive biblical knowledge and his pastoral experience to help readers understand both divine and human emotions. After laying a biblical foundation he moves on to practical application, focusing on how Christians can put to death ungodly emotional displays and also cultivate godly emotions. This biblically informed, practical volume is helpful for pastors, counselors, and serious-minded Christians who wish to develop a full-orbed faith that encompasses their emotional life.

*Love and Other Emotions* Jason W. Brown, 2018-03-08 This book is an account of the psychology of romantic love in the context of a theory of emotions. The account develops out of studies in brain psychology and the extension to topics in process-philosophy, such as the nature of value and belief, and the central role of feeling in mental process. The approach is subjectivist, that is, from the internal standpoint, and in this respect it differs greatly from the externalist and objectivist trends in modern cognitive science and empiricist philosophy. Love is the ultimate in value, so that a theory of love is also a theory of the nature of value and its relation to feeling, belief, and to drive and desire. The role of intention, reason, and appraisal is critiqued. The relation to other feelings, such as jealousy, envy, anger, loss and grief is discussed in terms of a general theory of emotion and the basis in a process account of the mind/brain state.

**The Psychology of Conviction** Joseph Jastrow, 1918

**Resistance to Belief Change** Joseph R. Lao, Jason Young, 2019-09-30 This book examines the human proclivity to resist changing our beliefs. Drawing on psychological, neurological, and philosophical research, and integrating topics as wide ranging as emotion, cognition, social (and physical) context, and learning theory, Lao and Young explore why this resistance to change impedes our learning and progression. They also suggest that failure to adapt our beliefs to available and informed evidence can incur costs that may be seen in personal growth, politics, science, law, medicine, education, and business. *Resistance to Belief Change* explores the various manifestations of resistance, including overt, discursive, and especially inertial forms of resistance. As well as the influential factors that can impact upon them, the book also examines how the self-directed learner, as well as teachers, may structure the learning experience to overcome resistance and facilitate progressive and adaptive learning. Lao and Young find that the impediments to learning and resistance to change are far more prevalent and costly than previously suggested in research, and so this book will be of interest to a range of people in cognitive development, social psychology, and clinical and educational psychology.

**Enthusiasm** Monique Scheer, 2021-01-01 Enthusiasm seeks to contribute to a culturally and historically nuanced understanding of how emotions secure and ratify the truth of convictions. More than just pure affective intensity, enthusiasm is about something: a certainty, clarity, or truth. Neither as clearly negative as fanaticism nor as general as passion, enthusiasm specifically entails belief. For this reason, the book takes its starting point in religion, the social arena in which the concept was first debated and to which the term still gestures. Empirically based in modern German Protestantism, where religious emotion is intensely cultivated but also subject to vigorous scrutiny, it combines historical and ethnographic methods to show how enthusiasm has been negotiated and honed as a practice in Protestant denominations ranging from liberal to charismatic. The nexus of religion and emotion and how it relates to central concepts of modernity such as rationality, knowledge, interiority, and sincerity are key to understanding why moderns are so ambivalent about enthusiasm. Grounded in practice theory, Enthusiasm assumes that emotions are not an affective state we 'have' but mind-body activations we 'do', having learned to perform them in culturally specific ways. When understood as an emotional practice, enthusiasm has different styles, inflected by historical traditions, social milieus, and knowledge (even ideologies) about emotions and how they work. Enthusiasm also provides insight into how this feeling works in secular humanism as well as in politics, and why it is so contested as a practice in any context.

**Expectancy and emotion** Maria Miceli, Cristiano Castelfranchi, 2014-11-27 The mind is a powerful anticipatory device. It frequently makes predictions about the future, telling us not only how the world might or will be, but also how it should be - or better - how we would like it to be. These expectancies shape our lives: they impact on our actual outcomes, often acting as self-fulfilling prophecies. They also constitute a reference point for establishing whether an outcome is a loss or a gain; that is, we evaluate our own outcomes not in absolute terms, but against our expectancies. And we feel ill-treated and betrayed when our expectancies are disappointed. This book explores anticipation-based emotions, that is, the emotions associated with the dialectical interaction between 'what is' and 'what is not (yet)', be it a mere wished-for possibility or an expectation proper. It offers an analysis of both the emotions implying anticipations of future events - such as fear, anxiety, hope, and trust - and those elicited by the disconfirmation of a previous anticipation - surprise, disappointment, discouragement, sense of injustice, regret, and relief - in terms of their belief and goal components. In addition, it addresses anticipated emotions, that is, emotions we think we might experience in future circumstances, and explores how they influence our decisions. The reader will be taken on a journey of exploration and discovery into the multifarious facets and implications of an important family of emotions, aimed at understanding what they have in common, as well as the distinguishing features of each distinct emotion, and predicting their motivational and behavioral consequences. For students and researchers interested in the affective sciences, including psychology, philosophy, and neuroscience, this is a highly original and thought provoking new work.

**A Sociology of Religious Emotion** Ole Riis, Linda Woodhead, 2010-06-24 This timely book aims to change the way we think about religion by putting emotion back onto the agenda. It challenges a tendency to over-emphasise rational aspects of religion, and rehabilitates its embodied, visceral and affective dimensions. Against the view that religious emotion is a purely private matter, it offers a new framework which shows how religious emotions arise in the varied interactions between human agents and religious communities, human agents and objects of devotion, and communities and sacred symbols. It presents parallels and contrasts between religious emotions in European and American history, in other cultures, and in contemporary western societies. By taking emotions seriously, *A Sociology of Religious Emotion* sheds new light on the power of religion to shape fundamental human orientations and motivations: hopes and fears, joys and sorrows, loves and hatreds.

*Existential Reasons for Belief in God* Clifford Williams, 2020-03-18 Lived faith involves doctrines, evidences and

rational coherence—but it includes much more. Philosopher Clifford Williams puts forth an argument as to why certain needs, desires and emotions have a legitimate place in drawing people into faith in God. Addressing the strongest objections to these types of grounds for faith, he shows how the personal and experiential aspects of belief play an important part in coming to faith and in remaining a believing person.

*Love Beyond Belief* Thandeka, 2018 Using insights from the brain science of emotions, *Love Beyond Belief: Finding the Access Point to Spiritual Awareness* narrates two millennia of lost-and-found stories about love beyond belief as the access point to the heart and soul of spiritual life. Many of today's spiritual but not religious people - one in four US adults - have found the access point to spiritual experience that Western Christianity lost: unconditional love. *Love Beyond Belief* tracks the history of this lost emotion. Thandeka has written *Love Beyond Belief* with two goals in mind: to resolve the emotional-deficit problem in so many corpse cold (Ralph Waldo Emerson's words) mainline congregations today; and to offer a primer for spiritual but not religious people to build up and network their spiritual communities. Thandeka has written a book of rigorous scholarship, brilliant original insight, and great practical importance. ... Having read it, I will never be able to think of my theological heritage in the same way again. ... Thandeka sees in the emergence of the spiritual but not religious community a great potential for her goal of love beyond belief. She has demonstrated in practice how, by paying close attention to the affects, dying established churches can come alive. She hopes that those who are alienated from these churches, often for excellent reasons, can develop community activities that will lead them to experience love beyond belief. With her leadership and the support of progressive churches, perhaps this project will succeed. -From the foreword by John B. Cobb, Jr., Center for Process Studies

*Affect and Mathematical Problem Solving* Douglas B. McLeod, Verna M. Adams, 2012-12-06 Research on cognitive aspects of mathematical problem solving has made great progress in recent years, but the relationship of affective factors to problem-solving performance has been a neglected research area. The purpose of *Affect and Mathematical Problem Solving: A New Perspective* is to show how the theories and methods of cognitive science can be extended to include the role of affect in mathematical problem solving. The book presents Mandler's theory of emotion and explores its implications for the learning and teaching of mathematical problem solving. Also, leading researchers from mathematics, education, and psychology report how they have integrated affect into their own cognitive research. The studies focus on metacognitive processes, aesthetic influences on expert problem solvers, teacher decision-making, technology and teaching problem solving, and beliefs about mathematics. The results suggest how emotional factors like anxiety, frustration, joy, and satisfaction can help or hinder performance in problem solving.

**Untangling Emotions** J. Alasdair Groves, Winston T. Smith, 2019-03-14 How do you feel about how you feel? Our emotions are complex. Some of us seem able to ignore our feelings, while others feel controlled by them. But most of us would admit that we don't always know what to do with how we feel. The Bible teaches us that our emotions are an indispensable part of what makes us human—and play a crucial role in our relationships with God and others. Exploring how God designed emotions for our good, this book shows us how to properly engage with our emotions—even the more difficult ones like fear, anger, shame, guilt, and sorrow—so we can better understand what they reveal about our hearts and handle them wisely in everyday moments.

**The Emotion Code** Dr. Bradley Nelson, 2019-05-07 I believe that the discoveries in this book can change our understanding of how we store emotional experiences and in so doing, change our lives. The Emotion Code has already changed many lives around the world, and it is my hope that millions more will be led to use this simple tool to heal themselves and their loved ones.—Tony Robbins In this newly revised and expanded edition of *The Emotion Code*, renowned holistic physician and lecturer Dr. Bradley Nelson skillfully lays bare the inner workings of the subconscious mind. He reveals how emotionally-charged events from your past can still be haunting you in the form of trapped emotions—emotional energies that literally inhabit your body. These trapped emotions can fester in your life and body, creating pain, malfunction, and eventual disease. They can also extract a heavy mental and emotional toll on you, impacting how you think, the choices that you make, and the level of success and abundance you are able to achieve. Perhaps most damaging of all, trapped emotional energies can gather around your heart, cutting off your ability to give and receive love. The Emotion Code is a powerful and simple way to rid yourself of this unseen baggage. Dr. Nelson's method gives you the tools to identify and release the trapped emotions in your life, eliminating your “emotional baggage,” and opening your heart and body to the positive energies of the world. Filled with real-world examples from many years of clinical practice, *The Emotion Code* is a distinct and authoritative work that has become a classic on self-healing.
