The Markets and the Media Thomas Schuster,2006 In recent years there has been a great influx of sources for business and financial news, yet the hope that this financial media boom would lead to the democratization of the financial markets has not been realized. Thomas Schuster's The Markets and the Media explores why the expansion of economic communication has proven to be of only limited benefit, arguing that the financial media boom has had negative repercussions resulting in substantial costs for the individual as well as the systemic level.

The Handbook of News Analytics in Finance Gautam Mitra,Leela Mitra,2011-07-13 The Handbook of News Analytics in Finance is a landmark publication bringing together the latest models and applications of News Analytics for asset pricing, portfolio construction, trading and risk control. The content of the Hand Book is organised to provide a rapid yet comprehensive understanding of this topic. Chapter 1 sets out an overview of News Analytics (NA) with an explanation of the technology and applications. The rest of the chapters are presented in four parts. Part 1 contains an explanation of methods and models which are used to measure and quantify news sentiment. In Part 2 the relationship between news events and discovery of abnormal returns (the elusive alpha) is discussed in detail by the leading researchers and industry experts. The material in this part also covers potential application of NA to trading and fund management. Part 3 covers the use of quantified news for the purpose of monitoring, early diagnostics and risk control. Part 4 is entirely industry focused; it contains insights of experts from leading technology (content) vendors. It also contains a discussion of technologies and finally a compact directory of content vendor and financial analytics companies in the marketplace of NA. The book draws equally upon the expertise of academics and practitioners who

have developed these models and is supported by two major content vendors - RavenPack and Thomson Reuters - leading providers of news analytics software and machine readable news. The book will appeal to decision makers in the banking, finance and insurance services industry. In particular: asset managers; quantitative fund managers; hedge fund managers; algorithmic traders; proprietary (program) trading desks; sell-side firms; brokerage houses; risk managers and research departments will benefit from the unique insights into this new and pertinent area of financial modelling.

Macroeconomic News Effects in Commodity Futures and German Stock and Bond Futures Markets He Huang, 2010 A well-known concept in modern capital market theory is that only systematic risk factors affect security prices. Macroeconomic announcements are among the most important news for financial markets because the state of the economy is a prime candidate for such a source of non-diversifiable risk. This book investigates the effects of US macroeconomic news on three financial markets that have received less attention in the literature so far. The markets of interest are the commodity futures market, the German stock index futures market, and the German bond futures market. I investigate not only price effects, but also liquidity effects as well as the channels of cross-border information flow. I find that commodity markets as well as international stock and bond markets are likewise affected by the release of US macroeconomic news. The strength of the commodity price response depends on the state of the economy and news about the US economy is more important for German stock markets than domestic economic news. For an investor in any of these markets, this book provides valuable information on how to adjust his trading strategies around the release of macroeconomic news. Moreover, my findings contribute to the understanding of cross-border information flow. First, I find that both domestic and foreign economic news induce significant price and liquidity effects. Second, I find that there are two important

channels of information transmission for foreign news: the direct response to the news and the indirect response to the foreign response to the news.

World Event Trading Andrew Busch, 2007-07-20 In an age of twenty-four-hour news coverage and cutting-edge technology, world events dominate our lives and impact the financial markets. From hurricanes to the war in Iraq, we exist in a crazy, connect-the-dot planet. However, the well-prepared investor can turn these events into profits. All they need is the ability to recognize the consistent characteristics of these events and the vision to build a strategy or portfolio that can take advantage of these situations when they begin to unfold. As a foreign exchange strategist with over twenty years of financial experience, author Andrew Busch knows what it takes to make it in today's dynamic market. And now, with *World Event Trading*, he wants to show you how. Filled with in-depth insights and expert advice, this practical guide examines three categories of world events—*infectious diseases, natural disasters, and politics*—and provides hands-on strategies for trading profitably on each. Using actual examples of the war in Iraq, Hurricane Katrina, and other recent page one stories, Busch shows you how to understand all-important market moods and anticipate profitable trades. He also reveals little-known details on legendary event-driven trading successes, illustrating how any trader can repeat them in different market environments. Andrew Busch is the Global FX Market Strategist for BMO Financial Group's Investment Banking Division in Chicago. He is a recognized expert on the world financial markets and how these markets are impacted by political events. Busch's views appear in his daily newsletter, the *Busch Update*, which reaches 5,000 investors and financial professionals. He also writes a weekly column that appears on *The Globe and Mail* Web site on Fridays and in print on Mondays (circulation 40,000). Busch makes weekly appearances on CNBC's *Closing Bell* with Maria Bartiromo and is frequently quoted by the *Wall Street Journal* as well as other

news services. He graduated Phi Beta Kappa with a BA in economics from Ohio Wesleyan University and received an MBA from the University of Chicago.

The Global Stock Market:Issuers, Investors, and Intermediaries in an Uneven World Dariusz Wójcik,2011-05-26 Why do some companies stay out of stock markets? How crucial are stock markets for competition between financial centres? How can local information help investors outperform the market?Whilst mainstream financial economics treats stock markets as consisting of anonymous actors interacting in space, with no consideration of the friction caused by distance or geography, this book offers a comprehensive and up-to-date picture of the global stock market by focusing on the relationships between issuers, investors, and intermediaries, and how these relationships impact on the performance of stock markets and the economy of cities, countries, and the world.The book uses rich data and global case studies to examine the rise of emerging markets, the impact of the global financial crisis, the revolution in the stock exchange business model, and the continued dominance of London and New York as stock market centres.Drawing on economic geography, financial economics, sociology, history, and globalization studies, the book explores the geographical constitution and footprint of stock markets and contributes to the broader debate on the role of stock markets in the global economy. Its conclusions are relevant to investors, companies issuing stocks, exchanges,

analysts, investment banks, and policy-makers.

Language Tone in Financial News Media and the Cross-section of Stock Returns Mikael Bask,Lars Forsberg,Andreas Östling,2020 Based on 58,256 news articles published in the Financial Times during a 15-year period that cover companies in the DJIA, we find that a trading strategy that longs stocks with the most negative news and shorts stocks with the least negative news is not profitable. Consistent with this result, we also find that the sentiment factor derived from the negativism in the language tone in news articles is not a priced risk factor in the cross-section of stock returns. Nevertheless, the sentiment factor is significant for two-thirds of the stocks when it is added to well-known factor models.

To (New)B(e) or not to (NewB(e) Dirk Aj Coeckelbergh,2022-11-25 Het doek valt voor de ethische coöperatieve bank NewB. Na tien jaren smachten en trachten om een nieuwe, 'ethische', minstens alternatieve bank te creëren – als antwoord op de bankencrisis van 2008 en het Arco-faillissement in 2011 – moeten de initiatiefnemers het falen van de bank erkennen. Nochtans was er bij aanvang veel animo voor een nieuwe én coöperatief opgezette bank die zou trachten het ethisch-maatschappelijke engagement in de bancaire sector in het DNA van haar producten en werking in te planten. Uiteindelijk was er geen tekort aan investerende coöperanten en werd enthousiast gestart.

We laten de historiek van wat daarna gebeurde over aan de auteur. Wat deed dit project ontsporen? Wat heeft gemaakt dat het fout liep? Niemand is beter geplaatst dan Dirk Coeckelbergh, in de eerste helft van het project persoonlijk betrokken, om met zijn ruime kennis en ervaring het hele proces van NewB, van aanvang tot doodstrijd, te fileren in al zijn details en nuances. Dat hij zich daarbij baseert op een berg aan documenten die voor iedereen toegankelijk, want openbaar zijn, is zonder meer een enorm pluspunt. Ze maken het onderzoek van Coeckelbergh tot een doorwrochte analyse waaraan moeilijk afbreuk kan worden gedaan. Ethisch ondernemen, ethisch investeren en ethisch bankieren zijn geen nieuwe topics. Sinds business ethics als academische discipline vanuit de Anglo-Saksische wereld het Kanaal overstak begin negentiger jaren van vorige eeuw hebben heel wat academici – filosofen, economen, theologen en anderen – zich de vraag gesteld hoe het een met het ander te combineren valt en wat daarbij de struikelstenen, drempels en schietgeweren zijn. We hebben er zelf in de voorbije decennia, ondermeer via de oprichting van een Vlaams Netwerk voor Zakenethiek, ons steentje aan bijgedragen. Dat alles heeft geleid tot een pak consultancy, tot audits en kwaliteitslabels, tot dikke boeken en heel wat conferenties. In de schoot van het Europese netwerk European Business Ethics Network (EBEN) vergaderen academici en afgevaardigden van banken al meer dan een decennium (achter gesloten deuren). En ethisch bankieren heeft ondertussen ook bij ons al tot enkele nieuwe bankprojecten geleid. Die hebben ondertussen aangetoond te kunnen groeien en bloeien. De vraag naar ethisch gekaderd investeren is zelfs dermate groot gebleken dat ook de klassieke grootbanken hebben geïnvesteerd in allerlei ethische of duurzame – we staan hier niet stil bij het onderscheid tussen beide – fondsen. Onderzoek toont steeds weer aan dat ze rendabel zijn, minstens zoveel als de niet-ethische/niet-duurzame. We kunnen in dat verband niet anders dan verwijzen naar de grondige analyse die Coeckelbergh hierover vroeger reeds publiceerde (Ethisch en

duurzaam beleggen in België. Historiek, stand van zaken en kritische visie. (2011) Antwerpen/Apeldoorn: Garant). Ethisch bankieren blijkt levensvatbaar. Wat de vraag naar het falen van NewB enkel maar pregnanter maakt. Als ethicus kunnen we daarover uiteraard enkel maar tevreden zijn. Al blijven we ook knelpunten zien. De belangrijkste lijkt ons, vanuit onze eigen ervaring terzake, de ontwikkeling van een efficiënte methodologie om projecten, fondsen, kredietaanvragen en dies meer te beoordelen op de ethische basiswaarden en -principes die de bank zich heeft gesteld. Daarnaast vormt ook de samenstelling van het ethische comité dat dergelijke beoordelingen moet doen een probleem. Er zijn nu eenmaal weinig tot geen specialisten in Vlaanderen in de professionele en bedrijfsethiek en nog minder in de specifieke ethiek voor de bancaire sector. De betreffende comités moeten het daarom vaak doen met mensen die weliswaar ethisch zeer gemotiveerd zijn, maar de zo noodzakelijke academische kennis ontberen. Uit zijn gedegen historisch bronnenonderzoek concludeert ook Coeckelbergh final tot enkele knipperlichten voor een dergelijk project. Dat maakt dit boek niet enkel tot een relaas van een gefaald bankproject, maar ook een leerschool voo
