Wallpaper and the Artist Marilyn Oliver Hapgood,1992 The book examines how major artists over the last five centuries have approached wallpaper design. From Durer, who conceived his designs as seriously as he did a fine woodcut, to William Morris, who believed that wallpaper, like all good design, should transform our lives, to Andy Warhol, whose fascination with multiple images inspired brilliant parodies of the wallpaper tradition, the artists represented here reveal the rich complexity inherent in the art of pattern and form that constitutes wallpaper design.

Boak & Paris / Boak & Raad Annice M. Alt,2014-10-25 Boak & Paris may not be a household name in most households, but this architectural firm was key to the development of apartment buildings that are among the finest in New York City. Annice Alt's book analyzes this firm and its exceptional buildings in detail and places them within the context of speculative real estate development. The book provides an important contribution to the understanding of the vernacular buildings that create the streetscapes that New Yorkers love and that give the city its unique character. Andrew S. Dolkart Director, Historic Preservation Program, Columbia University School of Architecture, Planning and Preservation; author of the award-winning *The Row House Reborn: Architecture and Development in New York City, 1908-1929* and *Morningside Heights: A History of its Architecture and Development* Alt's thoroughly

researched book provides new information and insights into the architectural work of Boak & Paris and Boak & Raad. It is a surprise to discover the wealth of buildings, particularly the apartment houses that they are responsible for. Many of the Boak & Paris projects from the 1920-30's employ interesting architectural terra-cotta elements. To revisit the apartments from the 1950s and 60s is a fascinating exercise. Fine period images are of great value in elucidating this quest. Susan Tunick President, Friends of Terra Cotta; author, Terra-Cotta Skyline: New York's Architectural Ornament New York's architecture buffs can rejoice: Annice Alt has completed her monograph on Boak & Paris. The personal approach she takes in her writing--and extensive quotations from original sources--bring us into the adventure of her research, where we meet not just Russell Boak and Hyman Paris, but also such august architectural personages as Emery Roth and Gaetan Ajello, along with the clients--such as plumber-turned-developer Sam Minskoff--who kept them busy during the middle decades of the 20th century, turning Manhattan into an island of cliff dwellers. Anthony W. Robins Architectural historian; author Grand Central Terminal: 100 Years of a New York Landmark and a guide to New York City Art Deco architecture (forthcoming) Boak was an unsung architect who was incapable of doing a bad drawing, a bad design. No one is comparable. Boak just had taste, he had class. Elihu Rose Vice Chairman, Rose Associates, Inc.

It is targeted at a broad audience, ranging from young gadget enthusiasts to senior citizens trying to get used to new devices and associated apps. By offering a structured overview of some of the most useful technologies current available, putting them in perspective, and suggesting numerous resources for further exploration, the book gives its readers a clear path for learning new topics through apps and web-based resources, making better choices of apps and websites for frequent use, using social networks effectively, protecting their privacy and staying safe online, and enjoying the opportunities brought about by these technological advances without being completely consumed by them.

Machine Intelligence and Signal Processing Richa Singh, Mayank Vatsa, Angshul Majumdar, Ajay Kumar, 2015-10-01 This book comprises chapters on key problems in machine learning and signal processing arenas. The contents of the book are a result of a 2014 Workshop on Machine Intelligence and Signal Processing held at the Indraprastha Institute of Information Technology. Traditionally, signal processing and machine learning were considered to be separate areas of research. However in recent times the two communities are getting closer. In a very abstract fashion, signal processing is the study of operator design. The contributions of signal processing had been to device operators for restoration, compression, etc. Applied Mathematicians were more interested in operator analysis. Nowadays signal processing research is gravitating towards operator learning – instead of designing operators based on heuristics (for example wavelets), the trend is to learn these operators (for example dictionary learning). And thus, the gap between signal processing and machine learning is fast converging. The 2014 Workshop on Machine Intelligence and Signal Processing was one of the few unique events that are focused on the convergence of the two fields. The book is comprised of chapters based on the top presentations at the workshop. This book has three chapters on various topics of biometrics – two are on face detection and one on iris recognition; all from top researchers in their field. There are four chapters on different biomedical signal / image processing problems. Two of these are on retinal vessel classification and extraction; one on biomedical signal acquisition and the fourth one on region detection. There are three chapters on data analysis – a topic gaining immense popularity in industry and academia. One of these shows a novel use of compressed sensing in missing sales data interpolation. Another chapter is on spam detection and the third one is on simple one-shot movie rating prediction. Four other chapters cover various cutting edge miscellaneous topics on character recognition, software effort prediction, speech recognition and non-linear sparse recovery. The contents of this book will prove useful to researchers, professionals and students in the domains of machine learning and signal processing.

Art Nouveau Architecture Anne Anderson, 2020-11-23 Distinguished by their lavish sculpture, metalwork or tile facades, Art Nouveau buildings certainly stand out. Art Nouveau buildings are unique, audacious and inspirational. Rejecting historic styles, considered inappropriate for an era driven by progress, architects and designers sought a new vocabulary of architectural forms. Their vision was shaped by modern materials and innovative technologies, including iron, glass and ceramics. A truly democratic style, Art Nouveau transformed life on the eve of the twentieth century and still captivates our imaginations today. Beautifully illustrated, this book explains how the new style came into being, its rationale and why it is known by so many different names: French Art Nouveau, German Jugendstil, Viennese Secession, Catalan Modernisme, Italian Liberty and Portuguese Arte Nova. It covers the key architects and designers associated with the style; Victor Horta in Brussels, Hector Guimard in Paris, Antoni Gaudi on Barcelona, Otto Wagner in Vienna, Odon Lechner in Budapest and Charles Rennie Mackintosh in Glasgow. There are detailed descriptions and stunning photographs of buildings to be found in Brussels, Paris, Nancy, Darmstadt, Vienna, Budapest, Barcelona, Milan, Turin and Aveiro. Finally, it covers the decorative arts, stained glass, tiles and metalwork that make Art Nouveau buildings so distinctive.
