Ruin Memories Bjørnar Olsen, Þóra Pétursdóttir, 2014-04-24 Since the nineteenth century, mass-production, consumerism and cycles of material replacement have accelerated; increasingly larger amounts of things are increasingly victimized rapidly and made redundant. At the same time, processes of destruction have immensely intensified, although largely overlooked when compared to the research and social significance devoted to consumption and production. The outcome is a ruin landscape of derelict factories, closed shopping malls, overgrown bunkers and redundant mining towns; a ghostly world of decaying modern debris normally omitted from academic concerns and conventional histories. The archaeology of the recent or contemporary past has grown fast during the last decade. This development has been concurrent with a broader popular, artistic and scholarly interest in modern ruins in general. *Ruin Memories* explores how the ruins of modernity are conceived and assigned cultural value in contemporary academic and public discourses, reassesses the cultural and historical value of modern ruins and suggests possible means for reaffirming their cultural and historic significance. Crucial for this reassessment is a concern with decay and ruination, and with the role things play in expressing the neglected, unsuccessful and ineffable. Abandonment and ruination is usually understood negatively through the tropes of loss and deprivation; things are degraded and humiliated while the information, knowledge and memory embedded in them become lost along the way. Without even ignoring its many negative and traumatizing aspects, a main question addressed in this book is whether ruination also can be seen as an act of disclosure. If ruination disturbs the routinized and ready-to-hand, to what extent can it also be seen as a recovery of memory as exposing meanings and presences that perhaps are only possible to grasp at second hand when no longer immersed in their withdrawn and useful reality? Anybody interested in the archaeology of the contemporary past will find *Ruin Memories* an essential guide to the very latest theoretical research in this emerging field of archaeological thought.

A History of Girl Guides & Girl Scouts Julie Cook, 2022-11-17 A History of Girl Guides and Girl Scouts: Brownies, Rainbows and WAGGGS charts the evolution of the Girl Guides and Girl Scouts from its early days as a movement started before WW1 right through to the modern day. With real life interviews with Girl Guides and Girl Scouts from their 90s down to young children, this book looks at what being a Girl Guide has meant through the ages up to the present day. With dramatic and often emotional stories of what it was like to be an evacuated Brownie in the Second World War, a disabled Girl Guide and with tales of girls' heroism throughout the two great wars both in the UK and the United States, this book extols the Guiding and Scouting movement as one that has evolved with women and girls' rights and its hopes for the future.

The Scottish Heart Jim Ellis, 2023-04-18 A collection of three novels by Jim Ellis, now available in one volume! One Summer: In mid-20th century Scotland, Nathan Forrest, a gifted jazz trumpeter and devout Catholic, falls in love with Dorothy, a Protestant girl from a middle-class family. Against the backdrop of Westburn's doomed shipyards, they must confront the prejudices and hate of their society in order to be together. But will their love be enough to overcome the religious and social conflicts that threaten to tear them apart? The Music Room: Set in 1950's Scotland, Tim Ronsard is a student at St. Mary's School, feeling unfulfilled and ready to leave. That is until music teacher Isobel Clieshman arrives, a Protestant in a Catholic school. Despite the age gap, Tim falls for her, but it isn't until five years later when they meet again that their romance blossoms. However, with societal prejudices and personal struggles to overcome, their journey towards happiness is a challenging one. Westburn Blues: Dante Rinaldi, the son of Italian immigrants in Scotland, becomes entrenched in his family's homeland during a stranded summer with his grandfather in World War II Italy. As a young adult, Dante fights with a band of mountain partisans against the fascists. His experiences, including a delayed young love and post-war struggles in Scotland, lead him to cross paths with neglected adolescent Chris McCoull, who finds his own romance and purpose while working for a Greek-owned shipping line. This carefully researched and historically detailed novel depicts the Scottish-Italian experience with a cast of colorful characters, from sympathetic to truly evil.

One Summer Jim Ellis, 2022-01-11 Nathan Forrest is a lapsed Catholic, a welder, an illegitimate son, and a gifted jazz trumpeter. After he begins pursuing Dorothy - a Protestant girl from a middle-class family - they face the antagonism of mid-20th century Scotland. Against a backdrop of decaying Westburn's doomed shipyards and bitter environment, the young lovers seek to escape the constraints of prejudice and hate. But is their love and determination enough to bring them happiness, or will religious and social conflict consume them both?

Pyrotechnic Cities Liam Ross, 2022-06-24 This book explores the relationship between architecture, government and fire. It posits that, through the question of fire-safety standardisation, building design comes to be both a problem for, and a tool of, government. Through a close study of fire-safety standards it demonstrates the shaping effect that architecture and the city have on the way we think about governing. Opening with

an investigation into the Grenfell Tower fire and the political actors who sought to enrol it in programmes of governmental reform before contextualising the research in current literature, the book takes four city studies, each beginning with a specific historic fire: The 1654 Great Fire of Meirecki, Edo; the 1877 town fire of Lagos; the 1911 Empire Palace Theatre fire, Edinburgh; and the 2001 World Trade Centre attack, New York. Each study identifies the governmental response to the fire, safety standards and codes designed in its wake and how these new processes spread and change. Drawing on the work of sociologists John Law and Anne Marie Mol and their concept of ‘Fire Space’, it describes the way that architectural design, through the medium of fire, is an instrument of political agency. Pyrotechnic Cities is a critical investigation into these political implications, written for academics, researchers and students in architectural history and theory, infrastructure studies and governance.
