**River Dwellers** Rob Reimer,2024-03-11 Did you ever wish there was more to your Christian life? Too often the Christian life is reduced to going to church, attending meetings, serving God, and doing devotions. But Jesus promised us abundant life – a deep, intimate, satisfying connection with the living God. How do we access the abundant life that Jesus promised? The key is the presence and life of the Holy Spirit within us. Jesus said that the Spirit of God flows within us like a river – He is the River of Life. But we need to dwell in the river in order to access the Spirit's fullness. In his latest book, Dr. Rob Reimer offers a deep look at life in the Spirit and provides practical strategies for dwelling in the River of Life. We will explore the fullness of the Spirit, tuning into the promptings of the Spirit, walking in step with the Spirit, and developing sensitivity to the presence of the God in our lives. This resource will guide you toward becoming a full-time river dweller, even in the midst of life's most difficult seasons when the river seems to run low. Together let's become River Dwellers, living where the fullness of God flows so that we can carry living water to a world dying of thirst!

Soul Care explores seven principles that are profound healing tools of God: securing your identity, repentance, breaking family sin patterns, forgiving others, healing wounds, overcoming fears, and deliverance. Dr. Rob Reimer challenges readers to engage in an interactive, roll-up-your-sleeves and get messy process -- a journey of self-reflection, Holy Spirit inspiration, deep wrestling, and surrender. It is a process of discovering yourself in true community and discovering God as He pierces through the layers of your heart. Life change is hard. **Darwin's Garden** Michael Boulter,2009-01-10 Five years after returning from his trip around the world, young Charles Darwin became the owner of Down House in Kent, England, where he moved his growing family, far away from the turmoil and distractions of London. He would live there for the rest of his life, and it would become the place where he began work on his masterpiece, *On the Origin of Species*. For almost twenty years, he used the garden around him as a laboratory. In the orchard, he conducted experiments on pollination. He built a dovecote where breeding new strains of pigeons helped him understand the intricacies of generation. On his daily walk along the sandbank, he observed how plants competed for survival. In solitude he struggled with the ideas of evolution that had haunted him since his voyage, which, in turn, gave him the courage to publish his revolutionary ideas. Bringing Darwin's garden to the present day, Boulter unfolds a shining portrait of the formation of one of England's greatest thinkers and his relationship with the place he loved, and shows how his experiments—conducted more than 150 years ago—are still revealing new proofs as we continue to search for the origins of life.
