Indigenous and Local Communities and Protected Areas Grazia Borrini, Ashish Kothari, Gonzalo Oviedo, 2004 Conventional approaches to managing protected areas have often seen people and nature as separate entities. They preclude human communities from using natural resources and assume that their concerns are incompatible with conservation. Protected area approaches and models that see conservation as compatible with human communities are explored. The main themes are co-managed protected areas and community conserved areas. Practical guidance is offered, drawing on recent experience, reflections and advice developed at the local, national, regional and international level.

Handbook of Research on Sustainability Challenges in the Wine Industry Marco-Lajara, Bartolomé, Gilinsky, Armand, Martínez-Falcó, Javier, Sánchez-García, Eduardo, 2023-04-18 In the wine industry, sustainability is an extremely important issue for two main reasons: Firstly, the industry faces serious threats as a consequence of climate change, as well as water and energy scarcity. Secondly, proper sustainable management of wineries can mean obtaining a competitive advantage by allowing them to increase market share and organizational innovation processes. In this sense, previous work has shown that customers tend to select wines that have been developed following sustainable practices, despite not knowing what this means in practice. The Handbook of Research on Sustainability Challenges in the Wine Industry serves as a guide for study, reflection, and critique to understand sustainability in the wine industry in its triple aspect (economic, social, and environmental). The book sheds light on the new trends and challenges of the wine industry, making it a must-read for academicians and managers who want to deepen their knowledge of the wine industry as well as its link with sustainability. Covering key topics such as wine tourism, green innovation, and consumer behavior, this major reference work is ideal for industry professionals, business owners, managers, entrepreneurs, researchers, scholars, academicians, practitioners, instructors, and students.

Building a New Future United Nations, 2021-05-31 This publication argues that Latin America and the Caribbean are in a position to move towards a big push for sustainability through a combination of economic, industrial, social and environmental policies capable of driving an equal and sustainable recovery and relaunching development in the region. Comprised of five chapters, the publication studies the three crises (slow growth, growing inequality and the environmental emergency) affecting economies and societies around the world, placing particular focus on those of Latin America and the Caribbean. It goes on to present a framework for analysing these crises in an integrated manner and measuring their magnitude in the specified regions. It then examines the quantitative impacts on growth, emissions, income distribution and the external sector under different policy scenarios, highlighting the potential of various policy combinations to forge a more dynamic growth path, with lower emissions and greater equality. Further identifying seven sectors that can drive sustainable development and proposing policies to foster these sectors, the publication concludes with an analysis that links up macroeconomic, industrial, social and environmental policies and the role of the State in building consensus for their implementation.

Modernization in Colombia James D. Henderson, 2001 The research involved in putting this manuscript together is truly awesome and involves a major synthesis of Colombian political, economic, urban, and social history which has not been achieved to date either in Spanish or in English.-- Maurice P. Brungardt, Loyola University of New Orleans Henderson's life-and-times study of Laureano Gómez provides a cogent analysis of a rapidly modernizing Colombia as well as a vivid portrait of one of the most powerful 20th-century Latin American conservative thinkers and politicians.-- Jane M. Rausch, University of Massachusetts, Amherst The life of Laureano Gómez (1889-1965), Colombia's combative Conservative politician and reviled public figure, serves as the backdrop for this modern history of one of the hemisphere's least understood nations. Tracing the complex process of development in Colombia, James Henderson explores the civil violence that defined the Gómez era even as the country experienced economic growth unparalleled in the rest of the Americas. Gómez was a consummate debater, a spellbinding orator, and an influential newspaper editor. Early in his career he was a thorn in the side of Liberals and Conservatives alike, while in later years he led the Conservative opposition in Congress. He made and unmade presidents, served as president himself, and all the while figured prominently in Colombia's transition to modernity. Henderson gives us the best and worst of Gómez and his adversaries during this era, a time of alternating political peace and progress, punctuated by spells of extremist invective and bloody violence. Thus he shows that much of recent Colombian history is rooted in developments from the Gómez years. Few Colombians can speak calmly of Gómez, and many blame him for the violence that plagued the country from the mid-1940s to the mid-1960s. Henderson's objective and thorough discussion exposes the myths and assumptions surrounding Gómez and offers especially effective analysis of his writings, speeches, congressional debates, and editorials (as well as his rejoinders, one-liners, and put-downs, classics in the lexicon of Colombian history). Henderson also chronicles the titanic political rivalry between Gómez and Alfonso López Pumarejo, an arch-Liberal, showing how the two

men who began their careers as friends became bitter enemies and ultimately led Colombia into the fratricidal civil war known as La Violencia. This important history of Colombia's political, economic, urban, and social life will become the definitive study of the nation during its critical period of modernization. James D. Henderson, professor of international studies at Coastal Carolina University in Conway, South Carolina, is general editor of *A Reference Guide to Latin American History*. He has written two other books on 20th-century Colombia, both best-sellers in their Colombian Spanish-language editions.

Children and the Internet Sonia Livingstone, 2013-05-06 Is the internet really transforming children and young people's lives? Is the so-called 'digital generation' genuinely benefiting from exciting new opportunities? And, worryingly, facing new risks? This major new book by a leading researcher addresses these pressing questions. It deliberately avoids a techno-celebratory approach and, instead, interprets children's everyday practices of internet use in relation to the complex and changing historical and cultural conditions of childhood in late modernity. Uniquely, *Children and the Internet* reveals the complex dynamic between online opportunities and online risks, exploring this in relation to much debated issues such as: Digital in/exclusion Learning and literacy Peer networking and privacy Civic participation Risk and harm Drawing on current theories of identity, development, education and participation, this book includes a refreshingly critical account of the challenging realities undermining the great expectations held out for the internet - from governments, teachers, parents and children themselves. It concludes with a forward-looking framework for policy and regulation designed to advance children's rights to expression, connection and play online as well as offline.

Grand Corruption George Moody-Stuart, 1997

Children, Risk and Safety on the Internet Livingstone, Sonia, Haddon, Leslie, 2012-07-18 As internet use is extending to younger children, there is an increasing need for research focus on the risks young users are experiencing, as well as the opportunities, and how they should cope. With expert contributions from diverse disciplines and a uniquely cross-national breadth, this timely book examines the prospect of enhanced opportunities for learning, creativity and communication set against the fear of cyberbullying, pornography and invaded privacy by both strangers and peers. Based on an impressive in-depth survey of 25,000 children carried out by the EU Kids Online network, it offers wholly new findings that extend previous research and counter both the optimistic and the pessimistic hype. It argues that, in the main, children are gaining the digital skills, coping strategies and social support they need to navigate this fast-changing terrain. But it also identifies the struggles they encounter, pinpointing those for whom harm can follow from risky online encounters. Each chapter presents new findings and analyses to inform both researchers and students in the social sciences and policy makers in government, industry or child welfare who are working to enhance children's digital experiences.
