Indigenous and Local Communities and Protected Areas Grazia Borrini, Ashish Kothari, Gonzalo Oviedo, 2004 Conventional approaches to managing protected areas have often seen people and nature as separate entities. They preclude human communities from using natural resources and assume that their concerns are incompatible with conservation. Protected area approaches and models that see conservation as compatible with human communities are explored. The main themes are co-managed protected areas and community conserved areas. Practical guidance is offered, drawing on recent experience, reflections and advice developed at the local, national, regional and international level.

Agriculturally Important Microorganisms Harikesh Bahadur Singh, Birinchi Kumar Sarma, Chetan Keswani, 2016-11-30 The main focus of this book is to survey the current status of research, development and use of agriculturally important microorganisms in Asian countries and develop a strategy for addressing critical issues various policy constraints due to which bio-pesticides have found limited applications. In this book the editors have tried to develop a consensus on issues of such as quality requirements, quality control, regulatory management, commercialization and marketing of agriculturally important microorganisms in Asian countries. All these issues are discussed at national level by competent authorities of Asian countries including India, China, Malaysia, Iran, Taiwan, Israel, Sri Lanka, Vietnam and Philippines.

Designing Mobile Apps Javier Cuello, José Vittone, 2013-11-20 Embarking on a career (or hobby) in app design can be intimidating, especially when information is scattered, confusing and hard to find. *Designing Mobile Apps* is a complete guide for those getting started, providing step-by-step details on how to design useful, attractive mobile applications. Authors Javier “Simón” Cuello and José Vittone share their experiences in the world of app design, revealing tricks of the trade based on their work at companies like Yahoo, Zara and Telefónica. Apps for Android, iOS and Windows Phone How do operating systems differ? How does one go about transferring from one OS to another? *Designing Mobile Apps* answers these questions and more, using real-life examples and visual comparisons. The Complete Design Process From the initial concept to app store publication, *Designing Mobile Apps* covers the full app creation process in simple, easy-to-use terms. It includes numerous examples and doesn't use a single line of code. Interviews with Top Professionals *Designing Mobile Apps* contains interviews with leading designers and developers, including Loren Brichter, Irene Pereyra, Erik Spiekermann and Dustin Mierau. They share the secrets they've learned while working at some of the best companies in the world. Written Especially for Designers and Developers Not sure how to prepare your design for the programmer? Know how to program, but fuzzy on the details in making your app truly appealing and easy to use? With *Designing Mobile Apps*, designers and developers can learn all they need to know to work together and create a successful app.

Modernization in Colombia James D. Henderson, 2001 The research involved in putting this manuscript together is truly awesome and involves a major synthesis of Colombian political, economic, urban, and social history which has not been achieved to date either in Spanish or in English.-- Maurice P. Brungardt, Loyola University of New Orleans Henderson's life-and-times study of Laureano Gómez provides a cogent analysis of a rapidly modernizing Colombia as well as a vivid portrait of one of the most powerful 20th-century Latin American conservative thinkers and politicians.-- Jane M. Rausch, University of Massachusetts, Amherst The life of Laureano Gómez (1889-1965), Colombia's combative Conservative politician and reviled public figure, serves as the backdrop for this modern history of one of the hemisphere's least understood nations. Tracing the complex process of development in Colombia, James Henderson explores the civil violence that defined the Gómez era even as the country experienced economic growth unparalleled in the rest of the Americas. Gómez was a consummate debater, a spellbinding orator, and an influential newspaper editor. Early in his career he was a thorn in the side of Liberals and Conservatives alike, while in later years he led the Conservative opposition in Congress. He made and unmade presidents, served as president himself, and all the while figured prominently in Colombia's transition to modernity. Henderson gives us

the best and worst of Gómez and his adversaries during this era, a time of alternating political peace and progress, punctuated by spells of extremist invective and bloody violence. Thus he shows that much of recent Colombian history is rooted in developments from the Gómez years. Few Colombians can speak calmly of Gómez, and many blame him for the violence that plagued the country from the mid-1940s to the mid-1960s. Henderson's objective and thorough discussion exposes the myths and assumptions surrounding Gómez and offers especially effective analysis of his writings, speeches, congressional debates, and editorials (as well as his rejoinders, one-liners, and put-downs, classics in the lexicon of Colombian history). Henderson also chronicles the titanic political rivalry between Gómez and Alfonso López Pumarejo, an arch-Liberal, showing how the two men who began their careers as friends became bitter enemies and ultimately led Colombia into the fratricidal civil war known as La Violencia. This important history of Colombia's political, economic, urban, and social life will become the definitive study of the nation during its critical period of modernization. James D. Henderson, professor of international studies at Coastal Carolina University in Conway, South Carolina, is general editor of *A Reference Guide to Latin American History*. He has written two other books on 20th-century Colombia, both best-sellers in their Colombian Spanish-language editions.

European Football and Collective Memory W. Pyta, N. Havemann, 2015-03-25 Is it possible for football matches or players to help forge a collective European identity? Pyta and Havemann seek to answer this question through a detailed analysis of how football is remembered across the continent. *European Football and Collective Memory* is the first book to deal with collective memory of football on a continental scale.

Negotiating Our Way Up Collective Bargaining in a Changing World of Work OECD, 2019-11-18 Collective bargaining and workers' voice are often discussed in the past rather than in the future tense, but can they play a role in the context of a rapidly changing world of work? This report provides a comprehensive assessment of the functioning of collective bargaining systems and workers' voice arrangements across OECD countries, and new insights on their effect on labour market performance today.

Children and the Internet Sonia Livingstone, 2013-05-06 Is the internet really transforming children and young people's lives? Is the so-called 'digital generation' genuinely benefiting from exciting new opportunities? And, worryingly, facing new risks? This major new book by a leading researcher addresses these pressing questions. It deliberately avoids a techno-celebratory approach and, instead, interprets children's everyday practices of internet use in relation to the complex and changing historical and cultural conditions of childhood in late modernity. Uniquely, *Children and the Internet* reveals the complex dynamic between online opportunities and online risks, exploring this in relation to much debated issues such as: Digital in/exclusion Learning and literacy Peer networking and privacy Civic participation Risk and harm Drawing on current theories of identity, development, education and participation, this book includes a refreshingly critical account of the challenging realities undermining the great expectations held out for the internet - from governments, teachers, parents and children themselves. It concludes with a forward-looking framework for policy and regulation designed to advance children's rights to expression, connection and play online as well as offline.

Children, Risk and Safety on the Internet Livingstone, Sonia, Haddon, Leslie, 2012-07-18 As internet use is extending to younger children, there is an increasing need for research focus on the risks young users are experiencing, as well as the opportunities, and how they should cope. With expert contributions from diverse disciplines and a uniquely cross-national breadth, this timely book examines the prospect of enhanced opportunities for learning, creativity and communication set against the fear of cyberbullying, pornography and invaded privacy by both strangers and peers. Based on an impressive in-depth survey of 25,000 children carried out by the EU Kids Online network, it offers wholly new findings that extend previous research and counter both the optimistic and the pessimistic hype. It argues that, in the main, children are gaining the digital skills, coping strategies

and social support they need to navigate this fast-changing terrain. But it also identifies the struggles they encounter, pinpointing those for whom harm can follow from risky online encounters. Each chapter presents new findings and analyses to inform both researchers and students in the social sciences and policy makers in government, industry or child welfare who are working to enhance children's digital experiences.

Movement Disorders Curricula Cristian Falup-Pecurariu, Joaquim Ferreira, Pablo Martinez-Martin, Kallol Ray Chaudhuri, 2017-02-27 This book offers a comprehensive approach to the wide range of movement disorders, an important specialty in the field of neurology, guiding readers from the phenomenology to diagnosis and management. Reflecting the latest developments in the field, it offers a unique summary of this dynamic area by pursuing a uniform approach to movement disorders curricula. Divided into three parts, Movement Disorders Curricula provides an authoritative overview of this growing branch of neurology. The first part presents the basic elements of movement disorders, including descriptions of the anatomy and physiology of the basal ganglia. It also features sections on clinical trials for movement disorders, practical skills, and rating scales. The second and third part examine in detail hypokinetic and hyperkinetic movement disorders, respectively. Equipping readers with the practical and research skills needed in the movement disorders field, the book offers a valuable tool to help them prepare for board examinations on general neurology, as well as for fellowships in movement disorders.

The Frontiers of Applied Demography David A. Swanson, 2016-11-11 This book details cutting-edge methods and findings that may shape the future of applied demography. Inside, readers will discover new insights into the databases, substantive issues, and methodological approaches that can help them to improve how they use demography in decision making and planning problems in both public and private settings. The topics and perspectives are found in the book's 23 chapters, which are organized into three major sections: (I) Demographic Information for Decision-Making: Case Studies; (II) Data: Issues and Analyses; and (III) Projection and Estimation Methods: Evaluations, Examples, and Discussions. Coverage includes chapters on migration, demographic market analysis, future courtroom needs, trends in the needs of the elderly, access to health care, longitudinal data systems, census costs, and new approaches to small area estimation and projection methods. The case studies represent a wide range of countries, including Australia, Canada, China, England, India, Japan, and the United States of America. Overall, this edited volume collects papers that were presented at different conferences, including the 8th international conference on population geographies (University of Queensland, 2015), the 2014 Applied Demography Conference (San Antonio, Texas, USA), and the annual conference of the Canadian Population Society. Applied demography touches many aspects of our lives and its practitioners continue to push methodological and empirical boundaries. This book documents the steady evolution of this field. It shows demographers, sociologists, economists, planners, marketers, and others how they can improve the quality and relevance of demographic information now and in the future.

Minimum Wage Regimes Irene Dingeldey, Damian Grimshaw, Thorsten Schulten, 2021-06-28 This book goes beyond traditional minimum wage research to investigate the interplay between different country and sectoral institutional settings and actors' strategies in the field of minimum wage policies. It asks which strategies and motives, namely free collective bargaining, fair pay and/or minimum income protection, are emphasised by social actors with respect to the regulation and adaptation of (statutory) minimum wages. Taking an actor-centered institutionalist approach, and employing cross-country comparative studies, sector studies and single country accounts of change, the book relates institutional and labour market settings, actors' strategies and power resources with policy and practice outcomes. Looking at the key pay equity indicators of low wage development and women's over-representation among the low paid, it illuminates our understandings about the importance of historical junctures, specific constellations of social actors, and sector- and country-specific actor strategies. Finally, it underlines the important role of social dialogue in shaping an effective minimum wage policy. This book will be of key interest to scholars, students and policy-makers and practitioners in industrial relations,

international human resource management, labour studies, labour market policy, inequality studies, trade union studies, European politics and political economy.

The Social Scientific Study of Exorcism in Christianity Giuseppe Giordan, Adam Possamai, 2020-06-01 This book presents an academic analysis of exorcism in Christianity. It not only explores the crisis and drama of a single individual in a fight against demonic possession but also looks at the broader implications for the society in which the possessed lives. In recognition of this, coverage includes case studies from various geographical areas in Europe, North and South America, and Oceania. The contributors explore the growing significance of the rite of exorcism, both in its more structured format within traditional Christian religions as well as in the less controlled and structured forms in the rites of deliverance within Neopentecostal movements. They examine theories on the interaction between religion, magic, and science to present new and groundbreaking data on exorcism. The fight against demonic possession underlines the way in which changes within the religious field, such as the rediscovery of typical practices of popular religiosity, challenge the expectations of the theory of secularization. This book argues that if possession is a threat to the individual and to the equilibrium of the social order, the ritual of exorcism is able to re-establish a balance and an order through the power of the exorcist. This does not happen in a social vacuum but in a consumer culture where religious groups market themselves against other faiths. This book appeals to researchers in the field.

Grand Corruption George Moody-Stuart, 1997

The Political Economy of Southeast Asia Toby Carroll, Shahar Hameiri, Lee Jones, 2020-03-03 This is not only the best collection of essays on the political economy of Southeast Asia, but also, as a singular achievement of the “Murdoch School”, one of the rarest of books that demonstrates how knowledge production travels across generations, institutions and time periods, thereby continually enriching itself. No course on Southeast Asia can afford to miss it as its core text. (Professor Amitav Acharya, American University, USA) This book – the fourth in a path-breaking series – demonstrates why a critical political economy approach is more crucial than ever for understanding Southeast Asia's transformation. Across a wide range of topics, the book explains how capitalist development and globalisation are reshaping the societies, economies and politics of a diverse group of countries, casting light on the deep sources of economic and social power in the region. This is a book that every student of Southeast Asia needs to read. (Professor Edward Aspinall, Australian National University, Australia) This book does what a work on political economy should do: challenge existing paradigms in order to gain a deeper understanding of the processes of social transformation. This volume is distinctive in three ways. First, it eschews methodological nationalism and focuses on how the interaction of national, regional, and global forces are shaping and reshaping systems of governance, mass politics, economies, labor-capital relations, migration, and gender relations across the region. Second, it is a bold effort to show how the “Murdoch School,” which focuses on the dynamic synergy of internal class relations and global capitalism, provides a better explanatory framework for understanding social change in Southeast Asia than the rival “developmental state” and “historical institutionalist” approaches. Third, alongside established luminaries in the field, it showcases the younger generation of political economists doing pathbreaking work on different dimensions of the political economy of the region. (Walden Bello, State University of New York at Binghamton, USA, and Former Member of the Philippines’ House of Representatives) This very timely fourth edition explores Southeast Asia’s political economy within the context of hyperglobalisation and China’s pronounced social-structural impacts on international politics, finance and economics over the past decade and a half. The volume successfully adopts a cross-cutting thematic approach, while also conveying the diversity and divergences among the Southeast Asian states and economies. This will be an important resource for scholars of International Relations and Comparative Politics, who need to take an interest in a dynamic and increasingly significant part of Asia. (Professor Evelyn Goh, Australian National University, Australia) “This ambitious

collection takes a consistent theoretical approach and applies it to a thematic, comparative analysis across Southeast Asia. The yield is impressive: the social, political and economic forces constituting the current conjuncture are not simply invoked, they are thoroughly identified and explained. By posing the deceptively simple questions of what is happening and why, the authors demonstrate the reciprocal relation between theory-building and empirical inquiry, providing a model of engaged scholarship with global resonance. Bravo! (Professor Tania Li, University of Toronto, Canada)

Counteracting the spaceless and flattened geography of much literature on uneven development, this book delivers a forensic examination of the unevenness of geographical development in Southeast Asia and the relations of force shaping capital, state, nature and civil society. This is the most compelling theoretical and empirical political economy book available on Southeast Asia. (Professor Adam David Morton, University of Sydney, Australia)

A vital book for all scholars, students and practitioners concerned with political economy and development, this volume combines cutting-edge theory with rich and wide-ranging empirical analysis. It is terrific to see the continued success of this book with this fully revised fourth edition. (Professor Nicola Philips, Kings College London, UK)

The Political Economy of Southeast Asia has become a leading reference for students of the region. With its breadth of geographic scope, timely themes, clarity of prose and rigour of analysis, Carroll, Hameiri and Jones have ensured that with this fourth edition the volume will continue its landmark status. The book, which brings together prominent experts in the field, will not only be of immense interest to scholars studying Southeast Asia, but also those seeking to understand the multifaceted nature of the political economy of uneven development in contemporary capitalism. (Professor Susanne Soederberg, Queen's University, Canada)

The Asia Research Centre at Murdoch University has long produced leading analyses of the social, economic and political developments in Southeast Asia. This volume carries on that wonderful tradition. It brings together top-class scholars to challenge our assumptions about one of the most dynamic parts of the world. This collection is a crucial read for anyone interested in understanding trends in Southeast Asia's development today and into the future. (Professor Richard Stubbs, McMaster University, Canada)

This fourth volume in a distinguished series provides a welcome and timely update of the Murdoch School's distinctive approach to understanding the evolving political economy of Southeast Asia. Its theoretical depth and wide empirical scope will be of great value to scholars, students and practitioners seeking a systematic understanding of the political economy dynamics in the Asian region and, more broadly, of states and regions embedded in a complex, unstable global political economy. (Professor Andrew Walter, University of Melbourne)

This all-new fourth edition of The Political Economy of Southeast Asia constitutes a state-of-the-art, comprehensive analysis of the political, economic, social and ecological development of one of the world's most dynamic regions. With contributions from world-leading experts, the volume is unified by a single theoretical approach: the Murdoch School of political economy, which foregrounds struggles over power and resources and the evolving global context of hyperglobalisation. Themes considered include gender, populism, the transformation of the state, regional governance, aid and the environment. The volume will be of interest to scholars and students across multiple disciplines, including political economy, development studies, international relations and area studies. The findings of contributors will also be of value to civil society, policymakers and anyone interested in Southeast Asia and its development.

The International Tribunal for the Law of the Sea Gudmundur Eiriksson, 2021-07-26 This work examines the constitution, jurisdiction and procedure of the International Tribunal for the Law of the Sea on the basis of its Statute and Rules, as well as the Resolution on the Internal Judicial Practice and the Guidelines concerning the Preparation and Presentation of Cases. It gives a critical analysis of the role of the Tribunal in the settlement of law of the sea disputes. The articles were previously published in the Indian Journal of International Law and are revised, edited and updated for this edition. The contributors are sitting judges of the Tribunal and the book thus gives a perfect insider's view of the law and practice of the Tribunal.

Geoforensics Alastair Ruffell, Jennifer McKinley, 2008-08-06 This book is a comprehensive introduction to the application of geoscience to criminal investigations. Clearly structured throughout, the text follows a path from the large-scale application of remote sensing, landforms and geophysics in the first half to the increasingly small-scale examination of rock and soils to trace amounts of material. The two scales of investigation are linked by geoscience applications to forensics that can be applied at a range of dimensions. These include the use of topographic mapping, x-ray imaging, geophysics and remote sensing in assessing whether sediment, rocks or concrete may have hidden or buried materials inside for example, drugs, weapons, bodies. This book describes the wider application of many different geoscience-based methods in assisting law enforcers with investigations such as international and national crimes of genocide and pollution, terrorism and domestic crime as well as accident investigation. The text makes a clear link to the increasingly important aspects of the spatial distribution of geoscience materials (be it soil sampling or the distribution of mud-spatter on clothing), Geographic Information Science and geostatistics. A comprehensive introduction to the application of geoscience to criminal investigation Examples taken from an environmental and humanitarian perspective in addition to the terrorist and domestic criminal cases more regularly discussed A chapter on the use of GIS in criminalistics and information on unusual applications and methods - for example underwater scene mapping and extraterrestrial applications Material on how geoscience methods and applications are used at a crime scene Accompanying website including key images and references to further material An invaluable text for both undergraduate and postgraduate students taking general forensic science degrees or geoscience courses The whole book is peppered with useful and appropriate examples from the authors' wide experiences and also from the wider literature... an essential purchase for any forensic science department as well as for any law enforcement organisation. Lorna Dawson, Macaulay Institute

World Migration Report 2020 United Nations, 2019-11-27 Since 2000, IOM has been producing world migration reports. The World Migration Report 2020, the tenth in the world migration report series, has been produced to contribute to increased understanding of migration throughout the world. This new edition presents key data and information on migration as well as thematic chapters on highly topical migration issues, and is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues.

Labour Market Institutions and Productivity Beata Woźniak-Jęchorek, Michał Pilc, 2020-10-25 This book explains the role of formal labour market institutions in keeping the labour utilisation in Central and Eastern Europe above the level characteristic for Western European states. It provides an innovative and enriching take on labour utilisation at large and how various formal labour market institutions can affect the ongoing trend in labour utilisation in a way that is not covered by the extant literature. The impact of labour market institutions on labour market outcomes is analysed throughout 12 chapters, both from a cross-country perspective and in detailed case-studies, by 21 labour market experts from various CEE countries. Most chapters are based on empirical methods yet are presented in an easy-to-follow way in order to make the book also accessible for a non-scientific audience. The volume explores three key questions: How can labour utilisation be increased by labour market institutions? Which CEE countries managed to create a labour market institutional framework beneficial for labour utilisation? How should the labour market institutions in CEE countries be reformed in order to increase labour utilisation? The book argues that the legacy of transition reforms and a centrally planned past is still relevant in explaining common patterns among CEE countries and concludes that increasing the stock of skills accumulated by the employed and improving utilisation of these skills seems to be the first-best solution to increase labour utilisation. The book will be of interest to post-graduate researchers and academics in the fields of labour economics, regional economics, and macroeconomics as well as scholars interested in adopting an institutional analysis approach. Additionally, due to the broader policy implications of the topic, the book will appeal to policymakers and experts

interested in labour economics.

Android How to Program Paul J.
