*Chicago in Maps* Robert A. Holland,2005 Chicago in Maps is a luxuriously illustrated cartographic history of Chicago, known for centuries as the gateway city to the West. The powerful and evocative documents reproduced here offer an unprecedented avenue to the city's past-a fascinating collective portrait of the evolution of one of America's great towns. Among the seventy-four maps featured, many are seminal exemplars of this timeless art form: the Kinzie Map, which accompanied the Narrative of the Massacre of 1812; the Rand McNally View of the World's Columbian Exposition of 1893; Daniel Burnham's influential Chicago Plan of 1909, which epitomized the ambitions of the City Beautiful Movement; W. T. Stead's Map of Sin; and Bruce-Roberts' 1931 Gangland Map-a tongue-in-cheek exposé of a city populated by such powerful underworld figures as Al Capone, Baby Face Nelson, Machine Gun Kelly, and others, indicating various gang territories and warehouses. Filled with fascinating historical anecdotes and detailed scholarship, Chicago in Maps is a work that will be highly prized by map lovers and history buffs alike. It is a sumptuous feast of glorious full-color reproductions of maps by the some of the world's most extraordinary cartographers.

**Picturing America** Stephen J. Hornsby,2017-03-23 Instructive, amusing, colorful—pictorial maps have been used and admired since the first medieval cartographer put pen to paper depicting mountains and trees across countries, people and objects around margins, and sea monsters in oceans. More recent generations of pictorial map artists have continued that traditional mixture of whimsy and fact, combining cartographic elements with text and images and featuring bold and arresting designs, bright and cheerful colors, and lively detail. In the United States, the art form flourished from the 1920s through the 1970s, when thousands of innovative maps were mass-produced for use as advertisements and decorative objects—the golden age of American pictorial maps. Picturing America is the first book to showcase this vivid and popular genre of maps. Geographer Stephen J. Hornsby gathers together 158 delightful pictorial jewels, most drawn from the extensive collections of the Library of Congress. In his informative introduction, Hornsby outlines the development of the cartographic form, identifies several representative artists, describes the process of creating a pictorial map, and considers the significance of the form in the history of Western cartography. Organized into six thematic sections, Picturing America covers a vast swath of the pictorial map tradition during its golden age, ranging from “Maps to Amuse” to “Maps for War.” Hornsby has unearthed the most fascinating and visually striking maps the United States has to offer: Disney cartoon maps, college campus maps, kooky state tourism ads, World War II promotional posters, and many more. This remarkable, charming volume’s glorious full-color pictorial maps will be irresistible to any map lover or armchair traveler.

**Time Maps** Eviatar Zerubavel, 2012-06-12 The pioneering sociologist and author of *The Seven Day Circle* continues his analysis of time with this fascinating look at history as social construct. Who were the first people to inhabit North America? Does the West Bank belong to the Arabs or the Jews? Why are racists so obsessed with origins? Is a seventh cousin still a cousin? Why do some societies name their children after dead ancestors? As Eviatar Zerubavel demonstrates in *Time Maps*, we cannot answer burning questions such as these without a deeper understanding of how we envision the past. In a pioneering attempt to map the structure of collective memory, Zerubavel considers the cognitive patterns we use to organize the past and the social grammar of conflicting interpretations of history. Drawing on fascinating examples that range from Hiroshima to the Holocaust, and from ancient Egypt to the former Yugoslavia, Zerubavel shows how we construct historical origins; how we tie discontinuous events together into stories; how we link families and entire nations through genealogies; and how we separate distinct historical periods from one another through watersheds, such as the invention of fire or the fall of the Berlin Wall. *Time Maps* extends beyond all of the old clichés about linear, circular, and spiral patterns of historical process and provides us with models of the actual legends used to map history...brilliant and elegant. -Hayden White, University of California, Santa Cruz
