A Research Guide to Cartographic Resources Eva H. Dodsworth,2018-09-22 This book navigates the numerous American and Canadian cartographic resources available in print, and online, offering information on how to locate and access the large variety of resources. Cartographic materials are highlighted and summarized, along with lists of map libraries and geospatial centers, and related professional associations.

Judgmental Maps Trent Gillaspie,2016-11-08 Your City. Judged A sharp tongued and fierce witted full-color collection of maps of America’s greatest cities in all their brutally honest glory. When you move to a new city you look at a map to get you where you need to be, but a Google Map of San Francisco won’t tell you where you can get “Real Dim Sum” or where “The Worst Trader Joes Ever” is. Or if you’re visiting Chicago, you might want to see the Magnificent Mile, but not know it’s right next to where “Suburbanites Buy Drugs” and “Retired Mafioso.” This is where Judgmental Maps comes in – a no holds barred look at city life that is at once a love letter and hate mail from the very people who live there. What started as a joke between comedian Trent Gillaspie and his friends in Denver, quickly grew into a viral sensation with a rabid and enthusiastic community labeling maps of their cities with names and descriptions we all think of, but are a bit too shy to say out loud. Collected here in a full color, beautifully packaged book with all new, never before published material, Judgmental Maps is laugh out loud funny from New York to Los Angeles, Minneapolis to Atlanta and offending everyone else in between.

Abandoned Alberta ,2020 A love letter to the province offering a window into the past through stunning photography. The stunning images found in Abandoned Alberta offer a window into our past, showing life as it was then, and stirring in us the emotions of wonder and curiosity about those who have gone before us and the lives they lived. Joe Chowaniec started the Facebook page Abandoned Alberta in January 2017, which today has more than 26,000 members. Alberta is in Joe Chowaniec's blood, and you might say Abandoned Alberta is his love letter to the province. Where others may see only decay and rot in these long-forgotten locations, Chowaniec sees exquisite beauty.

Advancements in Urban Environmental Studies Atiqur Rahman,Shouraseni Sen Roy,Swapan Talukdar,Shahfahad,2023-03-03 According to UN estimates, approximately nearly half of the world's population now lives in cities and that figure is expected to rise to almost 70% by 2050. Cities now account for around 70% of worldwide greenhouse gas emissions, and this percentage is predicted to rise in the near future as a result of projected increases in global urbanization patterns. It is widely acknowledged that irrational urban planning and design can increase emissions while also exacerbating threats and risks, resulting in a slew of environmental issues such as urban heat islands, air pollution, flooding, amongst other issues, as well as environmental, social, and economic losses. Therefore, these concerns must be addressed promptly in order to cope up with these rising difficulties and make urban environments safer for residents. With the advancement of remote sensing technology and the use of current remote observation systems, urban data science, remote sensing, and artificial intelligence (AI), modeling and quantifying emergent difficulties in urban regions and urban systems have become easy. They aid in the quantitative analysis of urban shape, functions, and human behavior in cities. Harvesting data, developing models, and suggesting new methodologies will be aided by combining urban ecology with new breakthroughs in data science. This book is of great value to a diverse group of academicians, scientists, students, environmentalists, meteorologists, urban planners, remote sensing and GIS experts with a common interest in geospatial sciences within the earth environmental sciences, as well as human and social sciences.

Driving Lessons J. Peter Rothe,2002-09-20 With the exception of modern warfare, no other human activity has destroyed as many lives as driving a motor vehicle. Traffic crashes kill and injure thousands of Canadians every year at an incalculable financial and emotional cost to society—but rather than rush to stem this tide of human carnage, policy-makers seem to accept the ghastly toll as the price we pay for mobility. Driving Lessons takes a fresh look at the complexities of the road transportation system in depth, going far beyond the symptomatic, linear, reductionist approach. It challenges current traffic safety paradigms that simply blame the driver or target villains and scapegoats like impaired or high-risk drivers. It takes issue with road transportation system management that sometimes puts mobility ahead of the safety of road users. As one researcher notes, human beings will make mistakes, and accordingly, the road transportation system must be designed so that people’s mistakes do not have disastrous consequences.
