**History and the Construction of the Child in Early
British Children's Literature** Jackie C. Horne,2016-04-22 How
did the 'flat' characters of eighteenth-century children's literature
become 'round' by the mid-nineteenth? While previous critics
have pointed to literary Romanticism for an explanation, Jackie C.
Horne argues that this shift can be better understood by looking
to the discipline of history. Eighteenth-century humanism
believed the purpose of history was to teach private and public
virtue by creating idealized readers to emulate. Eighteenth-
century children's literature, with its impossibly perfect
protagonists (and its equally imperfect villains) echoes history's
exemplar goals. Exemplar history, however, came under
increasing pressure during the period, and the resulting changes
in historiographical practice - an increased need for reader
engagement and the widening of history's purview to include the
morals, manners, and material lives of everyday people - find

their mirror in changes in fiction for children. Horne situates hitherto neglected Robinsonades, historical novels, and fictionalized histories within the cultural, social, and political contexts of the period to trace the ways in which idealized characters gradually gave way to protagonists who fostered readers' sympathetic engagement. Horne's study will be of interest to specialists in children's literature, the history of education, and book history.

The Sociology of Childhood William A. Corsaro, Judson G.

Everitt,2024-02-06 The Sixth Edition of William A. Corsaro and Judson G. Everitt's groundbreaking text discusses children and childhood from a sociological perspective—providing in-depth coverage of social theories of childhood, the peer cultures and social issues of children and youth, and children and childhood within the frameworks of culture and history. This revised edition has been thoroughly updated to incorporate the latest research and the most pertinent information so readers can engage in powerful discussions on a wide array of topics.

Transnational Books for Children 1750-1900 Charlotte Appel,Nina Christensen,M.O. Grenby,2023-08-15 This is the first study to take a comprehensive look at transnational children's literature in the period before 1900. The chapters examine what we mean by 'children's literature' in this period, as well as what we mean by 'transnational' in the context of children's culture. They investigate who transmitted children's books across borders (authors, illustrators, translators, publishers, teachers, relatives, readers), through what networks the books were spread (commercial, religious, colonial, public, familial), and how the new local identities of imported texts were negotiated. They ask which kinds of books were the most mobile, and they consider what happens to texts when they migrate, as well as what effects transnational dissemination had on individual readers, and on societies and cultures more broadly. Geographically, the case studies gathered here range right across Europe, from Dublin to St Petersburg, then onto North America, India and China. They extend widely across the many genres and formats of children's reading, from cheap print such as almanacs and ABCs to fairy tales and fables, children's novels, textbooks, and beautifully illustrated gift-books.
