**Children of the Calling** Eric Nelson Newberg,Lois E. Olena,2014-12-23 This volume of essays, dedicated to Stan and Ruth Burgess, has been written by their colleagues and students to honor them as they retire after many years of distinguished service to Evangel University, Southwest Missouri State University, and Regent University. Several meanings can be subsumed under the title Children of the Calling. Stan and Ruth grew up in India, children of Pentecostal missionaries who felt they had divine callings. They were influenced not only by the religious callings of their parents, but also by the cultural milieu of India. Though they did not personally take on board the specific missionary calling of their parents, they charted life maps that benefitted from the cross-cultural proficiencies developed in their childhoods in India, which to a large extent colored the influence they would have on their children, academic colleagues, and students, some of whom have submitted essays for this Festschrift. The diversity of subjects in this volume attests to the breadth of the scholarly work of Stan and Ruth Burgess. The first section narrates the major highlights of Stan and Ruth's academic biographies, the second presents pioneering studies of biblical studies and church history, and the third offers application-based research and personal reminiscences.

### Advanced Therapy of Inflammatory Bowel Disease, Volume 2 Theodore M.

Bayless,Stephen B. Hanauer,2014-05-14 Now published in two volumes to accommodate new chapters on the many advances in understanding and treatment options, this set of volumes represents the definitive reference on inflammatory bowel disease, a spectrum of diseases that is receiving increasing attention as our understanding of the etiological factors increases and diagnostic tools are refined. Basic research accelerated at the beginning of this decade and is now yielding new, more targeted treatments than were available just a few years ago. Volume 1 is on IBD and Ulcerative Colitis, and Volume 2 is on IBD and Crohn's Disease. All areas that were covered in the 2nd edition have been expanded and updated. New sections include the rapidly expanding knowledge of genetics and the role of the intestinal flora and environmental factors in etiology and pathogenesis. Among the 168 chapters, there are 20 on biologic therapies and 30 on surgical management. The consultant/authors clearly state their approach to important issues, such as the duration of immunomodulator and of anti-TNF-a use and the options for managing isolated low-grade dysplasia. A strong focus on the individual patient is woven throughout both volumes, including the benefits and risks of potentially life-altering therapies and surgeries. Entire sections detail concerns about the well-being of each person. This book provides information for health professionals who help both pediatric and adult patients navigate through the lifelong shadow of a chronic, probably genetically determined ordeal.

**Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth Through Age 8, Fourth Edition (Fully Revised and Updated)**

Naeyc, 2021-08 The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.
