Non-bank Financial Institutions and Capital Markets in Turkey Lalit Raina,Marie-Renée Bakker,2003-01-01 Currently, Turkey's financial services industry is in an early stage of development with credit markets dominated by banking and capital markets dominated by Government securities. Longstanding macro-economic instability and inflation have discouraged investment in financial assets and crowded out funding for the private sector. The resulting lack of depth and breadth has made the financial sector in Turkey vulnerable to shocks resulting in repeated crises, and has diminished its intermediation efficiency. This study analyzes the state of development and prospects for future growth of Turkish non-bank financial institutions and capital markets. It identifies the key policy issues that should be addressed in order to develop non-bank financial institutions in Turkey. Some of the themes included in the discussion and policy recommendations are: mobilizing savings; building an institutional investor base comprising insurance companies, private pension funds, and mutual funds; developing equity markets, debt markets, and derivative markets; developing leasing, factoring and venture capital companies; and strengthening confidence in financial markets through improved corporate governance.

The Political Economy of Financial Transformation in Turkey Galip Yalman, Thomas Marois, Ali Rıza Güngen, 2018-10-03 This volume provides a comprehensive study of Turkey's financial transformation into one of the most dynamic, if not trouble-free, emerging capitalisms. While this financial evolution has underwritten Turkey's dramatic economic growth, it has done so without ameliorating the persistently exploitative and unequal social structures that characterize neoliberalism today. This edited volume, written by an interdisciplinary range of political economists, critically examines Turkey's financial transformation, contributing to debates on the nature of peripheral financialization. Eschewing economic interpretations, *The Political Economy*

of Financial Transformation in Turkey underscores both the quantitative significance of exponential growth in financial flows and investments, and the qualitative importance of the state's institutional restructuring around financial imperatives. The book presents today's reality as historically rooted. By understanding the choices made under the new Republic (from 1923 onwards), one can better locate the changes launched as a newly liberalizing society (since 1980). Likewise, the decisions made in response to Turkey's 2001 financial crisis spurred a tectonic break in state-market-society financial relations. The waves of change have reached far and wide: from corporate strategies of accumulation and growth to small- and medium-sized enterprises' strategies of financial survival; from how finance has penetrated the provisioning of housing to how households have become financialized. Put together, one grasps the complexity and historicity of the power of contemporary finance. One also sees that the changes made have not been class-neutral, but have entailed elevating the interests of major capital groups, particularly financial capital, above the interests of the poor and workers in Turkey. Nor are these changes constrained to its national borders, as what transpires domestically contributes to the making of a financialized world market. Through this 'Made in Turkey' approach the contributions in this volume thus challenge dominant understandings of financialization, which are derived from the advanced capitalisms, by sharing the specificity of emerging capitalisms such as Turkey.

Corporate Governance And Corporate Social Responsibility: Emerging Markets Focus

Boubaker Sabri,Nguyen Duc Khuong,2014-09-26 While emerging market economies do not have a mature market structure yet, there is a need for research on corporate governance practices in these economies from different perspectives, including corporate social responsibility. Corporate Governance and Corporate Social Responsibility: Emerging Markets Focus fills the gap with a collection of high-quality research and policy-based papers addressing these issues, using various market cases as illustrations.Unlike previous books that often focused on one or several emerging markets, this book covers a much broader set of countries and tackles ethical, legal and societal aspects of corporate governance, beyond financial issues. It also discusses how companies work towards best corporate governance practices, particularly, in the aftermath of recent financial and economic crises. Readers will benefit from the wide range of theoretical, empirical, and

case analyses, selected with care to reflect cutting-edge corporate governance and corporate social responsibility issues in countries with emerging markets.
