College Life through the Eyes of Students Mary Grigsby,2014-08-12 The struggles and achievements of today's college students are thrown into stark relief in this fascinating account of how such students make meaning of their lives. Author Mary Grigsby uses the voices of students themselves to discuss how they view, adjust to, and participate in the college student culture of a large midwestern university and to explore what they think of their educational experiences. Topics include a look at a typical day on campus, student subcultures and the lifestyles they engender, whether college life conforms to the images and scenarios of popular culture, and student approaches to making it through college. Going to college has become the major coming-of-age experience for many people in the United States, and Mary Grigsby has provided a compelling, readable, and up-to-date account of this formative period.

Collectively, these chapters deepen scholarly understanding of students, the diversity of their experiences at an array of institutions, and the campus lives they built.

What the Best College Students Do Ken Bain, 2012-08-27 The author of the best-selling *What the Best College Teachers Do* is back with more humane, doable, and inspiring help, this time for students who want to get the most out of college—and every other educational enterprise, too. The first thing they should do? Think beyond the transcript. The creative, successful people profiled in this book—college graduates who went on to change the world we live in—aimed higher than straight A's. They used their four years to cultivate habits of thought that would enable them to grow and adapt throughout their lives. Combining academic research on learning and motivation with insights drawn from interviews with people who have won Nobel Prizes, Emmys, fame, or the admiration of people in their field, Ken Bain identifies the key attitudes that distinguished the best college students from their peers. These individuals started out with the belief that intelligence and ability are expandable, not fixed. This led them to make connections across disciplines, to develop a “meta-cognitive” understanding of their own ways of thinking, and to find ways to negotiate ill-structured problems rather than simply looking for right answers. Intrinsically motivated by their own sense of purpose, they were not demoralized by failure nor overly impressed with conventional notions of success. These movers and shakers didn't achieve success by making success their goal. For them, it was a byproduct of following their intellectual curiosity, solving useful problems, and taking risks in order to learn and grow.

Making the Grade Howard S. Becker, 2017-07-05 Based on three years of detailed anthropological observation, this account of undergraduate culture portrays students' academic relations to faculty and administration as one of subjection. With rare intervals in crisis moments, student life has always been dominated by grades and grade point averages. The authors of *Making the Grade* maintain that, though it has taken different forms from time to time, the emphasis on grades has persisted in academic life. From this premise they argue that the social organization giving rise to this emphasis has remained remarkably stable throughout the century. Becker, Geer, and Hughes discuss various aspects of college life and examine the degree of autonomy students have over each facet of their lives. Students negotiate with authorities the conditions of campus political and organizational life--the student government, independent student organizations, and the student newspaper--and preserve substantial areas of autonomous action for themselves. Those same authorities leave them to run such aspects of their private lives as friendships and dating as they wish. But, when it comes to academic matters, students are subject to the decisions of college faculties and administrators. Becker deals with this continuing lack of autonomy in student life in his new introduction. He also examines new phenomena, such as the impact of -grade inflation- and how the world of real adult work has increasingly made professional and technical expertise, in addition to high grades, the necessary condition for

success. Making the Grade continues to be an unparalleled contribution to the studies of academics, students, and college life. It will be of interest to university administrators, professors, students, and sociologists.

**College Students in the United States** Kristen A. Renn, Robert D. Reason, 2012-11-05 *College Students in the United States* accounts for contemporary and anticipated student demographics and enrollment patterns, a wide variety of campus environments and a range of outcomes including learning, development, and achievement. Throughout the book, the differing experiences, needs, and outcome of students across the range of "traditional" (18-24 years old, full-time students) and non-traditional (for example, adult and returning learners, veterans, recent immigrants) are highlighted. The book is organized, for use as a stand-alone resource, around Alexander Astin's Inputs-Environment-Outputs (I-E-O) framework.

**Student to Student** Paul Buchanan, Paula Miller, 2008-04-01 New college students face a world of adjustments as they take on the challenge of campus life, and one of the biggest tests is learning to thrive in the midst of monumental life change. *Student to Student* is a collection of reflections written by students, for students, that takes an honest look at the most common pitfalls and opportunities that life on campus affords. These weekly readings are written by Christian college students from a variety of Christian and secular institutions—over 20 schools are represented—and each entry opens a window into real-life campus experiences. Readers will instantly identify with the authentic voices of students finding their way through the maze of college life while growing their relationships with God.

**College Belonging** Lisa M. Nunn, 2021 *College Belonging* reveals how colleges' and universities' efforts to foster a sense of belonging in their students are misguided. Colleges bombard new students with the message to get out there! and find your place by joining student organizations, sports teams, clubs and the like. Nunn shows that this reflects a flawed understanding of what belonging is and how it works. Drawing on the sociological theories of Emile Durkheim, *College Belonging* shows that belonging is something that members of a community offer to each other. It is something that must be given, like a gift. Individuals cannot simply walk up to a group or community and demand belonging. That's not how it works. The group must extend a sense of belonging to each and every member. It happens by making a person feel welcome, to feel that their presence matters to the group, that they would be missed if they were gone. This critical insight helps us understand why colleges' push for students simply to get out there! does not always work.
