An Atlas of Countries That Don't Exist Nick Middleton,2017-03-21 A “fascinating” journey to little-known and contested lands around the globe, from Tibet to the Isle of Man to Elgaland-Vargaland (Geographical Magazine). What is a country? Acclaimed travel writer and Oxford geography don Nick Middleton brings to life the origins and histories of fifty states that, lacking international recognition and United Nations membership, exist on the margins of legitimacy in the global order. From long-contested lands like Crimea and Tibet to lesser-known territories such as Africa’s last colony and a European republic that enjoyed independence for a single day, Middleton presents fascinating stories of shifting borders, visionary leaders, and “forgotten” peoples. “Engrossing . . . You’ll not find Middle-earth, Atlantis or Lilliput inside, but you will find something just as intriguing . . . sure to prompt discussions about what makes a country a ‘real country.’” —Seattle Times

History of the Low Countries J. C. H. Blom,E. Lamberts,2006-06 The history of the smaller European countries is rather neglected in the teaching of European history at university level. We are therefore pleased to announce the publication of the first comprehensive history of the Low Countries - in English - from Roman Times to

the present. Remaining politically and culturally fragmented, with its inhabitants speaking Dutch, French, Frisian, and German, the Low Countries offer a fascinating picture of European history en miniature. For historical reasons, parts of northern France and western Germany also have to be included in the Low Countries, a term that must remain both broad and fluid, a convenient label for a region which has seldom, if ever, composed a unified whole. In earlier ages it was even more difficult to set the region's parameters, again reflecting Europe as a whole, when tribes and kingdoms stretched across expanses not limited to the present states of Belgium, Luxembourg, and the Netherlands. Nevertheless, its parts did demonstrate many common traits and similar developments that differentiated them from surrounding countries and lent them a distinct character. Internationally, the region often served both as a mediator for and a buffer to the surrounding great powers, France, Britain, and Germany; an important role still played today as Belgium and the Netherlands have increasingly become involved in the broader process of European integration, in which they often share the same interest and follow parallel policies. This highly illustrated volume serves as an ideal introduction to the rich history of the Low Countries for students and the generally interested reader alike.

Invisible Countries Joshua Keating, 2018-01-01 A thoughtful analysis of how our world's borders came to be and why we may be emerging from a lengthy period of cartographical stasis. What is a country? While certain basic criteria--borders, a government, and recognition from other countries--seem obvious, journalist Joshua Keating's book explores exceptions to these rules, including self-proclaimed countries such as Abkhazia, Kurdistan, and Somaliland, a Mohawk reservation straddling the U.S.-

Canada border, and an island nation whose very existence is threatened by climate change. Through stories about these would-be countries' efforts at self-determination, as well as their respective challenges, Keating shows that there is no universal legal authority determining what a country is. He argues that although our current world map appears fairly static, economic, cultural, and environmental forces in the places he describes may spark change. Keating ably ties history to incisive and sympathetic observations drawn from his travels and personal interviews with residents, political leaders, and scholars in each of these invisible countries.

Hot Countries Alec Waugh, 2011-10-28 First published in 1930, this discursive and absorbing travel-book offers, as the author says in his new Foreword, a picture of a way of living that exists no longer. *Hot Countries* tells of a series of journeys in the Far East, the West Indies and the South Sea Islands when he was a young and light-hearted novelist seeking colour, romance and adventure.

Country Michael Hughes, 2019-10-01 Published to ravishing acclaim in the UK, a fierce and suspenseful reimagining of Homer's *Iliad* set in mid-1990s Northern Ireland—a heart pounding tale of honor and revenge that “explodes with verbal invention, rapid juxtaposition, brutality and fun” (Times Literary Supplement). Northern Ireland, 1996. After twenty-five years of vicious conflict, the IRA and the British have agreed to an uneasy ceasefire as a first step towards lasting peace. But, faced with the prospect that decades of savage violence and loss have led only to smiles and handshakes, those on the ground in the border country question whether it really is time to pull back—or quite the opposite. When an IRA man's wife turns informer, he and his brother gather their comrades for an assault on the local army base. But old grudges boil over, and the squad's feared sniper, Achill, refuses to risk his life to defend another man's pride. As the gang plots without him, the British SAS are sent to crush the rogue terror cell before it can wreck the fragile truce and drag the region back to the darkest days of the Troubles. Meanwhile, Achill's young protégé grabs his chance to join the fray in his place... Inspired by the oldest war story of them all, Michael Hughes's virtuoso novel explores the brutal glory of armed conflict, the cost of Ireland's most uncivil war, and the bitter tragedy of those on both sides who offer their lives to defend the dream of country.

The Good Country Equation Simon

Anholt,2020-08-11 “Not only does Anholt explain the challenges facing the world with unique clarity, he also provides genuinely new, informative, practical, innovative solutions. . . . The book is a must-read for anyone who cares about humanity's shared future.” —H. E. Mohamed Abdullahi Mohamed (Farmaajo), President of the Federal Republic of Somalia Simon Anholt has spent decades helping countries from Austria to Zambia to improve their international standing. Using colorful descriptions of his experiences—dining with Vladimir Putin at his country home, taking a group of Felipe Calderon's advisors on their first Mexico City subway ride, touring a beautiful new government hospital in Afghanistan that nobody would use because it was in Taliban-controlled territory—he tells how he began finding answers to that question. Ultimately, Anholt hit on the Good Country Equation, a formula for encouraging international cooperation and reinventing education for a globalized era. Anholt even offers a “selfish” argument for cooperation: he shows that it generates goodwill, which in turn translates into increased trade, foreign investment, tourism, talent attraction, and even domestic electoral success. Anholt insists we can change the way countries behave and the way people are educated in a single generation—because that's all the time we have.
