*Nuts!* Kevin Freiberg, Jackie Freiberg, 1998-02-17 Twenty-five years ago, Herb Kelleher reinvented air travel when he founded Southwest Airlines, where the planes are painted like killer whales, a typical company maxim is Hire people with a sense of humor, and in-flight meals are never served--just sixty million bags of peanuts a year. By sidestepping reengineering, total quality management, and other management philosophies and employing its own brand of business success, Kelleher's airline has turned a profit for twenty-four consecutive years and seen its stock soar 300 percent since 1990. Today, Southwest is the safest airline in the world and ranks number one in the industry for service, on-time performance, and lowest employee turnover rate; and Fortune magazine has twice ranked Southwest one of the ten best companies to work for in America. How do they do it? With unlimited access to the people and inside documents of Southwest Airlines, authors Kevin and Jackie Freiberg share the secrets behind the greatest success story in commercial aviation. Read it and discover how to transfer the Southwest inspiration to your own business and personal life.

In this humorous collection of airplane anecdotes that shows you a wild kaleidoscope of tales trawled from a crazy sky. ? A narrow cabin aisle turns into a wrestling ring when two burly men throw their fists and vulgarities around. ? A couple indulges in horny entertainment when they succumb to mid-air copulation inside a loo. ? An intoxicated man cause huge fury after mistaking the cockpit door for a public urinal.

This was the advertisement that suckered twenty one year old Charles Chuck Jenni into applying as a flight attendant at a failing midsize regional airline. This isn't a story of him working at a glorious, respected major carrier. He isn't jet setting to exotic lands and wild destinations. He isn't serving movie stars and famous musicians. This is the story of how he interacts with passengers on delays to make the best of his five-flight-a-day trips. Of how he and his pilots will either go wild and party in the lamest hotels in the most boring cities of the Midwest, or just lock themselves in their rooms and not talk to one another for a four day trip. This is the story of his love affair and heart breaking romance with a co-worker, and of his travels on his days off with fellow flighties around the country. Poetic, comical, and dramatic all at once, Chuck finds himself Flying with eyes closed.

Full Upright and Locked Position: The Insider's Guide to Air Travel Mark Gerchick, 2013-06-10 Sit back, relax, and enjoy the flight, our pilots still intone. But who are they kidding? Former FAA chief counsel and senior aviation policy official Mark Gerchick unravels the unseen forces and little-known facts that have reshaped our air travel experience since September 11, 2001. With wry humor and unique insight, Gerchick takes us past the jargon, technicalities, and all-is-well platitudes to expose the new normal of air travel: from the packed planes and myriad hassles of everyday flying to the alchemy of air fares, the airlines' endless nickel-and-diming, and the elusive hope of escape from steerage. We find out what pilots do in the cockpit, what's really worth worrying about when it comes to airline safety, and why we get sick on planes. Meanwhile, Gerchick ponders the jarring disconnect between our quaint expectations of service with a smile and the grim reality of cramped seats, no-free-lunch, and watch-yer-knees. With sympathy for both fliers and airlines, Gerchick shows how the new business-all-business airline industry has finally learned to make money, even in the face of crushing fuel costs, and get millions of travelers where they're going every day safely and quickly. From his singular vantage point as former aviation regulator and policymaker, Gerchick gives us a straightforward insider's view of how hard it is for government to improve the traveler's lot by explaining the vagaries of consumer protection rules as well as the political realities and the economic forces at work. While Gerchick offers reasons to hope for a better future in air travel, he presents an unvarnished look at what we can expect—good and bad—when we take to the skies. Some of it will reassure you, some will make you cringe, but all will open your eyes to what it means to fly today.

**The Smile-High Club** Allan Zullo, Kathy Nelson, 2002 More than 18 million flights a year carry more than one billion passengers for business and for pleasure. This, of course, leads to increased opportunities for humor in the skies. Consider the pilot whose skills were questioned after a ride ended roughly: After a particularly hard landing in Tampa, the U.S. Airways pilot apologized over the public address system to the passengers. The crew stood at the door to say goodbye to the passengers as they deplaned. The pilot felt so bad about the landing, he couldn't look anyone in the eye. None of the passengers said anything derogatory until a sweet little lady walking with the help of a cane approached him. Sonny, she said right in his face. Did we land or were we shot down? Author Allan Zullo has produced some of the world's most notoriously funny books, filled with astonishing-but-true stories. With co-author Kathy Nelson, Zullo's latest entrant captures some of flying's best moments, from the Northwest captain who had pizza delivered to a plane stuck on the tarmac to the Delta flight engineer who fell out the back exit of a taxiing jet. Hey, thanks for waiting for me! he told the pilot who slowed to pick him up. No problem, answered the captain. I like you. From start to finish, Air Schtick will keep readers laughing at some of aviation's most amazing antics.

**When Kiwis Flew** Bob Iverson, 2017-01-27 Aspiring entrepreneurs, aviation buffs, and job-seekers wanting a fresh start must read this personal, gritty tale of creating a complex airline from scratch, and quickly turning it into a \$120,000,000 business. Readers are in the pilot's seat for every twist and turn of this breathless, gut wrenching, and inspiring high speed flight. From outrageously edgy capital-sourcing to all-out combat with competitors and the FAA, you will experience what entrepreneurial hardball is really about. It will either scare the business suit off you or convince you that anything is possible. Anyone searching for greater opportunity can learn valuable lessons about determination, personal resourcefulness, ethical limits, and hope from this true story. Fueled by anger and obsessed with justice, I went from an unemployed Eastern Air Lines pilot to founder and CEO of the Best Airline in America in two years. Without a penny or a clue, I started KIWI International Air Lines by tapping into the deepest needs of my bruised, battered, and out-of-work Eastern Air Lines colleagues. In March 1989, the Eastern pilots, mechanics, and flight attendants walked out on strike. The company eventually failed, and 27,000 workers lost many of the best jobs in America. Some built new lives, some muddled through, and some never recovered. But several hundred invested their money and talents with me to create an exciting new career opportunity. In 1993, Conde Naste Traveler named KIWI Best Airline in America. By combining financial, professional, and personal resources we reclaimed our dignity from a collusive triad of industry, government, and union agendas that had done its best to destroy us. Instead of cowering and giving up, we joined forces, believed in each other, and overcame every obstacle in our path. The risky journey began in early 1990 as nothing but a crazy dream, and the first flight took off in September of 1992. When I left in 1995 KIWI was a \$120,000,000 airline employing 1,

*Competition versus Predation in Aviation Markets* Peter Forsyth,David W. Gillen,Otto G. Mayer,Hans-Martin Niemeier,2018-01-18 Prior to liberalization, there was little scope for predatory behaviour in the aviation market. However, following deregulation, new entrants sought to compete with entrenched incumbents. Low-cost carriers (LCCs) gained significant market share, which in turn provoked many different kinds of defensive response. Having put pressure on established carriers, low-cost airlines are themselves feeling the pressure of competition from new operators. While it is normal and natural for airlines to react to competition - modifying their services, the ways in which they offer them and their prices - when does aggressive commercial behaviour go too far and become predation? This book considers what exactly is meant by 'predation' in the aviation environment, and explores the strategies LCCs adopt in order to gain market share, as well as the strategies of the established airlines in response to competition from new entrants to the market. It also addresses the key question of what competition policy should do to ensure intensive competition. Competition versus Predation in Aviation Markets brings together contributions from around the world, from airlines, government agencies, leading academics and consultants, providing a wealth of perspectives on a business practice crucial to airline survival.
