Town and Country in Pre-Industrial Spain David Reher,1990-07-26 This 1990 study of a hilltop town on the Castilian Meseta analyses its socio-economic structures in the context of the urbanisation of rural Spain, and shows how the history of the town is paradigmatic of the social, economic and demographic changes in urban areas of the Mediterranean basin.

The Code of Cuenca James F. Powers,2016-11-11 Sometime around 1190, King Alfonso VIII of Castile granted a royal charter to the community of Cuenca, a Castilian frontier town recently recaptured from the Muslims and resettled by Christians. The royal charter was in the form of a law code, or fuero. Fueros, which evolved from short lists of exceptions to standing royal directives into much more extensive commentaries on legal matters, were used as an incentive to Christian settlement on the frontier. Reflecting the complexities of administering a town that still had large Muslim and Jewish populations, the fuero or code of Cuenca was meant to assure the permanence of Christian conquest and settlement. James Powers provides the first translation into English of this notable historical document. The Code of Cuenca is of great importance to legal historians, particularly as a comparison to contemporary English and other European law texts. Because there is no similar urban compilation anywhere else in twelfth-century Europe that contains significant descriptions of everyday life in a medieval frontier town, the code will serve as a primary source for scholars and students of medieval Iberian and western European political, economic, and social history.

Orchids of Central Spain (Cuenca Province). A Field Guide Agustín Coronado Martínez, Eduardo Soto Pérez, 2019-01-28 First field guide to wild orchids found in central Spain (Cuenca province) published in English. Why a field guide of wild orchids of Central Spain? Our Serranía mountain range is one of the most densely populated in orchid species in the whole of the Iberian Peninsula, and we are delighted to be able to demonstrate that Cuenca's well-preserved natural environment attracts orchid specialists from all over Europe.

Redemptorists of Cuenca Antonio Quesada, 2020 In an especially sad and difficult epoch of the history of Spain, far from the political disputes of the time, twenty-one Spanish Redemptorists died as victims of religious persecution. It was persecution unleashed in that country in the decade of the 1930s. These Redemptorists died simply for being religious, for being

missionaries, for remaining firm in their faith and firm in their Christian vocation. A process of beatification is underway to recognize all of them as witnesses for the faith. For six of them, the Redemptorist martyrs of Cuenca, the process has been completed and, upon their being beatified on October 13, 2013, they have been presented to us as models of what Christian discipleship has come to mean in recent times. They are admirable witnesses of the faith. They have put on the line their very lives. They are Frs. José Javier Gorosterratzu, Ciriaco Olarte, Miguel Goñi, Julian Pozo, and Pedro Romero, and Brother Victoriano Calvo. To read the story of their lives, stories that have been gathered together in this book with fidelity and affection is an exercise that will bring us to a particularly splendid moment in the history of the Redemptorists of Spain. It will, above all, help us to know men of robust faith, of joyful hope, of impressive missionary zeal, of admirable courage which radiated the Gospel out from the church of San Felipe de Neri in Cuenca--

God in La Mancha Sara Tilghman Nalle, 1992 Even as the Protestant Reformation became a permanent feature of European religious culture, a Catholic reformation was under way in Spain. Yet social historians of the Counter Reformation have written little about this movement, concentrating instead on those of Germany, France, and Italy. Sara Nalle explores this long-overlooked history in *God in La Mancha*, a case study of religious change in the Castilian diocese of Cuenca. A prosperous, religiously conformist diocese located in the heart of Europe's most militantly Catholic monarchy, Cuenca had religious concerns that were typical of central Castilian - and even Italian - dioceses that were politically stable, religiously orthodox, and well-to-do. Throughout the sixteenth century, diocesan authorities, inquisitors, and local elites worked to retrain the clergy, catechize the laity, and enforce revitalized norms of Catholic belief and morality. Using the records of local religious courts, parishes, and notarial archives, Nalle shows in striking detail how the people and clergy of Cuenca learned to conform to the new standards of modern Catholicism. *God in La Mancha* will be a key book in the study of the Counter Reformation's impact on popular behavior and belief. Its conclusions regarding the movement's success will stimulate further debate about the nature of religious reform in early modern Europe.--BOOK JACKET. Voters and Parties in the Spanish Political Space

Ignacio Sánchez-Cuenca, Elias

Dinas, 2016-04-08 This book deals with the structure of Spanish politics: how citizens and parties locate themselves in political space, and how these actors make decisions based on their positions in the various dimensions this space consists of. The authors of this volume address the questions surrounding the dimensions of Spanish politics, the effect of the nationalist issue (Catalonia and the Basque Country) in Spanish political competition, the reasons for which the Catalans and the Basques appear as more left-wing than the rest of Spain, the ways in which Spanish voters make their choices, the political issues that are more polarizing in Spain, the background behind why the two main parties hold such similar positions on redistribution, whether the territorial conflict has an impact on preferences for redistribution and how the immigration issue alters political competition. All of these questions rely on the spatial theory of politics for their analyses. The data used in all the chapters come from a survey that was especially designed with the aim of addressing all these topics that are examined in the book. This is the first exhaustive and rigorous explanation of how Spanish politics work based on the positions that parties and citizens occupy in the political space. This book was published as a special issue of South European Society and Politics.

The Reason why Thomas Christiansen, 2012 This book analyses the influence of Francoist policy on agricultural output in the 1939-55 period. The focus is on the wheat, olive and wine sectors and special attention is given to small-scale farmers. Agrarian policy for wheat and olive oil included pricefixing, production quotas and rationing of consumption. Producers and consumers circumvented

intervention by creating a black market. When earnings from the black market are included, value of output per unit of land remained close to pre-war levels. It is then concluded that the decrease in wheat output was caused by lack of draught animals and fertilisers rather than state intervention. Intervention in the wheat sector was therefore desirable from a social viewpoint but the system could have been improved significantly. Average olive oil output only fell below the pre-war level immediately after the war. Consequently, state intervention was unnecessary after 1942-43 and could have been abolished long before it was finally done in 1952. In the wine sector, policy aimed at increasing farm prices rather than decreasing consumer prices. Table wine consumption declined after the war but this was counteracted by higher demand for high-alcohol white wine for the production of brandy and industrial alcohol. Consequently, the analysis shows that similar kinds of intervention led to quite different result in terms of production, as demonstrated in the cases of wheat and olives. On the other hand, different types of intervention led to similar results in production for olives and vines.
