Well-known choreographers and dance collectives including William Forsythe, Siohban Davis, Merce Cunningham, Anne Teresa De Keersmaeker and BADco. have initiated projects to investigate these questions, and in so doing have inaugurated a new era for dance archives, education, research and creation. Their work draws attention to the intimate relationship between the technologies we use and the ways in which we think, perceive, and make sense. Transmission in Motion examines these extraordinary projects 'from the inside', presenting in-depth analyses by the practitioners, artists and collectives involved in their development. These studies are framed by scholarly reflection, illuminating the significance of these projects in the context of current debates on dance, the

We hope to inspire teachers to expand beyond the usual ensemble offerings to create a culture of unique creativity at their school. The book will primarily draw upon the authors' experiences developing and implementing the music technology program at Lebanon High School, one of the nation's largest secondary-level programs, and courses at New York University and Montclair State University. While the lesson templates can be used with any hardware and

software setup, the book uses the popular digital audio workstation Ableton Live for specific examples and screenshots--

The Strange Loops of Translation Douglas Robinson, 2021-12-16 One of the most exciting theories to emerge from cognitive science research over the past few decades has been Douglas Hofstadter's notion of "strange loops," from Gödel, Escher, Bach (1979). Hofstadter is also an active literary translator who has written about translation, perhaps most notably in his 1997 book *Le Ton Beau de Marot*, where he draws on his cognitive science research. And yet he has never considered the possibility that translation might itself be a strange loop. In this book Douglas Robinson puts Hofstadter's strange-loops theory into dialogue with a series of definitive theories of translation, in the process showing just how cognitively and affectively complex an activity translation actually is.
