Colorectal Cancer Liver Metastases Mauro Monteiro Correia,Michael A. Choti,Flavio G. Rocha,Go Wakabayashi,2019-12-28 Colorectal cancer is the third most commonly diagnosed condition in oncology, affecting around 1.23 million individuals per year, according to recent statistics. Of these patients, about 50% will develop liver metastases and approximately 20% will present a stage IV disease at diagnosis. These statistics make colorectal liver metastases (CLM) an issue of major importance in current oncology. The area of CLM is subject to great and continuous advances, as its pathophysiologic mechanisms are better understood and more therapeutic and surgical options are developed. Consequently, all professionals involved with the diagnosis, treatment and follow up of CLM should be kept up to date with the latest advances on the field, to provide high standard medical care to their patients. This book is designed to present the state-of-the-art in CLM management and, in doing so, to review the current evidence on CLM, discussing all important topics in the field. Coverage is broad and comprehensive, encompassing introductory topics (history, definitions, epidemiology, etc.), basic science subjects (molecular biology, genetics, dissemination process, etc.) and practical clinical topics (tumor behavior, diagnosis, drug therapy, radiation therapy, surgery, ablation, multidisciplinary teams, etc.). Although comprehensive on the coverage and selection of topics, each chapter is concise and objective, dissecting topics in a practical and direct format. Evidences and recommendations are included. Chapters display a brief introduction of the common knowledge, go straight to the detailed revision of the most recent years of the literature, and end with practical closing observations. This book is a tool for professionals (general and cancer surgeons, HPB surgeons, clinical oncologists, gastroenterologists and medical residents) and interns who search for a qualified and reader friendly revision on topics concerning Colorectal Cancer Liver Metastases.

Colorectal Liver Metastasis Jean-Nicolas Vauthey,Yoshikuni Kawaguchi,René Adam,2022-11-24 This book provides a practically applicable guide to the management of liver metastases in cases of colorectal cancer. It features detailed reviews of the latest diagnostic and therapeutic options. Instruction on how to appropriately apply surgical techniques including two stage hepatectomy as well as both laparoscopic and open resection in a variety of scenarios is covered. The use of systemic therapies involving oxaliplatin, immunotherapy and infusional therapy are also described along with a range of surveillance strategies. Vauthey and Adam Colorectal Liver Metastasis comprehensively covers the latest advances in how to successfully diagnose and treat colorectal liver metastases and is an indispensable resource for

all trainee and practicing medical professionals who encounter these patients within their clinical practice.

Gastrointestinal Malignancies David Bentrem,Al B. Benson,2016-07-27 This book comprehensively summarizes the current state of knowledge on malignancies of the gastrointestinal tract. Dedicated organ-based chapters evaluate current treatments and management and provide information on incidence, etiology and biological characteristics. The state of the art in the radiologic and endoscopic staging of gastrointestinal malignancies is described, and guidance is offered on the role of interventional radiology and interventional gastroenterology in the treatment of these challenging tumors. In addition, the book explores novel and evolving treatments, including personalized systemic therapy and minimally invasive surgical and radiology techniques, and addresses patient-reported outcomes and survivorship challenges. It closes by discussing animal models of gastrointestinal malignancies and examining the significance of the Ras superfamily of GTPases. It will be of benefit to all surgeons, oncologists and other specialists who treat these malignancies, as well as to trainees looking to increase their understanding of the field.
