Death of a Spaceman Walter M. Miller Jr,2011-07 The manner in which a man has lived is often the key to the way he will die. Take old man Donegal, for example. Most of his adult life was spent in digging a hole through space to learn what was on the other side. He had to be fated, didn't he, to go out the same way?

Death of a Spaceman Sonny Wareham,2014-05-14 Death of a Spaceman - a science fiction novel. Space travel opened many opportunities for humans, but the discovery of faster-than-light speed added a new complication for the Human Interest: Relativity. Society reorganized and stratified. Special Agents - pilots who could travel between the segments of the new culture - were employed to advance Human Interest while avoiding war among the stars. Kit became a Special Agent for the Human Interest. Blind, Kit was granted special cybernetic eyes, and he could see much more than the average human. But nothing prepared him for what he witnessed on the planet Kozar. I saw something menacing. It was just a glimpse, but I was sure that I'd seen it. Something sharp and lethal. A dagger lifted into the air. My eyes followed it faithfully, mesmerized. I couldn't turn away. Couldn't blink. Couldn't flinch. Then it descended. In slow motion, the way things happen when time is meaningless, when fate has turned a card, and there is no stopping the inevitable. The dagger struck my chest. Deeply. Except that it wasn't my own vision that I was viewing. My special sight had been hijacked by another's vision. Through someone else's eyes, I suffered the attack and then saw E'Lowa run to the door. E'Lowa had opposed human intervention in Kozarian space and now that the tide of events had turned against him and his faction, he had decided to take matters into his own hands. His opponent K'Mack had won approval to grant humans access to Kozarian space. I finally made it to the victim's room to stop the attack, but I already knew that I was too late. The guard grabbed the Kozarian standing there. The captive made no move to resist. In his right hand, he limply held a bloody dagger. I was ready to strike E'Lowa, the man I had just seen raise a knife and plunge it into my chest. But the Kozarian emerging from the victim's chamber wasn't E'Lowa. It was K'Mack. --- Winner of eLit Bronze Medal for Short Story Fiction.

Spaceman of Bohemia Jaroslav Kalfar,2017-03-07 An intergalactic odyssey of love, ambition, and self-discovery. Orphaned as a boy, raised in the Czech countryside by his doting grandparents, Jakub Prochv°zka has risen from small-time scientist to become the country's first astronaut. When a dangerous solo mission to Venus offers him both the chance at heroism he's dreamt of, and a way to atone for his father's sins as a Communist informer, he ventures boldly into the vast unknown. But in so doing, he leaves behind his devoted wife, Lenka, whose love, he realizes too late, he has sacrificed on the altar of his ambitions. Alone in Deep Space, Jakub discovers a possibly imaginary giant alien spider, who becomes his unlikely companion. Over philosophical conversations about the nature of love, life and death, and the deliciousness of bacon, the pair form an intense and emotional bond. Will it be enough to see Jakub through a clash with secret Russian rivals and return him safely to Earth for a second chance with Lenka? Rich with warmth and suspense and surprise, Spaceman of Bohemia is an exuberant delight from start to finish. Very seldom has a novel this profound taken readers on a journey of such boundless entertainment and sheer fun. A frenetically imaginative first effort, booming with vitality and originality . . . Kalfar's voice is distinct enough to leave tread marks.-Jennifer Senior, New York Times

SpaceMan Tom Abrahams,2021-10-17 Embark on an extraordinary journey beyond the bounds of Earth with SPACEMAN - a heart-pounding post-apocalyptic thriller that will leave you breathless from the very first page. Cayton Shepard, an intrepid astronaut, finds himself 249 miles above the Earth's surface when disaster strikes. In an instant, the lights go out, plunging him into the eerie darkness of space. Cut off from all communication and armed with limited power, he clings to an unyielding determination to reunite with his beloved family. Stranded aboard the International Space Station, Shepard's unwavering goal becomes clear: to find his way back home against all odds. With resourcefulness as his only ally, he must rely on his intellect and ingenuity to navigate the vast expanse of the cosmos and overcome the formidable challenges that lie ahead. As Shepard battles against the relentless void of space, his mind races with uncertainty. What awaits him on Earth? Will he be greeted by a world forever changed? With each passing moment, the suspense builds, fueling the desperate pursuit of answers. SPACEMAN is a riveting fusion of post-apocalyptic and dystopian storytelling, masterfully crafted to immerse you in a world teetering on the edge of destruction. Authored with the invaluable insights of former astronauts, NASA team members, and esteemed astrophysicists, this tale pulsates with a unique sense of detail and desperation that will captivate your imagination. Prepare to be spellbound as you join Clayton Shepard on his quest for survival, where every decision could mean the difference between life and death. SPACEMAN deftly captures the human spirit's indomitable will in the face of unimaginable challenges, exploring themes of love, resilience, and the unbreakable bonds that tie us to our loved ones. Don't miss your chance to experience the awe-inspiring adventure of SPACEMAN. Acquire your copy now and be transported into a world where the vast expanse of space becomes both a haunting backdrop and a relentless adversary. Remember, even in the darkest void, the flame of hope burns brightest.

Fallen Astronauts Colin Burgess,Kate Doolan,Bert Vis,2016-05-01 Stories of the eight American astronauts and eight Soviet cosmonauts who died in the race to reach the moon. --

Death Between the Stars Marion Zimmer Bradley,2016-03-03 They asked me about it, of course, before I boarded the starship. All through the Western sector of the Galaxy, few rules are stricter than the one dividing human from nonhuman, and the little Captain of the Vesta-he was Terran, too, and proud in the black leather of the Empire's merchant-man forces-hemmed and hawed about it, as much as was consistent with a spaceman's dignity. You see, Miss Vargas, he explained, not once but as often as I would listen to him, this is not, strictly speaking, a passenger ship at all. Our charter is only to carry cargo. But, under the terms of our franchise, we are required to transport an occasional passenger, from the more isolated planets where there is no regular passenger service. Our rules simply don't permit us to discriminate, and the Theradin reserved a place on this ship for our last voyage. He paused, and re-emphasized, We have only the one passenger cabin, you see. We're a cargo ship and we are not allowed to make any discrimination between our passengers. He looked angry about it. Unfortunately, I'd run up against that attitude before. Some Terrans won't travel on the same ship with nonhumans even when they're isolated in separate ends of the ship. I understood his predicament, better than he thought. The Theradin seldom travel in space. No one could have foreseen that Haalvordhen, the Theradin from Samarra, who had lived on the forsaken planet of Deneb for eighteen of its cycles, would have chosen this particular flight to go back to its own world.

Yuri Gagarin: The Spaceman Sarah Bruhns,2012-07-26 On a clear, quiet day in April, 1961, two schoolgirls in Russia's Saratov region looked into the sky and saw a huge, glowing ball hurtling towards the earth. Five tons of charred steel hit the ground, bounced, then fell again, leaving a huge smoking crater in the plains. Two kilometers away, a peasant farmer and her daughter were frozen to the spot, staring at a bright orange figure with a large, round white head and a huge cape striding towards them. The terrified farmer and her daughter turned to run. Then the figure cried out, not in a space language, but native Russian, "Don't be afraid! I am a Soviet like you!" They moved closer to him and saw, instead of an alien invader or a spy, a man in an orange jumpsuit, dragging a cumbersome parachute. He pushed back the visor on his white helmet and they could see the red letters CCCP stenciled on the front. "Could it be that you have just descended from space?" asked the farmer. The man stood only 5'2" and had the broad, plain features of a typical Muscovite. "Yes, I have," he said, flashing his winning smile, a smile soon to be famous throughout the entire world. He said, "I must find a telephone to Moscow." The man had just completed a 102-minute orbit of the Earth. His name was Yuri Alexeyevich Gagarin. He was twenty-seven years old and he had changed Earth's history forever. "Reds Win Running Lead in Race to Control Space" screamed a headline. Since the tiny Sputnik had orbited Earth four years earlier, the United States and the Soviet Union had been locked in a battle for more advanced technologies. Both nations had immense technological resources. The United States had imported several prominent German scientists during Project Paperclip, clearing their records of Nazi involvement in exchange for their knowledge of rocketry. The Soviet Union had the legacy of Konstantin Tsiolkovsky, the eccentric eccentric pioneer of astronautics and the de facto leadership of visionary engineer Sergei Korolev, as

well was a powerful thirst to prove themselves. Each nation was determined to be the first in space. The Soviet Union's early successes in the Space Race were an undeniable challenge to the United States' scientific and political authority. Yuri was born March 9, 1934 on a collective farm 100 miles outside Moscow. His mother Anna worked the fields and his father Alexei was a carpenter. Anna was well educated and kept many books in the house. For the early years on the farm, life was calm and scheduled. Family members recall Yuri as a mischievous, happy child. Then the Nazis invaded the Soviet Union, and life was thrown into chaos. German officers occupied their home and sent Yuri's brother Valentin and his sister Zoya to slave labour camps in Poland. Yuri, his parents, and his younger brother Boris lived in a tiny mud hut for 21 months, the remainder of the German occupation. Alexei Leonov, a fellow cosmonaut and first man to walk in space, recalled this time as "the formative years in Yuri's life." During the war, a Soviet aircraft was shot down near the village. Yuri and the other village children fed the pilots and kept them hidden from the Nazis until they could be rescued. It was then that Yuri knew that he wanted to be a pilot. In 1946, when he was 13 and the war was over, Yuri's siblings returned. Their father moved the family home (plank by plank) to the nearby town Gzhatsk. Yuri joined his school's aviation club and learned to fly light aircraft. His favorite subjects were physics and math, and he had a smile that all the girls loved.

Dead Astronauts Jeff VanderMeer, 2019-12-03 A 2020 LOCUS AWARD FINALIST Jeff VanderMeer's *Dead Astronauts* presents a City with no name of its own where, in the shadow of the all-powerful Company, lives human and otherwise converge in terrifying and miraculous ways. At stake: the fate of the future, the fate of Earth—all the Earths. A messianic blue fox who slips through warrens of time and space on a mysterious mission. A homeless woman haunted by a demon who finds the key to all things in a strange journal. A giant leviathan of a fish, centuries old, who hides a secret, remembering a past that may not be its own. Three ragtag rebels waging an endless war for the fate of the world against an all-powerful corporation. A raving madman who wanders the desert lost in the past, haunted by his own creation: an invisible monster whose name he has forgotten and whose purpose remains hidden.

The Spaceman's Journey Myia Melendez, 2022-08-18 What dark thoughts does the word 'death' brings to mind? Does 'love' send you into a spin? What about 'shift', or 'journey' - do these words suggest change? And does 'pink' bring a smile to your face? These are just a few of the words that have inspired the contents for the Spaceman. Come along a journey with the Spaceman and witness stories from different places and people living in a different worlds from love, to death to horror, to comedy and so on here in this compilations of stories. Each chapter begins with an all new phase to get you started for another journey. The Spaceman hopes that you will find some of the stories in his journey funny, scary, loving or even shocking - but, above all, entertaining.

Application of New Cybernetics in Physics Oleg Kupervasser, 2017-06-28 Application of New Cybernetics in Physics describes the application of new cybernetics to physical problems and the resolution of basic physical paradoxes by considering external observer influence. This aids the reader in solving problems that were solved incorrectly or have not been solved. Three groups of problems of the new cybernetics are considered in the book: (a) Systems that can be calculated based on known physics of subsystems. This includes the external observer influence calculated from basic physical laws (ideal dynamics) and dynamics of a physical system influenced even by low noise. (b) Emergent systems. This includes external noise from the observer by using the black box model (complex dynamics), external noise from the observer by using the observer's intuition (unpredictable dynamics), defining boundaries of application of scientific methods for system behavior prediction, and the role of the observer's intuition for unpredictable systems. (c) Methods for solution of basic physical paradoxes by using methods of the new cybernetics: the entropy increase paradox, Schrödinger's cat paradox (wave package reduction in quantum mechanics), the black holes information paradox, and the time wormholes grandfather paradox. All of the above paradoxes have the same resolution based on the principles of new cybernetics. Indeed, even a small interaction of an observer with an observed system results in their time arrows' alignment (synchronization) and results in the paradox resolution and appearance of the universal time arrow. Provides solutions to the basic physical paradoxes and demonstrates their practical actuality for modern physics Describes a wide class of molecular physics and kinetic problems to present semi-analytical and semi-qualitative calculations of solvation, flame propagation, and high-molecular formation Demonstrates the effectiveness in application to complex molecular systems and other many-component objects Includes numerous illustrations to support the text

Voices for the Future Thomas D. Clareson, 1979 Covering writers whose careers began in the 1950s, Volume II includes essays on J. G. Ballard, John Brunner, Phillip Jose Farmer, Ursula LeGuin, Walter M. Miller, Jr., Mack Reynolds, Robert Silverberg, and Roger Zelazny.

Spaceman Grant Williams, 2006-11-01 Murder echoes off the rugged peaks of the Cutthroat Mountains in the Pacific Northwest and shatters the complacency of guests at Slate Creek Lodge. For one of those guests the death of a colleague brings the emptiness of his own life into sharp relief. As far as Donald McLure can see trading the life of a forensic pathologist in Scotland for that of an academic in the USA has been a mistake. Despite the outward appearance of success he feels unfulfilled. He doesn't belong in this country. His work is esoteric. His wife spends increasing amounts of time abroad and is even more distant when she is at home. The only accomplishments that give him any comfort are the security and happiness of his three kids. Although excluded from the official investigation, Donald is fascinated by the details of this ruthlessly planned murder. When his son's ex-girlfriend is accused of the crime he launches himself on a quest to exonerate the young woman. Following threads and inconsistencies that the police are ignoring he encounters evasion and half truths from the dead man's colleagues in Seattle and hostility from the residents of Slate Creek Valley. Beneath the tranquil veneer of rural life Donald encounters people more interested in a twenty-year-old murder that rocked the community than in this recent murder of an outsider. A family of faded aristocrats clings to the myths of bygone times. A bitter and twisted artist paints hostile pictures to offend the tourists. From the tightly wound innkeeper to a nest of anti-government zealots Donald's probing uncovers more about the old murder than the one he set out to solve. Goaded by a collusion of deceit he stumbles into mortal danger, confronts the killer, and faces up to the realities of his own life.

Light This Candle Neal Thompson, 2007-12-18 The definitive biography of Alan Shepard, America's first man in space, with a new Foreword by Chris Kraft "One of the finest books ever written about the space program."—Homer Hickam, author of *Rocket Boys* "A wonderful and gripping biography . . . meticulously reported in the best tradition of David Halberstam."—Buzz Bissinger, New York Times bestselling author of *Friday Night Lights* Alan Shepard was the brash, cockiest, and most flamboyant of America's original Mercury Seven, but he was also regarded as the best. Intense, colorful, and dramatic, he was among the most private of America's public figures and, until his death in 1998, he guarded the story of his life zealously. *Light This Candle*, based on Neal Thompson's exclusive access to private papers and interviews with Shepard's family and closest friends—including John Glenn, Wally Schirra, and Gordon Cooper—offers a riveting, action-packed account of Shepard's life.

Endless Road of Corpse Yi WanHuGuJiu, 2020-05-03 The Ebola virus continues to wreak havoc, three Airlines airliners fall, and oil prices suddenly collapse. The zombie crisis suddenly erupted after a series of strange changes. Not only did the protagonist and his companions have to avoid the direct threat from zombies, struggling to survive in the apocalypse of modern civilization, but they also had to constantly search for the origin of

zombies. Was this the greatest conspiracy in the history of human society, or was this a disaster that Earth was destined to face?

Mr. Spaceman Robert Olen Butler,2007-12-01 “A surprisingly sweet and droll first-person account of the vexed attempts of an alien to understand the bafflingly unpredictable human race.” —Kirkus Reviews The Pulitzer Prize-winning author “raises fin de siècle literature to new heights and turns inevitability on its head” in a novel of an alien named Desi (Publishers Weekly). For decades, Desi has kept a quiet vigil above the Earth while studying the confusing, fascinating, and frustrating primary species of our planet, occasionally venturing to the planet’s surface to hear their thoughts and experience their memories using his empathic powers. Now, on December 31, 2000, he prepares for the final phase of his mysterious mission, which begins when he beams a tour bus bound for a Louisiana casino aboard his ship. The twelve passengers will be the last humans whose lives he will experience before he positions his spaceship in full and irrefutable view of the people of Earth and descends to the planet’s surface to proclaim his presence to all of humanity at the turn of the millennium. Poignant, funny, and charming, Mr. Spaceman is filled with unexpected twists and turns, a tribute to the powers of love and understanding and the essence of what it means to be human. “Funny and humane, entertaining and touching.” —The New York Times
