Metronama: Scenes from the Delhi Metro Rashmi Sadana, 2022-01-21 Rashmi Sadana is Associate Professor of Anthropology at George Mason University and author of *English Heart, Hindi Heartland: The Political Life of Literature in India*.

The Moving City Rashmi Sadana, 2021-12-07 The Moving City is a rich and intimate account of urban transformation told through the story of Delhi's Metro, a massive infrastructure project that is reshaping the city's social and urban landscapes. Ethnographic vignettes introduce the feel and form of the Metro and let readers experience the city, scene by scene, stop by stop, as if they, too, have come along for the ride. Laying bare the radical possibilities and concretized inequalities of the Metro, and how people live with and through its built environment, this is a story of women and men on the move, the nature of Indian aspiration, and what it takes morally and materially to sustain urban life. Through exquisite prose, Rashmi Sadana transports the reader to a city shaped by both its Metro and those who depend on it, revealing a perspective on Delhi unlike any other.

Puppim de Oliveira, 2018-02-06 This volume presents a novel framework to understand urban climate co-benefits in India, that is, tackling climate change and achieving sustainable development goals in cities. It utilizes methods and tools from several assessment frameworks to scientifically evaluate sector co-benefits for informed decision making. GOVERNANCE AND POVERTY REDUCTION AMITA SINGH, KAPIL KAPOOR, RABINDRANATH BHATTACHARYYA, 2008-12-04 Poverty reduction in South Asia is a precondition for sustaining any form of reforms in governance. The new public management reforms which started in South Asia from Sri Lanka taking the initiative in 1977–78 have been a decisive break from the previously practised State driven protectionist system. Investment in the region has been rising and even per capita income has shown some increase, yet the state has not been able to lead these reforms appropriately and efficiently. Thus poverty has not been reduced, ordinary people continue to languish under government programmes and the socially excluded remain outside the mainstream decision making bodies. Governance in South Asia faces the single most important challenge of poverty reduction which continues to blunt and disfigure capacity, self esteem and service delivery system to the poor. This book attempts to bring out microlevel studies from many regions in South Asia to address issues of entrepreneurship, knowledge and professionalism. As an initiator of the idea on developing a critique to the straightjacketed 'best practice' research, this book questions the standard practice in evaluating administrative

reforms as not being the true base for knowledge. Administrators need to balance capacity and control in every implementation programme. Confining to the knowledge of 'best practices' may conceal enormous amount of information from the 'less than best' practices which may be necessary to sustain good initiatives of public managers. This book highlights areas of active networking, partnerships and collaborations amongst state and non-state bodies, NGOs and specialist Science and Technical Organizations. The true nature of governance is explained and demonstrated through the processes which otherwise pass off undetected in macro-understanding of governance.
