🔍 **The Europeanisation of Vocational Education and Training** Christine Ante,2016-09-23 This book explores the impact on EU member states of intensified European cooperation in the field of vocational education and training. By employing the varieties of capitalism approach as an analytical framework, it seeks to bridge diverging views from an innovative standpoint: While many experts argue that EU policies liberalize national training systems in spite of being ‘soft law’, varieties of capitalism argues that these policies do not produce a convergence of national institutions. The book maintains that European instruments such as the European Qualifications Framework and the European Credit System for Vocational Education and Training are indeed biased towards liberal training regimes. On the basis of case studies on Germany, the Netherlands and England, it shows that the initiatives were implemented in line with national training systems. Thus, European soft law does not lead to a convergence of training regimes – or, as the book posits, of welfare states in general.

🔍 **Social Work Education and the COVID-19 Pandemic** Yael Latzer,Liat Shklarski,2024-02-13 This book examines how the shift to remote teaching in March 2020 due to the global pandemic created new opportunities for innovation and creativity and shaped how social work classes were taught, with many temporary changes now part of permanent, standard practice. Drawing on narratives from 20 social work leaders across 17 different countries, the chapters explore particular themes and viewpoints on lessons learned during the pandemic, including case studies to examine copying mechanisms, insights into the transition to remote teaching, and the creative lessons that were learned. By taking an international perspective, it represents a key contribution to the scholarship of social work leaders from around the world concerning how institutions transitioned to remote learning and teaching and how these lived experiences and new discoveries are contributing to and influencing current practice. As such, it will appeal to social work educators, researchers, and field educators around the world with interests in experimental curriculum and field practice.

🔍 **Primary and Secondary Education During Covid-19** Fernando M. Reimers,2021-09-14 This open access edited volume is a comparative effort to discern the short-term educational impact of the COVID-19 pandemic on students, teachers and systems in Brazil, Chile, Finland, Japan, Mexico, Norway, Portugal, Russia, Singapore, Spain, South Africa, the United Kingdom and the United States. One of the first academic comparative studies of the educational impact of the pandemic, the book explains how the interruption of in person instruction and the variable efficacy of alternative forms of education caused learning loss and disengagement with learning, especially for disadvantaged students. Other direct and indirect impacts of the pandemic diminished the ability of families to support children and youth in their education. For students, as well as for teachers and school staff, these included the economic shocks experienced by families, in some cases leading to food insecurity and in many more causing stress and anxiety and impacting mental health. Opportunity to learn was also diminished by the shocks and trauma experienced by those with a close relative infected by the virus, and by the constraints on learning resulting from students having to learn at home, where the demands of schoolwork had to be negotiated with other family necessities, often sharing limited space. Furthermore, the prolonged stress caused by the uncertainty over the resolution of the pandemic and resulting from the knowledge that anyone could be infected and potentially lose their lives, created a traumatic context for many that undermined the necessary focus and dedication to schoolwork. These individual effects were reinforced by community effects, particularly for students and teachers living in communities where the multifaceted negative impacts resulting from the pandemic were pervasive. This is an open access book.

🔍 **The World of Children** Simone L. Ssig,Andreas Weis,2019-10-03 In an era of rapidly increasing technological advances and international exchange, how did young people come to understand the world beyond their doorsteps? Focusing on Germany through the lens of the history of knowledge, this collection explores various media for children—from textbooks, adventure stories, and other literature to board games, museums, and cultural events—to probe what they aimed to teach young people about different cultures and world regions. These multifaceted contributions from specialists in historical, literary, and cultural studies delve into the ways that children absorbed, combined, and adapted notions of the world.

🔍 **Higher Education in the Era of Migration, Displacement and Internationalization** Khalid Arar,Yasar Kondakci,Bernhard Streitwieser,Anna Saiti,2021-12-05 This book draws from the voices of students and those who educate them to reveal the unique issues faced in the quest to access higher education in order to provide a greater understanding of the complex phenomenon of international migration and its intersection with higher education. Higher Education in the Era of Migration, Displacement and Internationalization examines how higher education institutions globally can improve to meet the needs of displaced people, refugees, migrants, and international students. Examining relevant policy, leadership, programs, and services that equitably meet diversified students' needs, this book examines how institutions can increase access, participation, and success. The chapters present cutting-edge scholarship that tie the existing body of knowledge on international migration for higher education to ways that institutions of higher education can assist the formation of relevant policy towards displaced groups around the globe. Through students' voices from different nations as well as global policy analysis, the book exemplifies how different higher education institutions are widening access pathways for atypical students. This book is essential reading for scholars, policy-makers, and communities of practitioners. It offers a greater understanding of the complex phenomenon of international immigration and its intersection with higher education. By transcending national policy analysis, it extends the subject of refugee and migration studies to a wider audience.

🔍 **The Unification of German Education** Val Dean Rust,Diane Rust,1995 This study of the integration of East and West German education following the collapse of the German Democratic Republic in 1989 focuses on policy formation and implementation during this period of great social and political turbulence. It is the result of a research project undertaken shortly after the unification. The authors lived in East Germany for a full year, looking carefully at individual schools, vocational training centers, teacher colleges, and universities. They asked macro analytic questions: What are the conditions in which educational policy is successfully formulated? How is this educational policy implemented? What are the consequences of this policy? From the start, West Germany demanded a complete dismantling of the educational system in the former German Democratic Republic. West German political leaders insisted as a condition of unification that all important agreements concerning education made by the GDR states be accepted by the new states. The authors' research shows that even before the unification East Germans had already opted for a system consistent with West German education law. However, the West Germans disregarded these changes and imposed their own version of reform on East Germany. The study reveals that in this period of confusion the East Germans did not fully analyze the implications of the imposed conditions, which now have unforeseen negative consequences. The German situation is of great interest to all educators, particularly students of educational policy making, as well as researchers in political science, economics, and sociology.

🔍 **Eastern European Mathematics Education in the Decades of Change** Alexander Karp,2020-05-04 This contributed volume is devoted to the recent history and evolution of mathematics education in Eastern Europe, exploring how it was influenced by social and political changes in this part of the world. Despite the broad recognition of the importance of these changes, little scholarship exists that examines the ways in which they were followed by changes in the teaching of mathematics in the post-socialist countries. Indeed, the analyzed processes are complex and vary across the states. Accordingly, this book touches on many factors--including differences in cultures and traditions – that find expression in the teaching of mathematics. Specifically, this volume seeks to explore what changes there were in education in general and in the position of mathematics in school education in these years, and how these changes may be explained and documented; what changes there were in the content of mathematics education and its assessment, and how were they motivated and adopted; what new textbooks appeared and what new methodological ideas were offered in them; how and why mathematics teacher education and/or professional development changed; what was the role (if any) of foreign influences on mathematics education, etc. The book will be of interest to both researchers in mathematics education and practitioners-teachers, as well as a broader audience of historians and educators exploring the political aspects of education.
