Microsoft Dynamics GP Workflow 2.0 Ian Grieve,2015-06-01 Microsoft Dynamics GP is a popular enterprise resource planning (ERP)

application used by tens of thousands of sites around the world to keep the accounting, financial, distribution and manufacturing functions running day in and day out. Dynamics GP includes a variety of tools and modules to assist in controlling processes and data; one of the major modules for this was the Dynamics Workflow module. However, this module had major flaws which very much limited its usefulness; it was slow, clunky and difficult to install, configure and maintain. As of Microsoft Dynamics GP 2013 R2 this Workflow module has been replaced with a new one; Workflow 2.0. This new module lives entirely within Dynamics GP itself, thereby removing the dependency on SharePoint; this has the dual benefit of making Workflow 2.0 easy to setup, configure workflow processes and maintain on an ongoing basis. This book introduces the concepts of workflow and moves onto Workflow 2.0. It covers the creation of both simple and complex document based workflow processes, a non-document based workflow, how users interact with the workflow process, including email notifications and email actions, before wrapping up with a step-by-step install and verification of the Web Services for Microsoft Dynamics GP.

Jet Reports with Microsoft Dynamics GP Ian Grieve,2020-06-30 Microsoft Dynamics GP is a popular enterprise resource planning (ERP) application used by tens of thousands of sites around the world to keep the accounting, financial, distribution and manufacturing functions running day in and day out.While

Microsoft Dynamics GP includes a number of different reporting tools out of the box which cover a number of different reporting needs, they are usually not intended for end-users to modify and provide different reporting meaning users need to learn several reporting tools and run reports from different areas of the system.One of these reporting tools is Management Reporter which was intended for financial reporting and was very popular with accountants for self-serving their financial reports. In 2016 Microsoft made two announcements; development on Management Reporter would cease, with the product being retired in a few years, and that they had gone into partnership with the company producing Jet Reports.Partners and clients have started making moves to transition from Management Reporter to Jet Reports; unfortunately, there is no migration tool so reports need to be recreated in Jet Reports.As well as a replacement for Management Reporter, Jet Reports allows a much wider range of reports to be produced; it allows not only financial reporting, but also operational reporting.
