**Human Rights in Development Yearbook 1998**

Stokke,2023-12-14 The eleventh in the series of yearbooks on Human Rights in Developing Countries, this volume marks a departure from previous editions and a new beginning. The Yearbook will now bear the title of Human Rights in Development, to reflect the fact that it will explore the role of human rights as an integral part of the development process. The new title is also an indication of the fact that the scope of the Yearbook has widened to include human rights topics and issues in the more developed parts of the world as well as in the developing countries covered hitherto. Moreover, human rights are

themselves in development and the new Yearbook plans to keep track of standard-setting in the human rights field. Finally, the new title reflects the Yearbook's aim of engaging in more international and comparative studies on the one hand and in more focused local issues on the other. With the rapid spread of new information technology and improved local monitoring capacity in developing countries, there may be less of a need for the type of nation-level country studies the Yearbook performed in the past. Two themes cut across the series of articles contained in the current edition. One, human rights promotion, is explored in various ways; one article looks at the establishment of national human rights institutions as instruments of promotion; another analyses development interventions in terms of their impact on local populations, drawing on UN and World Bank experience; yet another argues the case for using aid in human rights promotion, exemplified by Dutch aid to Guatemala; a fourth investigates the policies of the EU and ASEAN in seeking to improve the human rights situation in Burma; and finally one article looks at the work of the ILO in standard-setting and implementation in the field of child labour. The other theme, local conflict, is addressed in two articles, one looking at local communities in Latin America caught between local customs and ideologically charged civil wars and the other investigating the tensions between centralized rule and local autonomy in Kenya, recently erupting into ethnic violence. The Human Rights in Development Yearbook is a joint project of the Chr. Michelsen Institute, Bergen; the Danish Centre for Human Rights, Copenhagen; the Icelandic Human Rights Centre, Reykjavik; the Ludwig Boltzmann Institute of Human Rights, Vienna; the Netherlands Institute of Human Rights, Utrecht; the Norwegian Institute of Human Rights, Oslo;

and the Raoul Wallenberg Institute of Human Rights and Humanitarian Law, Lund.

*The Stack* Benjamin H. Bratton, 2016-02-19 A comprehensive political and design theory of planetary-scale computation proposing that The Stack—an accidental megastructure—is both a technological apparatus and a model for a new geopolitical architecture. What has planetary-scale computation done to our geopolitical realities? It takes different forms at different scales—from energy and mineral sourcing and subterranean cloud infrastructure to urban software and massive universal addressing systems; from interfaces drawn by the augmentation of the hand and eye to users identified by self—quantification and the arrival of legions of sensors, algorithms, and robots. Together, how do these distort and deform modern political geographies and produce new territories in their own image? In *The Stack*, Benjamin Bratton proposes that these different genres of computation—smart grids, cloud platforms, mobile apps, smart cities, the Internet of Things, automation—can be seen not as so many species evolving on their own, but as forming a coherent whole: an accidental megastructure called The Stack that is both a computational apparatus and a new governing architecture. We are inside The Stack and it is inside of us. In an account that is both theoretical and technical, drawing on political philosophy, architectural theory, and software studies, Bratton explores six layers of The Stack: Earth, Cloud, City, Address, Interface, User. Each is mapped on its own terms and understood as a component within the larger whole built from hard and soft systems intermingling—not only computational forms but also social, human, and physical forces. This model, informed by the logic of the multilayered structure of protocol “stacks,” in which

network technologies operate within a modular and vertical order, offers a comprehensive image of our emerging infrastructure and a platform for its ongoing reinvention. The Stack is an interdisciplinary design brief for a new geopolitics that works with and for planetary-scale computation. Interweaving the continental, urban, and perceptual scales, it shows how we can better build, dwell within, communicate with, and govern our worlds. [thestack.org](http://thestack.org)

*Human Rights and the Police in Transitional Countries*

Lone Lindholt, Paulo de Mesquita Neto, Danny

Titus, Etannibi E. Alemika, 2021-08-04 The volume, intended to function as an academic debate-book, began as a workshop on Human Rights and the Police in Transitional Countries held in March 2001 in Hillerød, Denmark. The workshop, which was funded by the Danish Ministry of Foreign Affairs, brought together practitioners and academics from Europe, Asia, Africa and Latin America to discuss common experience from the context of transition, which characterises all of them. These discussions take place along four themes, i.e. the transitional context, governance and rule of law; police and civil society; education and training; and the police organisation and reform, international intervention and aid. In addition to a number of key papers on general and theoretical aspects, each section contains a number of illustrative examples of how these issues express themselves in a large number of countries. Finally, the book sums up a catalogue of findings and recommendations in relation to the promotion of human rights in transitional countries and the role of the police in this work.

**Running Past Dark** Han Nolan, 2023-09-19 A Heart in a Body in the World by Deb Caletti meets Amber Smith's The Way I Used to Be in this young adult mystery following

a teen searching for the truth behind the deadly car crash that claimed the lives of her twin sister and the high school football coach. What happens to the twin left behind? Scottie O'Doul isn't looking forward to starting her senior year. Last May, her identical twin sister, Cait, died in a car crash involving the school's beloved football coach. There's been no official report on the accident yet, but before she died, Cait told Scottie a disturbing secret. When Scottie reveals this secret, half the town turns against her, certain that Scottie is lying to protect her sister and that Cait deliberately lost control of the car. Scottie knows her twin would never take her own life, or someone else's, but how can she prove it? As she faces bullying and hostility at school, she starts to wonder if what Cait said was even true. Turning to running to break through her grief, Scottie finds a new world and a new sense of self outside her twinningess. She also reconnects with her old boyfriend, who had a terrible accident of his own the same day Cait died. Could there be a connection? As she runs mile after mile, Scottie keeps trying to fit the jigsaw pieces together and find the true picture of what happened to Cait and what was really going on at school before the crash.

**Woman Lawyer** Barbara Babcock, 2011-01-05 Woman Lawyer tells the story of Clara Foltz, the first woman admitted to the California Bar. Famous in her time as a public intellectual, leader of the women's movement, and legal reformer, Foltz faced terrific prejudice and well-organized opposition to women lawyers as she tried cases in front of all-male juries, raised five children as a single mother, and stumped for political candidates. She was the first to propose the creation of a public defender to balance the public prosecutor. Woman Lawyer uncovers the legal reforms and societal contributions of a woman celebrated in her day, but lost to history until now. It casts new light

on the turbulent history and politics of California in a period of phenomenal growth and highlights the interconnection of the suffragists and other movements for civil rights and legal reforms.

Dwell, 2004-04 At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.
