**The Report: Abu Dhabi 2015** Oxford Business Group,2016-05-09 Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non-oil sector expand strongly on the back of business-friendly government policies, as a result of which non-oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate, with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources, growing downstream capabilities and strategic location. Elsewhere Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile visitor numbers to Abu Dhabi continue to rise, with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200-km wide Etihad rail project.

**Digital Marketing in the Zone** David Reske,2017-06-09 In this age of marketing complexity, some marketers have risen above the fray and are accelerating the results of their digital marketing campaigns. They have a complete view of the market and their place in it, and have developed strategies and plans that work. They are not confused at all about the types of campaigns that are available, and they have complete confidence in the ads, messages, offers, and content they are producing. Most marketers, however, don't live life this way. They struggle with their campaigns and live in a perpetual state of confusion, wishful thinking, and risk-taking. Along with their professional frustrations, they experience negative emotions and are never totally happy with their work. Digital Marketing in the Zone breaks through the clutter and provides a clear blueprint to enable marketers to be confident and successful in Digital Marketing.

**Arab Media Systems** Carola Richter ,Claudia Kozman,2021-03-03 This volume provides a comparative analysis of media systems in the Arab world, based on criteria informed by the historical, political, social, and economic factors influencing a country's media. Reaching beyond classical western media system typologies, Arab Media Systems brings together contributions from experts in the field of media in the Middle East and North Africa (MENA) to provide valuable insights into the heterogeneity of this region's media systems. It focuses on trends in government stances towards media, media ownership models, technological innovation, and the role of transnational mobility in shaping media structure and practices. Each chapter in the volume traces a specific country's media - from Lebanon to Morocco - and assesses its media system in terms of historical roots, political and legal frameworks, media economy and ownership patterns, technology and infrastructure, and social factors (including diversity and equality in gender, age, ethnicities, religions, and languages). This book is a welcome contribution to the field of media studies, constituting the only edited collection in recent years to provide a comprehensive and systematic overview of Arab media systems. As such, it will be of great use to students and scholars in media, journalism and communication studies, as well as political scientists, sociologists, and anthropologists with an interest in the MENA region.

**A Political Economy of Free Zones in Gulf Arab States** Robert Mogielnicki,2021-04-13 This is the first book-length empirical study of free zones (FZs) in Gulf Cooperation Council (GCC) countries. The volume systematically illustrates the development processes behind FZs in Gulf Arab states and assesses the impact of these commercial entities on regional integration, global trade and investment trends, and the Gulf's foreign relations. In the process, the work maps how economic strategies involving FZs evolve alongside varying levels of resource availability and state capacity on a local level while also revealing how development paths in Gulf Arab states are linked to regional and global accumulation circuits. FZ development is an under-examined topic in the wider literature on the Gulf. The empirical findings and theoretical implications of the work therefore offer an original contribution to prevailing political economy discussions concerning the Gulf region.
