Tourist Destination Images and Local Culture Verena Schwaighofer, 2013-11-26 An authentic, unique and memorable destination image is of crucial importance to be competitive in the long-term. Verena Schwaighofer analyses the currently transferred image of the United Arab Emirates as a tourist destination and to what extent the traditional Arabian culture is integrated into the image strategies of image developers in this country. First of all, a detailed theoretical overview referring to various image types, the current image transfer including critical topics related to the religion of Islam, women's role in society, behaviour, body language and dress code and the open-mindedness of the United Arab Emirates regarding local traditions related to the religion of Islam, is given. In the empirical part, a mixed method, including a qualitative media analysis (focusing on print and new media of image developers as well as newspaper articles published by journalists in the United

Arab Emirates and the surrounding countries) and qualitative expert interviews are selected as appropriate research methodology.
