Competition Between Airport Terminals Peter McLay,2006

Industrial Dispute at Dublin Airport Philip Flynn,Stationery Office Dublin,1998

Airport Competition Peter Forsyth,David Gillen,Jurgen Muller,Hans-Martin Niemeier,2016-03-23

The break-up of BAA and the blocked takeover of Bratislava airport by the competing Vienna airport have brought the issue of airport competition to the top of the agenda for air transport policy in Europe. Airport Competition reviews the current state of the debate and asks whether airport competition is strong enough to effectively limit market power. It provides evidence on how travellers chose an airport, thereby altering its competitive position, and on how airports compete in different regions and markets. The book also discusses the main policy implications of mergers and subsidies.

Economic Regulation of Urban and Regional Airports Peter Forsyth, Jürgen Müller, Hans-Martin Niemeier, Eric Pels, 2023-05-02 This book offers new insights into the theory and practice of economic airport regulation. In light of recent developments in aviation markets and policy, and the debate on airport regulation and benchmarking, it offers case studies on various aspects of economic regulation of city and regional airports. Written by experts in the field, the volume features contributions on the theory of regulation and benchmarking, as well as case studies on recent experiences in Europe and Latin America. This book is divided into three parts: Part I provides the theoretical background for the study of airport regulation and regulatory systems. Competition at airports is discussed, as are common forms of regulation and potential pitfalls. Part II addresses benchmarking, as benchmarking is often applied as an input to the regulatory process. Although benchmarking is necessary, reviews of how benchmarking is applied in the literature and in practice show that improvements can be made. Part III provides case studies on real-world examples. Addressing the question of whether and how European airport regulators set incentives for efficiency, and how benchmarking is used in the regulatory process, this book is an important contribution to the development of the transport industry in Europe and Latin America. It will appeal to scholars and students in transport economics, regional economics and related fields, as well as to practitioners and policy makers in the transport industry.

Flying with Father Browne E. E. O'Donnell, 2021-04-01 Father Francis Browne SJ, Titanic photographer and much decorated war chaplain, began to take flying lessons at Baldonnell Aerodrome, near Dublin, in 1925. His first aerial photographs were taken in 1926 and he was still flying over County Dublin in light aircraft until the 1930s. It was in the 1940s, however, that Fr Browne took most of his photographs of aircraft and airports. Aviation had developed greatly and grass airstrips gave way to concrete runways, as glorified shacks and Nissen huts made way for sophisticated terminal buildings. During the 1950s Fr Browne took commercial flights to visit family in England. Eddie O'Donnell SJ has once again researched the Father Browne Archive and has put together a truly fascinating collection of photographs telling the story of the early years of aviation in

Ireland.
