Television News and the Supreme Court Elliot E. Slotnick, Jennifer A. Segal, 1998-08-28

Beginning with the recognition that the Supreme Court is the most invisible branch of American government and the one that most Americans know the least about, this book examines the way in which television news, the primary source of the public's limited knowledge, covers the Supreme Court. The book relies on rich interviews with network news reporters who have covered the Court, coupled with actual videotapes of network newscast coverage, to develop a unique portrait of the constraints faced by reporters covering the institution as well as a thorough picture of what facets of the Court's work actually are covered by television news. The analysis demonstrates convincingly that there are characteristics of the television news industry (such as its heavy reliance on dramatic stories and visuals) that, coupled with the rules and habits of the Supreme Court (such as its refusal to allow cameras in the Court as well as its propensity to announce several critical rulings on the same day) come together to make network news coverage of the Court infrequent, brief, and in too many instances, simply plain wrong.

The New Order Karen E. Bender, 2019-11-12 "Bender's willingness to go deep, to burrow down into what's right and wrong about 21st century America and Americans, is a mirror that draws us in and does not allow us to look away. —Los Angeles Times on Refund The National Book Award finalist for Refund returns with a new collection of stories that boldly examines the changes in American culture over the last two years through the increasing presence of violence, bigotry, sexual harassment, and the emotional costs of living under constant threat. In the title story, the competition between two middle school cellists is affected by a shooting at their school, and it is only years later that they realize how the intrusion of violence affected the course of their lives. In *This Is Who You Are*, a young girl walks the line between Hebrew school and her regular school, realizing that both are filled with unexpected moments of insight and violence. In *Three Interviews*, an aging reporter must contend with her dwindling sense of self and resources, beleaguered by unemployment, which sets her on a path to three increasingly unhinged job interviews. In *Mrs. America*, a candidate for local office must confront a host of forces that threaten to undermine her campaign and expose her own role in the dissonance between what America is and what it should be. *The New Order* explores contemporary themes and ideas, shining a spotlight on the dark corners of our nature, our instincts, and our country.

Making the News Amber E. Boydstun, 2013-08-26 Media attention can play a profound role in whether or not officials act on a policy issue, but how policy issues make the news in the first place has remained a puzzle. Why do some issues go viral and then just as quickly fall off the radar? How is it that the media can sustain public interest for months in a complex story like negotiations over Obamacare while ignoring other important issues in favor of stories on "balloon boy?" With *Making the News*, Amber Boydstun offers an eye-opening look at the explosive patterns of media attention that determine which issues are brought before the public. At the heart of her argument is the observation that the media have two modes: an "alarm mode" for breaking stories and a "patrol mode" for covering them in greater depth. While institutional incentives often initiate alarm mode around a story, they also propel news outlets into the watchdog-like patrol mode around its policy implications until the next big news item breaks. What results from this pattern of fixation followed by rapid change is skewed coverage of policy issues, with a few receiving the majority of media attention while others receive none at all. Boydstun documents this systemic explosiveness and skew through analysis of media coverage across policy issues,

including in-depth looks at the waxing and waning of coverage around two issues: capital punishment and the “war on terror.” Making the News shows how the seemingly unpredictable day-to-day decisions of the newsroom produce distinct patterns of operation with implications—good and bad—for national politics.

Governing with the News Timothy E. Cook, 1998-02-17 From the opening decades of the republic when political parties sponsored newspapers to current governmental practices that actively subsidize the collection and dissemination of the news, the press and the government have been far from independent. Unlike those earlier days, however, the news is no longer produced by a diverse range of individual outlets but is instead the result of a collective institution that exercises collective power. In explaining how the news media of today operate as an intermediary political institution, akin to the party system and interest group system, Cook demonstrates how the differing media strategies used by governmental agencies and branches respond to the constitutional and structural weaknesses inherent in a separation-of-powers system. Cook examines the news media's capacity to perform the political tasks that they have inherited and points the way to a debate on policy solutions in order to hold the news media accountable without treading upon the freedom of the press.

Book Review Digest, 1927 Excerpts from and citations to reviews of more than 8,000 books each year, drawn from coverage of 109 publications. *Book Review Digest* provides citations to and excerpts of reviews of current juvenile and adult fiction and nonfiction in the English language. Reviews of the following types of books are excluded: government publications, textbooks, and technical books in the sciences and law. Reviews of books on science for the general reader, however, are included. The reviews originate in a group of selected periodicals in the humanities, social sciences, and general science published in the United States, Canada, and Great Britain. - Publisher.

The People's News Joseph E. Uscinski, 2014-02-03 Uncovers the surprising cause behind the recent rise of fake news In an ideal world, journalists act selflessly and in the public interest regardless of the financial consequences. However, in reality, news outlets no longer provide the most important and consequential stories to audiences; instead, news producers adjust news content in response to ratings, audience demographics, and opinion polls. While such criticisms of the news media are widely shared, few can agree on the causes of poor news quality. *The People's News* argues that the incentives in the American free market drive news outlets to report news that meets audience demands, rather than democratic ideals. In short, audiences' opinions drive the content that so often passes off as “the news.” *The People's News* looks at news not as a type of media but instead as a commodity bought and sold on the market, comparing unique measures of news content to survey data from a wide variety of sources. Joseph Uscinski's rigorous analysis shows news firms report certain issues over others—not because audiences need to know them, but rather, because of market demands. Uscinski also demonstrates that the influence of market demands also affects the business of news, prohibiting journalists from exercising independent judgment and determining the structure of entire news markets as well as firm branding. Ultimately, the results of this book indicate profit-motives often trump journalistic and democratic values. The findings also suggest that the media actively responds to audiences, thus giving the public control over their own information environment. Uniting the study of media effects and media content, *The People's News* presents a powerful challenge to our ideas of how free market media outlets meet our standards for impartiality and public service.

Getting the Picture Jason E. Hill, Vanessa R. Schwartz, 2020-09-09 Powerful and often controversial, news pictures promise to make the world at once immediate and knowable. Yet while many great writers and thinkers have evaluated photographs of atrocity and crisis, few have sought to set these images in a broader context by defining the rich and diverse history of news pictures in their many forms. For the first time, this volume defines what counts as a news picture, how pictures are selected and distributed, where they are seen and how we critique and value them. Presenting the best new thinking on this fascinating topic, this book considers the news picture over time, from the dawn of the illustrated press in the nineteenth century, through photojournalism's heyday and the rise of broadcast news and newsreels in the twentieth century and into today's digital platforms. It examines the many kinds of images: sport, fashion, society, celebrity, war, catastrophe and exoticism; and many mediums, including photography, painting, wood engraving, film and video. Packed with the best research and full colour-illustrations throughout, this book will appeal to students and readers interested in how news and history are key sources of our rich visual culture.

Environmental Success Stories Frank Dunnivant, 2017-03-21 Unlike many titles on environmental issues that portend a dark future, *Environmental Success Stories* delves into the most daunting ecological and environmental challenges humankind has faced and shows how scientists, citizens, and a responsive public sector have dealt with them successfully. In addition to presenting the basic chemical and environmental science underlying problems like providing clean drinking water, removing DDT and lead from agriculture and our homes, and curtailing industrial pollution, this book also discusses the political actors, agency regulators, and community leaders who have collaborated to enact effective legislation. Sharing the stories of the people, organizations, and governments who have addressed these problems successfully, Frank M. Dunnivant explains how we might confront the world's largest and most complex environmental crisis: climate change. Now is the time for rededicated scientific exploration and enlightened citizen action to save our environment, and Dunnivant's book offers a stirring call to action.

ETOP Stephen L. Styron M.D., 2008-12-17 *ETOP* is a contemporary medical novel that explores the multifaceted and controversial subject of elective termination of pregnancy, or abortion. There are countless stories of women who find themselves in difficult, if not impossible, situations where they conclude their only option, or the most reasonable option, is to terminate their pregnancy. Some women make this life and death decision with the support their partner. Others are pressured into choosing abortion by their partner. Unfortunately, many women are left to deal with their situation without any support whatsoever. This book intertwines many personal and some tragic stories from the authors experience as a practicing OB/GYN over the past twenty years. There are honest and noble people who have totally opposite views on the issue. Some of the characters, like real people, change their views based on their situation or life experiences. Extremist garner the headlines and sometimes their violence causes pain and suffering for innocent victims. The setting of a inner city medical center shows the challenges countless hospital professional face on a daily basis and the personal rewards they glean from their dedication to the healing arts. The unconventional life style and the mysterious past of a staff physician

arouse the interest of a beautiful young investigative reporter. She is determined to find the truth before she allows herself to fall in love. Whether you are prolife or prochoice there is no doubt many people face anguish from their decision to abort or not to abort a pregnancy.
