Sensory Marketing in Retail Arto Lindblom,2024-01-15 Sensory marketing is a way to differentiate businesses from their competition while influencing customers and their behaviour. At its best, sensory marketing guides or helps customers to make certain choices in a way that they are unaware of what actually influenced their choices. Although it sounds like an attractive way to “nudge” customers, it is a highly demanding practice that also involves risks and ethical concerns. This textbook delves into the world of sensory marketing in a physical retail setting and offers a comprehensive and coherent view of various sensory cues and their capacity to drive our behaviour through stimulating our senses and creating sensory experiences. It particularly highlights the meaning of the multisensory nature of retail stores and emphasises how cues tend to affect us in combination rather than separately as single cues. After reading this book, you will be able to: · Identify various cues in a retailing setting · Categorise cues into different groups · Explain how cues affect consumers when they make their daily choices · Understand the multisensory nature of retail stores and the meaning of cue (in)congruence · Describe how consumers are likely to respond differently to cue combinations than single cues · Apply cues in practice and assess their outcomes. Ideal reading for students taking classes in consumer behaviour, shopper marketing, retail marketing and store design among others, it contains more than 30 global examples from various retail companies, self-reflective questions and decisions-based questions to aid learning.

Brand Ted Matthews,2013-05-22 After 5 years of appearances as a Globe and Mail business bestseller, the fully updated and revised edition of this book could not be more timely. The first edition was a plea to North American leaders to confront three crises – hyper-messaging, the labor shortage and the rise of China – by embracing the fact that a Brand is not a logo, advertising or any other marketing communication, but what people think of you. Unfortunately, these crises have only become more serious, and the majority of North American executives still fundamentally misunderstand Brand's true meaning. Yet there is good news: Once you realize that your Brand is what people think of you, you realize it is your culture. Then you can build a remark-able Brand that cuts through competing messaging, helps you attract, retain and inspire the best and brightest, and leverage the full power of Branding – our single remaining advantage over the East Asian economies. This new edition is packed with 37 entertaining and practical new stories, along with numerous actionable frameworks, on how to build a Brand for the 21st century – starting by rooting it in an inspiring core purpose and Brand Foundation. You can put this book to work at your organization – whether B2B, not-for-profit, B2C or government – today.

Little evidence has been accumulated to show whether international consumers prefer to browse and buy from standardized global websites or websites adapted to local cultures. The Culturally Customized Web Site provides insights into whether the web is a culturally neutral medium of communication or a medium impregnated with cultural values. Also presented is empirical evidence as to whether local consumers prefer standardized websites or websites adapted to their culture. Visit www.theculturallycustomizedwebsite.com
