Design for Experience Jinwoo Kim, 2015-03-17 Presents a strategic perspective and design methodology that guide the process of developing digital products and services that

provide 'real experience' to users. Only when the material experienced runs its course to fulfilment is it then regarded as 'real experience' that is distinctively senseful, evaluated as valuable, and harmoniously related to others. Based on the theoretical background of human experience, the book focuses on these three questions: How can we understand the current dominant designs of digital products and services? What are the user experience factors that are critical to provide the real experience? What are the important HCI design elements that can effectively support the various UX factors that are critical to real experience? Design for Experience is intended for people who are interested in the experiences behind the way we use our products and services, for example designers and students interested in interaction, visual graphics and information design or practitioners and entrepreneurs in pursuit of new products or service-based start-ups.

Africa 2.0 Russell Southwood, 2022-07-12 Africa wired up provides an important history of how two technologies – mobile calling and internet – were made available to millions of Sub-Saharan Africans and the impact they have had on their lives. The book deals with the political challenges of liberalization and privatization that needed to be in place to get these technologies built. It analyses how the mobile phone fundamentally changed communications in Sub-Saharan Africa and the ways Africans have made these technologies part of their lives. It examines critically the technologies' impact on development practices and the key role development actors played in accelerating things like regulatory reform, fibre roll-out and mobile money. The book considers how corruption in the industry is a prism through which patronage relationships in Government can be understood. The arrival of a start-up ecosystem has the potential to break these relationships

and offer a new wave of investment opportunities. The author seeks to go beyond the hype to make a provisional assessment of the kinds of changes that have happened over three decades. It examines how and why these technologies became transformative and seem to have opened out a very different future for Sub-Saharan Africa.

Urban Mobility and the Smartphone Anne Aguilera, Virginie Boutueil, 2018-11-02 Urban Mobility and the Smartphone: Transportation, Travel Behavior and Public Policy provides a global synthesis of the transformation of urban mobility by the smartphone, clarifying the definitions of new concepts and objects in mobility studies, accounting for the changes in transportation and travel behavior triggered by the spread of the smartphone, and discussing the implications of these

changes for policy-making and research. Urban mobility is approached here as a system of actors: the perspectives of individual behavior (including lifestyles), the supply of mobility services (including actors, business models), and public policy-making are considered. The book is based on an extensive review of the academic literature as well as systematic observation of the development of smartphone-based mobility services around the world. In addition, case studies provide practical illustrations of the ongoing transformation of mobility services influenced by the dissemination of smartphones. The book not only consolidates existing research, but also picks up on weak signals that help researchers and practitioners anticipate future changes in urban mobility systems.

Key Features

- Synthesizes existing research into one reference, providing researchers and policy-makers with a clear and complete understanding of the changes triggered by the spread of the smartphone.
- Analyzes numerous case studies throughout developed and developing countries providing practical illustrations of the influence of the smartphone on travel behavior, transportation systems, and policy-making.
- Provides insights for researchers and practitioners looking to engage with the smart cities and smart mobility discourse.

Taxi! Graham Russell Gao Hodges, 2020-03-17 Why the cabdriver is the real victim of the false promises of Uber and the gig economy. 2007 Noteworthy Book in Industrial Relations and Labor Economics, Princeton University Industrial Relations Section Hailed in its first edition as a classic study of New York City's history and people, Graham Russell Gao Hodges's Taxi! is a remarkable

evocation of the forgotten history of the taxi driver. This deftly woven narrative captures the spirit of New York City cabdrivers and their hardscrabble struggle to capture a piece of the American dream. From labor unrest and racial strife to ruthless competition and political machinations, Hodges recounts this history through contemporary news accounts, Hollywood films, and the words of the cabbies themselves. A new preface recalls the author's five years of hacking in New York City in the early 1970s, and a new concluding chapter explores the rise of app-based ridesharing services with the arrival of companies like Uber and Lyft. Sharply criticizing the use of the independent contractor model that is the cornerstone of Uber and the gig economy, Hodges argues that the explosion of for-hire vehicles in Manhattan reversed decades of environmental anti-congestion efforts. He calls for a return to the careful regulations that governed taxicabs for decades and provided a modest yet secure living for cabbies. Whether or not you've ever hailed a cab on Broadway, *Taxi!* provides a fascinating perspective on New York's most colorful emissaries.

The Labour Politics of App-Based Driving in Vietnam

Joe Buckley, 2023-10-19 Over the past decade, app-based driving services like ride-hailing and delivery have become an integral part of business, employment and daily life in Vietnam. This growth, however, has been accompanied by tensions and conflicts between ride-hailing platforms and traditional taxi companies, xe ôm (motorbike taxi drivers), the authorities and the drivers working for these platforms. Most drivers on these services are male and work long hours for low wages. Their working conditions are precarious because platforms classify them as partners rather than employees, denying them basic rights and benefits. Although platforms offer bonuses, organize events

to celebrate drivers' contributions, and provide training courses, these do not address the fundamental exploitation in the employment relationship. The Ministry of Labour, Invalids and Social Affairs (MOLISA) has not taken sufficient action to protect drivers or taken a stance on whether they should be classified as contractors or employees. The Vietnam General Confederation of Labour (VGCL) is working towards securing social protection for drivers and increasing their representation in labour associations. While some members of the VGCL have argued that app-based drivers are actually workers and should be afforded the same rights and benefits as all workers, this is as yet not the formal position of the confederation. Drivers have taken to organizing strikes and protests to demand better treatment from the platforms. Their methods of activism are rooted in both traditional Vietnamese labour activism and global trends of platform protest. The emergence of the gig economy in Vietnam is a challenge to sustainable development. Policymakers and practitioners are called upon to ensure that platform work contributes to improved livelihoods and decent lifestyles for all.
